Lancaster Farming

Serving The Central and Southeastern Pennsylvania Areas - Also Maryland, New Jersey and Delaware

VOL. 23 No. 29 | Lancaster Farming, Saturday, May 20, 1978 | $6.00 Per Year

Twelve young Lancaster Countians were awarded scholarships this week by the Lancaster County Farm and Home Foundation. Recipients were, left to right, R. Lamar Witmer, Philip E. Risser, Daniel Hershberger, Lester Hershey, Stacy A. Kinckiner, Barbara Trimmer, Marilyn Aldinger, Sheryl Bollinger, Martha Gregory, June Grube, Beverly Hummer, and Denise Grim. Details are on page 109.

Cattle market topping $60

LANCASTER – A bullish cattle market continues throughout the country as a result of fewer available slaughter cattle and steady demands by consumers. Speculation continues that the escalating prices may be headed towards new records in weeks to come and a number of choice animals are already bringing $60 or more per hundredweight.

Depending on the type of cattle at Lancaster County auctions this week were reported to be 50 cents to fully $3.00 higher than the previous week. This past Monday, for example, a price of $60.10 per hundredweight was paid at the Lancaster Stockyards for a Charolais steer. It was the first times since the late Summer of 1973 that prices here topped the $60 mark.

Looking at this week's auction activities, which are detailed on the market pages, inside, it's noted that the high price at the Lancaster yards sparked trends at other Lancaster County auctions. On Tuesday at Vinage, choice and prime steers went for $60-61 per hundredweight, and Wed-

Milk production calms down

By DIETER KRIEG

NEW HOLLAND -- Plagued for months by surplus production and extra marketing costs, most of the Northeast's dairy industry is seeing some light and rays of hope at the end of the tunnel.

That is the bottom line of a report delivered here this week by John York, former general manager of Eastern Milk Producers Cooperative and now vice president in charge of member and public relations for Lehigh Valley Cooperative Farmers. York addressed a meeting here on Wednesday evening for which about 80 members of LeHi were present.

Noting that LeHi is rapidly approaching the time when the cooperative will no longer have to depend on other than its own members for milk supplies, York stated that the dairy situation in the Northeast for the Spring of 1978 is noticeably improved over that of a year ago. National production of storable dairy products – butter, nonfat dry milk, and American cheese - - is down slightly in all categories, compared to a

Amos Funk speaks for land preservation

By DIETER KRIEG

MILLERSVILLE – Amos Funk, a grandfatherly Lancaster Countian, has two titles by which he is known throughout southeastern Pennsylvania – farmer and conservationist. He's a man who has shown devout dedication to agriculture and outstanding soil stewardship throughout his life. A 1966 nominee for Master Farmer, he has won the respect and admiration of thousands who have gotten to know him personally or heard of his work at meetings or in print. To many, Amos Funk is "Mr. Conservationist." The Lancaster County Commissioners formally bestowed that title on him in 1967.

Despite his many achievements and constant dedication for the good of agriculture, Funk is a quiet and modest man. His manner can best be described as "grandfatherly."

Born in October of 1911 in the farm house which has been in his family for three generations, and his maternal grandmother's family for several generations before that, the amiable "Mr. Conservationist" grew up with farming. The family operation consists of three farms encompassing 270 acres and since 1963, Funk's Farm Market. Fruit and vegetables are the specialty.

Married in 1936 to the

Dairy issue deadline nears

On June 3, LANCASTER FARMING will recognize the area's dynamic dairy industry with its Annual Dairy Issue.

We extend a special invitation to dairy groups and organizations, as well as individuals, to submit articles and news on dairying for the Dairy Issue.

To be sure you make the Dairy Issue, please submit all advertising and editorial material by Tuesday, May 30. Call us at 717-394-3047 or 717-626-1164. Or write Lancaster Farming, Box 366, Lititz, Pa. 17543.

Runoff, flood plains topics of legislation

By JOANNE SPAHR

HARRISBURG – Two companion bills which have been hailed for their proposed benefit to farmland conservation have passed the Senate and are now in the House conservation committee. Those bills are Senate Bill 744, known as the Storm Water Management Act, and Senate Bill 743, the Flood Plain Management Act. Both bills are supported by Pennsylvania Farmers Association, Pennsylvania Farmers Union, and the State Grange.

Of the two, the one which may affect farmers more directly is the Storm Water Management Act, the first bill of its nature to be introduced into the Senate.

In the bill it is stated that anyone developing land in a manner which may effect storm water run off must take measures to assure that the maximum rate of runoff is no greater after development than prior to it.

The purpose of the entire bill is to encourage the planning and management of storm water run-off in each watershed in the Commonwealth, consistent with sound water and land practices.

One major provision requires that within two years following the issuance of guidelines by the Department of Environmental Resources, each county must prepare and adopt a watershed storm

Unusually late strawberry season seen

By KENDACE BORRY

LITITZ – If you're waiting for those luscious red strawberries which last year this time were starting to appear on the market, you had better prepare yourself to be patient for a little while longer. Like most other crops this Spring, strawberries are going to be late.

That seemed to be the consensus of opinion of growers this week, anyway. While the strawberry farmers tended to be optomistic about the size of the crop expected, calling it to be "good" or "decent", the majority of them didn't expect to see the red berries ready before June 1.

Peter Alexih, from Herr Fruit Farms, Lancaster R2, summed the prospects up as "good but late". He stated that the blossoms of the strawberry plants were a lot better than anticipated and that the crop was "taking off" right now with the added moisture. He expected the height of the strawberry picking to occur about four weeks from now.

From Millersville, Fred Funk, representing Funk's Farm Market, too said he hoped for a pretty good crop. Few were lost to the frost, he continued, and right now some of the strawberries in the field are now about as big

Eastern Pa. & N.J. Poultry

May 17, 1978

Prices unchanged on light type hens. Offerings increased slightly in some quarters for a fairly good demand. Offerings of heavy type adequate to barely adequate for a fair interest.

Prices Paid at Farm: Light type hens 7-9, mostly 8¾-9; FOB Plant 10½-11¼, mostly 11.

Heavy type hens too few to report.

Delmarva Poultry

May 17, 1978

Ready-to-cook movement fair to occasionally good. Slaughter schedules moderate. Today's LTL asking prices ranged higher at 46 cents on plant grade and 47 cents on U.S. Grade A. Advance interest good however, prices too few to report. Live supplies fully adequate at desirable weights at most plants. Undertone firm.

Current broiler/fryer negotiated prices for immediate delivery - including multiple-drop shipments to New York City from Delmarva.

Range: US Grade A 45-47; Plant Grade 44-46; Premium X US Grade A 52; Premium X Plant Grade 50.

Wtd Avg: US Grade A 45.93; Plant Grade 44.75; Premium X US Grade A 52.00; Premium X Plant Grade 50.00.

X-includes special services, selected competitive brands, etc.

PACMA Eggs

PACMA-FACTS

The following market is supplied by PACMA-FACTS, a direct marketing organization affiliated with the Pennsylvania Farmers' Association. Participating poultrymen are members of PACMA, which employs a fowl marketing agent, The Farmers' Agricultural Cooperative Trading Society (FACT) - to sell members' fowl. PACMA works directly with the PFA poultrymen in the program.

Farm point prices prevailing for fowl to be marketed by members during the week of May 15 were 11½ plant, and 11½ farm.

Baltimore Eggs

May 17, 1978

Prices unchanged. Demand fair for cartoned eggs. Offerings ample on smaller sizes, adequate on balance.

Cartoned eggs: Prices to retailers, state graded (Min. one case sale) white.
Grade A Large 56-62
Grade A Medium 47-54

A Japanese firm has asked the United States Department of State for a source of sparrows and other small birds which might be processed into human food.

HUBBARD WHITE MT. BROILERS

From mother to market, we formulate feeds and feeding programs with your profit in mind.

Does pork production represent a sizeable part of your income? Are you ready to devote an hour or so of your time *planning* for a more profitable future?

If your answer to both questions is yes, you owe it to yourself to read what we have to say.

Unlike many other feed companies, we develop feeding and management programs for each individual operation

It all starts with a Pennfield man reviewing your operation with you Your goals Your records. Whether you farrow and finish your own pigs or buy feeder pigs. Your management practices. The health and overall condition of your herd. And other factors that have an effect on your profit potential.

With the aid of computers, we then design programs that can improve your profits by reducing expenses, improving performance, or both.

For example, many producers who switched from a competitive program to a Pennfield program have cut their feed costs and their hogs go to market sooner. In effect, the Pennfield program is putting more money in their pockets.

There is no cost—or obligation—for this unique service. But you must take the first step by writing or phoning us. Do it today.

Pennfield Feeds, 711 Rohrerstown Rd., Lancaster, PA 17604 Local calls. Lancaster 299-2561, Red Lion 244-4511. In 717 and 215 areas dial toll free 800-732-0467.

Babcock B-300V

1ST IN INCOME OVER FEED & CHICK COSTS
20TH PENNSYLVANIA RANDOM SAMPLE TEST

Results of the 20th Pennsylvania Random Sample Egg Laying Test confirm the reports we've been receiving from egg producers in Pennsylvania on the outstanding performance of the **Babcock B-300V**.

If you've been buying chicks based on Random Sample performance, isn't it time to buy today's winner -- the **Babcock B-300V**.

Eggs Per Hen Housed

*Divide eggs or feed per day or number of birds dead by original number of birds housed, and multiply by 100 to give record to plot

Plot records at the midpoint of each week.

- The slanting per cent production curve begins after 8 months It indicates the normal decrease in rate of lay
- A charted production line parallel to the colored band may be con sidered normal after 8 months of age
- A declining line compared to the colored band indicates deteriorating performance after 8 months of age Try to determine management change or disease control nessary to help the flock.
- A climbing charted production line indicates improving performance after 8 months of age The very best flocks go above the blue area
- Feed used per dozen increases with age of flock, after peak production

EDITORIAL COMMENTS

By DIETER KRIEG, EDITOR

Raindrops keep falling on our heads

All this rain we've been having can cause headaches in more ways than one. We have to put up with delayed planting schedules, damaged fields, cattle confined to barns instead of roaming over lush pastures, and numerous other inconveniences. I remember one bad storm in particular.

Except for the anger displayed by the bolts of lightning and accompanying thunder, the look of the sky mirrored my mood—gloom.

The makings of a disaster were in front of me and there was nothing I could do about it. Mother Nature was angry, or if that wasn't the case, she was being overly generous with the amount of water she was handing out.

Sheets of water, driven by strong winds, were beating young plants of corn to the ground and tearing many of them out. A river of muddy water swirled its way around the house, carrying with it some of the gravel of the driveway. I watched the scene helplessly, hoping only that the damage would not be too great.

Picking up a pair of binoculars, I observed a portion of the field which was most vulnerable to erosion. Rampaging water was cutting through the topsoil and depositing debris along a fence at the bottom of the field. A good sized lake was also forming there.

Down in the pasture, the water carried tin cans, bottles, and other refuse along its path. They had been dropped off by careless motorists and now posed a closer threat to livestock and tractor tires.

The fence near the stream at the other end of the farm was being pressured by the excess water and floating debris. With a little bit of luck it would hold, but quite often it broke, thus creating that much more work for us.

Although the rain was welcome and needed, coming down as fast and violently as it did, it had created a lot more harm than good. Valuable topsoil was lost, fences were broken, plants were washed out or covered over with mud, gullies were formed, and hazardous objects such as bottles were strewn across the pasture.

The sight was frustrating and an unfortunate chapter of life on the farm.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY LAWRENCE W. ALTHOUSE

THE CRITICS

Lesson for May 21, 1978

Background Scripture:
Acts 11.
Devotional Reading;
Ephesians 2:11-22.

Someone once defined a drama critic as "a person who can neither act or write plays but criticizes those that do." That may not be an entirely fair definition, but I can't help thinking that there is more than just a little truth in it. In fact, this truth isn't limited just to drama, for we often find that the critics in almost any field are those who talk a far better game than play it–if indeed they can play at all.

The circumcision party

I find this true in the field of religion, too. It often seems that we have far more self-appointed critics than we really need, people who devote themselves to telling everyone else what they are dong wrong. Of course, this is hardly a contemporary development, for the Bible indicates that we have always had an overabundance of critics in religion.

For example, in Acts 11 we find that, although the church is very, very young, some parties and factions had already sprung up within the church. Following his experience with Cornelius the Centurian at Caesarea, we are told that "when Peter went up to Jerusalem, the circumcision party criticized him" (11:2). "Why did you go to uncircumcised men and eat with them?" they demanded.

This party in the church held that all followers of Christ must be circumcised, law-abiding Jews, who would not associate with the "unclean" Gentiles. Substitute some other word for "uncircumcised" and their criticism of Peter sounds perfectly contemporary.

Withstanding God

These men were critics all right: they criticised Peter's association with the Gentiles, they criticised his preaching to them, and they were extremely critical of the implication that these Gentiles might have been treated and accepted as converts to Christ

It is a disturbing picture that Luke paints for us in Acts 11. Some of these critics were undoubtedly men who had personally known Jesus in the days of his earthly ministry. They had heard his teachings and had seen his miracles. They had witnessed his sacrifice on Calvary, yet as we see them in Acts 11 they seem to have missed the whole meaning of the Good News. They still saw a wall - between Jew and Gentile - where in fact Christ had torn down the wall. They still saw a limited, parochial God where Jesus had pointed to a Heavenly Father for all people. They appear less as disciples than critics and the spirit in which they took Peter to task could hardly have reflected the spirit they had seen in the Master. How could they so have missed the boat?

How can we continue to miss it today?

NOW IS THE TIME

By Max Smith, Lancaster County Agricultural Agent
Phone 394-6851

TO CONTINUE FORAGE FEEDING

Both dairymen and beef cattle producers should continue to feed some dry matter while the animals are on pasture. The feeding of hay, or silage, when the cattle are turned to pasture will result in more uniform production. Also, keeping some dry matter in the ration will help prevent serious scouring and bloating.

Some producers provide this forage by way of a portable hay or feed bunk in the pasture area. The animals will nourish some of this dry forage along with lush spring pastures. Most important is to feed the stored forage early in the day before the herd goes to the new pasture. Later in the season the stored hay or silage will continue to be useful when growth slows down due to dry weather and higher temperatures.

TO READ THE LABEL

I'm sure you have heard this suggestion previously; however, it is still very important to all farmers and gardeners.

Every pesticide should carry a label with directions; these should be read and followed during the application of the material. Don't make the mistake of applying the material in error, and then refer to the directions. The labels are provided by law and should be respected by the user. Serious losses may occur, if the directions are not followed. All packages should carry the original label for good pesticide results. When materials are transferred to other containers the label should be attached.

TO USE THE AGRONOMY GUIDE

One of the best publications of our Penn State Extension Service is the Agronomy Guide. This crop manual covers all major crops in the state and should be utilized more by local farmers. Copies are still available at any Extension office in the state; many questions that come to our office relating crop practices are covered in the Agronomy Guide. Don't go through the season without your copy.

TO CONTROL EASTERN TENT CATERPILLARS

This is the time of the year when many trees are being attacked by a web-living bunch of worms known as Eastern Tent Caterpillars. Many woodlots show evidence of the web and the loss of foliage on the trees. This insect will not do severe damage to a woodlot or forest, but can defoliate individual shade trees.

Control is more successful when the worms are small; insecticides that are labeled for this purpose include Sevin, Malathion, or Orthene. The spray should be directed into the web and over the surrounding tree area.

Don't let them defoliate your favorite shade tree.

COMMENTS FROM READERS

Farm life is not all work

Dear Editor:

It was with interest that I read last week's article about the German farmers visiting Lancaster County. The story may leave the impression, however, that farm life here is all work and no play – which is not entirely so.

Although it does take consistent hard work to keep the area as it is, there is still time for many hours of family pleasure. Let us take a glimpse into the past.

Our forefathers migrated from Germany and other parts of Europe during the early 1700's. Having been denied religious freedom in Europe, they looked to America to start life anew.

We must remember that crossing the Atlantic 250 years ago was not easy. Many died at sea. Therefore only the most amibitous and able-bodied dared to undertake the journey.

Many arrived in this country pennyless, but with a strong spirit and sincere faith in God. They built homes and started farming in virgin soil.

But lo and behold, their problems were not all solved. They faced many Indian attacks and raids. Some settlers were murdered, others were left homeless.

As we look at Pennsylvania today, our hearts go up in thanksgiving for the

THIS IS IT!! FROM BOU-MATIC TECHNOLOGY SYSTEM 2000

THE NEWEST INNOVATION IN DAIRY AUTOMATION

June is dairy month

New important development for the dairymen today . . . The breakthrough of a management tool. 2700M Detacher enables one person to easily milk, using improved techniques with the pounds-of-milk and minutes-per-milker attachment displayed for each cow and fed directly into a computer.

Read on to learn how to reduce drudgery and length of chore time.

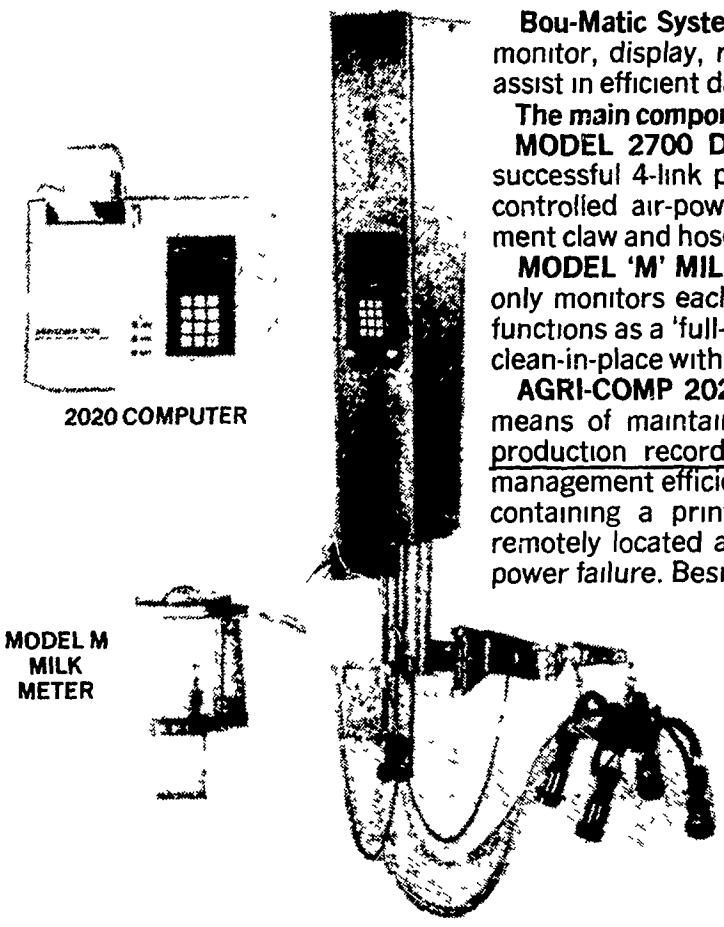
June is dairy month

John and Doris Landis, Colebrook Rd., Lancaster, have started putting this new technology to work for them. John says, "We recently built a Double-8 automated milking parlor. We selected Bou-Matic, because of all the milkers I have seen, I felt Bou-Matic has the most to offer for the dairyman today and in the future.

"Shenk's Farm Service did a prompt and timely good job of layout and installation. I am most satisfied with the service Shenk's did and with the aid of Alan Bair from the Lancaster County Extension Service who helped design our 250 Free-stall dairy setup."

John Landis

Doris Landis, who does a good bit of the milking, added "We are milking 156 cows at present and I can do the milking alone in 2 to 2½ hours with ease. We have a rolling herd average of 15,000 pounds of milk.



MODEL 2700 DETACHER UNIT

Bou-Matic System 2000 - labor saving dairy automation that can monitor, display, record and store daily herd production data — to assist in efficient dairy management decisions.

The main components of the Bou-Matic System 2000 are as follows:

MODEL 2700 DETACHER UNIT - featuring: Bou-Matic's highly successful 4-link positioning arm; reliable, dairy-proven, electronic-controlled air-powered detach and retract mechanism; free-movement claw and hose supports; plus many other convenience features.

MODEL 'M' MILK METER - a revolutionary meter design that not only monitors each cow's milk production on a daily basis but also functions as a 'full-flow' sensing device for the detacher unit, and can clean-in-place with the rest of the milking system.

AGRI-COMP 2020 COMPUTER - a low-cost, easy to use, reliable means of maintaining basic breeding data, health data and milk production records on a daily basis - saves time and increases management efficiency. The Agri-Comp 2020 consists of a single unit containing a printer, computer, and memory. The unit can be remotely located and is equipped with a battery backup in case of power failure. Besides those listed above, other types of individual or total herd data can also be made available on a daily basis if desired.

SYSTEM FLEXIBILITY - you choose the combination that best fits your dairy's needs - The **2700M detacher** with **meter** or the **2700M/2020 detacher** with **meter** and **computer** or the **meter** and **computer** or the **meter** and **print-out** only.

Livestock market and auction news

Omaha Cattle

Thursday, May 18, 1978

Compared with the previous week's close: Closing prices on slaughter steers and heifers were 1.75-2.25 higher, instances 2.50 higher. Cows were weak to 50 lower, bulls firm to 1.00 higher. Fleshy two-way feeder steers were 1.50-2.00 higher.

Four day receipts 16,500 as compared 16,200 previous week and 18,400 a year ago. Fed cattle prices continued to advance during the week under review and closing levels were at a record high. Most interests were in need of cattle for immediate requirements and were aggressive for numbers even in the face of a rather sluggish carcass trade early. Marketings were of modest proportions were ideally distributed over the trading period. The sharp upturn in live prices found late support in an uptrending carcass trade. The steer crop was fairly attractive with a fair percentage choice and a modest volume choice and prime. A large share of the heifer supply was good to average-choice. Steers comprised approximately 47 percent, heifers 32 percent, cows 9 percent and feeders 11 percent.

STEERS: Three loads choise and prime 3-4 1191-1230 lbs. 59.25-59.35, latter price the highest of record locally. Some eighteen loads same grade 3-4 1137-1348 lbs. 58.75-59.00 during week. Choice 2-4 975-1300 lbs. 57.25-53.50. Good 2-3 51.00-55.00. Standard and good 2-3 47.50-49.00.

Average of LS-214, detailed quotations, for choice 900-1100 lb. Steers week 47.50; choice 1100-1300 lbs. 57.88. Average weight steers first three days 1136 lbs. as compared 1151 lbs. previous week. Average weight heifers first three days 974 lbs. as compared 967 lbs. previous week.

HEIFERS: Load choice and prime 3-4 975 lbs. 57.25, eight loads same grade 3-4 967-1138 lbs. 56.75-57.00. Choice 2-4 875-1050 lbs. 54.50-56.50. Mixed good and choice 2-3 850-1000 lbs. 53.00-54.50. Good 2-3 47.00-52.00. Standard and good 2-3 45.00-46.50.

COWS: Utility and commercial 2-4 38.50-41.50, few to 42.00. Cutter 37.00-39.00. Canner and low-cutter 35.00-37.00. Shelly canner 31.00-34.00.

BULLS: 1-2 1300-2100 lbs. 43.00-48.00, few individual 1 49.00-51.00.

FEEDERS: Modest volume choice 949-1138 lbs. Two-way steers 55.50-57.00.

St. Louis Cattle

National Stockyards
May 18, 1978

Receipts this week	7,100
Week ago	6,800
Year ago	6,700

Compared to the previous weeks close, slaughter steers 1.50-2.00 higher. Slaughter heifers fully 1.00, instances 1.50 higher. Cows 50-1.00 higher. Bulls firm to 1.00 higher. Slaughter supply mainly choice and mixed choice and prime 2-4 1000-1200 lb. steers, around 30 per cent heifers and 15 per cent cows.

SLAUGHTER STEERS: Mixed choice and prime 2-4 1050-1250 lbs. 56.00-57.50, mostly 56.50-57.50. Choice 2-4 975-1275 lbs. 54.50-56.60, several 54.50-56.00. Mixed good and choice 2-3 1125-1300 lb. holsteins 50.50-51.00. Good 2-3 900-1200 lbs. 49.50-53.00. Standard to good 2-3 1050-1350 lb. holsteins 46.00-50.00.

SLAUGHTER HEIFERS: Mixed choice and prime 2-4 875-1050 lbs. 54.50-55.00. Couple loads mixed choice and prime 3 to mostly 4, few 5's 1050 lbs. at 54.25. Choice 2-4 800-1050 lbs. 53.00-55.00, mostly 53.00-54.50. Mixed good and choice 2-3 700-1000 lbs. 51.50-53.50. Good 2-3 700-975 lbs. 47.00-51.50.

COWS: Utility and commercial 2-4 37.50-42.00. Boning utility 1-2 42.00-43.00. Cutter 1-2 36.00-40.00. Canner and low cutter 1-2 32.00-36.00.

BULLS: Yield grade 1-2 1050-1900 lbs. 44.00-49.00. Yield Grade 1 1350-1750 lbs. at 50.00.

FEEDERS: Including around 1,200 at Thursday's auction. Feeder steers and heifers 2.00-3.00 higher, instances 4.00 higher. Demand good for light to moderate supply. Receipts mainly choice and mixed good and choice 500-800 lb. steers and 400-750 lb. heifers.

FEEDER STEERS: Choice 400-500 lbs. 66.00-69.75; 500-600 lbs. 62.50-67.25; 600-700 lbs. 58.00-64.50; 700-800 lbs. 55.50-58.50; few lots 850-950 lbs. 56.25-56.50. Mixed good and choice and some choice compact 350-500 lbs. 62.00-68.00, mostly 64.00-67.00; 500-600 lbs. 59.00-62.75.

FEEDER HEIFERS: Choice 350-500 lbs. 55.00-60.00; 500-600 lbs. 53.50-56.75; 600-700 lbs. 52.25-55.50; 700-800 lbs. 51.00-53.75. Mixed good and choice 300-500 lbs. 53.25-56.75.

4-H meets

SEVEN VALLEYS — The Jefferson 4-H Club of Seven Valleys held a meeting on May 9 at the Jefferson Firehall. The program consisted of a bike rodeo. The group also had a demonstration on bike repair by Jon Miller, Jon Janney, and Bill Wise.

The winners in the bike rodeo were as follows: 13-years-and-older, Dave Wise, first; Michelle Bankert, second; and Jon Miller, third. 12-years-and-under, Jennifer DePalmer, first; Denise DePalmer, second; and Mike Krebs, third.

The deadline date for Chicken barbecue tickets is June 8.

The next meeting will be held on June 13 at the home of Ann, Jon, and Kelly Miller. At that time the group will observe dairy month and practice for the 4-H Olympics.

Bird-in-Hand

Prices are shocking

Dear Editor:

In the past few weeks I was shocked at the prices people are willing to pay for food at a "health" food store. The first example was an eight ounce package of wheat sold for $1.33.

Being a farm wife I was interested to know how much that was per bushel. Figuring 60 pounds per bushel, you come up with a whopping $159.60 per bushel. The farmer receives $3.49 for that same bushel of wheat.

Another friend bought one ounce of soybeans for 25 cents an ounce. Figuring 60 pounds per bushel, it brings the price of soybeans to $240 per bushel.

Now, I realize those soybeans must be roasted, packaged, and the middleman must get his fair share, but doesn't $240 per bushel sound a little high when the farmer receives $5.60 for that same bushel of soybeans?

Sincerely,
Adeline W. Gehman
Coopersburg

Shelhamer warns farmers of corn and grain sales

HARRISBURG - Farmers should be very careful when promised abnormally high prices by grain brokers and buyers, according to the State Agriculture Secretary Kent Shelhamer.

Shelhamer said that the Department of Agriculture has been receiving numerous complaints about brokers and buyers with "pie in the sky promises" of high prices who are failing to deliver. The Agriculture Secretary noted that one farmer lost more than $12,000 to a buyer who failed to deliver after taking grain for sale.

But he stressed that farmers, as consumers could help protect themselves against such fraudulent operators in two ways.

"When you sell your grain to someone else, be sure your grain is transported to the elevator or loading dock in your name, not that of the buyer or broker.

"Before contracting with a broker you are unfamiliar with, check his financial standing to be sure he is reputable. The Pennsylvania Department of Agriculture will work with farmers, and will do our best to provide good financial data on any such individual."

Shelhamer added that "our farmers are honest men and women, and we want to make sure that they are dealt with by people of integrity. Farmers cannot afford losses to unscrupulous buyers and brokers when it is already tough enough to keep afloat financially on the farm."

19-ton tractor has all the luxuries

No symbol of modern agriculture suggests its bigness any more than the four-wheel drive tractors that are becoming so common. Almost every farmer with more than a few hundred acres owns at least one of those monsters. The major equipment manufacturers all have a complete line of them - even some relatively small companies have been able to get into the business and compete quite effectively with the old line tractor-makers.

Today's farmer, who is thinking of a bigger tractor, may be bewildered by the many sizes, shapes, brands, options, and prices available to him. A careful buyer can pick up a new, small four-wheel drive tractor for no more than $40,000 or he can go all the way and spend as much as $120,000. For that top figure he gets a machine that will pull almost anything he can fasten behind it, one that will go in any kind of weather, and provide the operator with all the comforts of home.

A manufacturer in Georgia is building giant tractors, which are considered to be the Rolls Royce of farm tractors. The original designer-builder was Jones Earl Copeland of Texas. Copeland started out in the machinery business and decided he could build a better tractor. So at age 27, with $10,000 of borrowed money, he set out to build his first one - the Copeland 6500. Five years later, in 1969, he made a deal with a Texas rice farmer, J.D. Woods, to design some special tractors that would not bog down in his rice fields. They proved so successful that everybody wanted one so the two men went into a partnership. The resulting company was Woods and Copeland Manufacturing, Inc., which has since been acquired by the Rome Plow Company of Cedartown, Ga.

The big four-wheel drive tractors have come on the scene very rapidly with bright prospects predicted for them by most manufacturers. They have power, the flotation, the maneuverability to perform almost any farm job. They'll do anything from chisel plowing and heavy disking to planting corn, owners say.

About two years ago, Woods & Copeland, Inc. of Wharton, Tex. delivered what is believed to be the most powerful farm tractor every made in the world. Elmo Meiners, an Illinois corn farmer, was the man who placed the order, and the 600 horsepower behemoth was especially built to his specifications. The tractor is now owned by Ron Allen of Montana.

Meiners, one of the growing number of America's "big farmers", was referred to the Texas firm by representatives of The Caterpillar Tractor Company in Peoria, Ill. They suggested that the size and other special requirements

"Test Cow is Purina's Super Energy, Super Value Milking Ration"...

Dr J P Everett
Purina s Director
Dairy Research

"There are lots of so-called 'high energy' milking rations around that claim to have a high energy, high TDN content and at a low cost," says Dr. Everett. "The real measurement of a milking ration's value is the income it produces over feed cost, not the price.

"At the Purina Dairy Research Center, we are proud of Purina Test Cow . . . proud that it is available for America's dairymen. It is truly a "super" high energy ration. In fact, it contains the highest energy and lowest fiber of all Purina milking rations.

"I don't know of any milking ration I would recommend more highly."

Certainly all milking rations are not alike. So don't settle for less than the best. Ask us about Test Cow today.

Onions, beans, tomatoes tops for garden

NEWARK – Onions, green beans, and tomatoes are three of the most productive crops you can grow in the small home garden. With proper care at planting time and minimal attention during the growing season, they'll produce abundantly right up to the first hard frost in the Fall.

One of the first crops that can be set out in the Spring is onions, but there's still plenty of time to plant some if you haven't done so yet, says Delaware Extension vegetable specialist Dr. Michael Orzolek. He recommends starting with sets or plants, rather than seeds. Sets, which are easy to come by, are actually small onions that were started the previous year. Look for "Ebenezer" and "Yellow Globe" - two of the most popular varieties for the home garden.

Onions need fertile soil to produce well, says Orzolek. Use 5-10-10 or 10-10-10 fertilizer at planting and sidedress plants with nitrogen about six weeks later. This fertilizer is needed to produce a good green color and rapid growth.

If you intend to harvest your onions as dry bulbs, plant sets three to four inches apart and 1-½ to two inches deep. For scallions, plants or sets should be 1-½ to two inches apart and three to four inches deep. Pull green onions whenever they reach edible size, starting with largest ones first. Harvest your dry-bulb crop after the majority of the tops have dried and are bent over.

For a satisfying yield, green or wax beans are one of the easiest and quickest crops to grow, says the specialist. Most beans require little space to grow and are adaptable to a wide range of soil conditions. It takes only 50 to 60 days from seed to produce a good crop of snap beans.

You have a choice between pole or bush type plants, when it comes to beans. There are differences in taste, as well as differences in length of harvest period for each type.

One planting of pole beans will give you a two to three month harvest, as opposed to only three weeks for bush beans. Pole beans are also somewhat easier to pick, because you don't have to do so much bending over. But bush beans have the advantage of taking up less space, and with several plantings about 10 days apart, you can get almost a continuous harvest over a three to four month period.

One of Orzolek's favorite bush bean varieties is "Tenderette" - a velvety green-podded bean. But for people interested in trying something a little different, the specialist suggests trying some purple-podded beans. These grow on a bush type plant that produces a tender, stringless purple pod that turns deep green when it's cooked. He considers them very delicious.

If you're wondering how many beans to plant, by the way, figure on about a pound of beans from every two feet of row.

To get the most mileage out of your tomatoes this Summer, the vegetable specialist recommends planting several varieties with different maturity dates. There are a number of good ones to choose from, all resistant to fusarium and verticullium wilts.

For canning as well as fresh eating, a good all-purpose variety is Rutgers. The plant yields late, but once it starts producing you'll get an abundant harvest of nice firm six to eight ounce fruit right up to a hard frost.

Two mid-season, all-purpose varieties are Campbell 28 and Heinz 1350. Both were originally developed for commercial canning use, so they're perfect for the gardener who wants to put up some tomato juice, or spaghetti sauce. For early yields, grow either Supersonic, Jet Star of Better Boy.

If you're looking for tomatoes weighing a pound or more, go to the Beefsteak or Ponderosa varieties. These will give you extra large fruit that's good for fresh eating. Just be prepared for a little less flavor and texture than you're used to with smaller fruited varieties. Also, yields will be smaller and you may find the plants less resistant to the diseases that plague tomatoes.

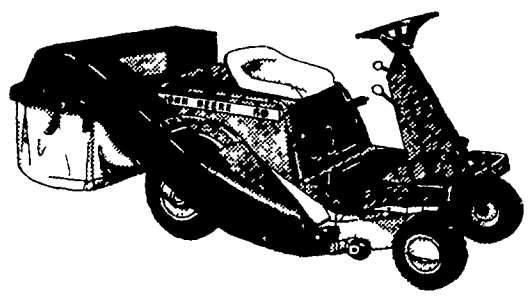
Speaking of diseases, one problem that the home gardener can avoid by careful cultural practices is blossom end rot. Mulch plants well and maintain an even soil moisture over the growing season, and you shouldn't lose any fruit to this physiological condition.

A final word of advice from the vegetable specialist: we've had an unusually cold Spring and some people have lost plants they set out or started early. Orzolek says not to get discouraged if you have to replant. There's still ample time to enjoy a bountiful harvest. The growing season has just begun.

Plant toured

HATFIELD – The Penn Manor FFA visited the Hatfield Packing Co. recently, seeing the slaughtering of the aminals and the producing of the products made. Ninety students participated in the trip.

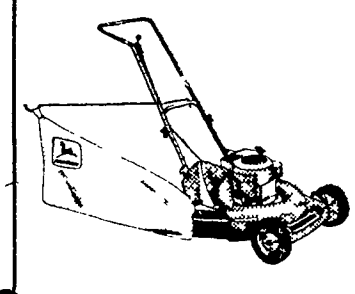
The students were shown how the hogs were turned into bacon and sausage. The sausage made at the plant is sent each week to stores, schools, and restaurants.



8-hp Rider with rear bagger

The John Deere 68 Rider is "human engineered" for comfort, safety, and quiet performance A grass bagging attachment mounts behind the rider where it's out of the way for close-in trimming The 30-inch mower has a deep tunnel for good lift and strong discharge of grass clippings

Push-Type Mowers



Three models—an 18-inch trimming mower and 18- and 20-inch regular mowers The 18-inch mowers have 3 hp, the 20-inch, 3½ hp Contoured steel deck Optional grass bag for regular mowers

First Penn National State Fair opens Friday

GRANTVILLE – It's now just a matter of a few days before the big top is raised for the Penn National State Fair as it begins its 10-day run on Friday, May 26 thru Sunday June 4.

The actual location of the fair is on 42-acres of land adjacent to Penn National Race Course near here at Exit 28 off of Interstate 81.

There will be exhibit areas for farm machinery and implements, as well as a barnyard area which will house all manner of domestic animals. Following this is the 4-H and Future Farmers of America area. Next is the commercial and industrial exhibit area, where exhibitors will display for the purpose of sale and marketing research new products of some of our country's leading companies, as well as Penn's Agri-Women will sponsor the barnyard during the fair. (See separate story elsewhere in this issue.)

The tent display will feature a variety of farm and barnyard animals, as well as educational agriculture displays.

The family-style fair will feature the James E. Strates Show, an NTPA Sanctioned National Tractor Pull contests offering over $24,000 in prizes monies, Joie Chitwood's Automobile Thrill Show and a Professional All-American Rodeo.

In addition to thoroughbred horse racing the fair will be highlighted by entertainment provided by country and western star Johnny Paycheck, Vic Genre and the Stone Mansion Band, the gospel singing of the Thrasher Brothers and the U.S. Navy Band "Country Current."

An added feature of the fair, which opens at 3:00 p.m. on weekdays and 12 noon on weekends and holidays is that there is no admission charge.

This year's Penn National State Fair is the first ever, and plans are being made to have one every year hereafter. "We have wonderful plans for it," says Dick Hargraves, who is in charge of directing and organizing the activities.

This year, for example, more than 500 linear feet of exhibit space will be devoted to the exposition of agricultural equipment. In future years that may be expanded.

"We sincerely feel that 1979 will have a fair share of animal shows and larger displays of the domestic arts," Hargraves explained. "We're working with all we have to prove we're here to stay. We're designing an old fashioned family fair in every sense of the word," he concluded.

Following is a detailed schedule of events and activities at the first ever Penn National State Fair.

Friday, May 26, 1978
High School Band and Grads. Day

3:00 p.m. Official Opening Ceremonies James E. Strates Show Open, Exhibits Open.

3:15 - 5:00 p.m. Penn National High School Band Festival.

7:00 p.m. Johnny Paycheck Show - Grandstand.

7:30 p.m. Thoroughbred Horse Racing - Clubhouse.

9:00 p.m. Johnny Paycheck Show - Grandstand.

Saturday, May 27
Grange Day

12 noon James E. Strates Show Open, Exhibits Open.

12 - 3:00 p.m. Penn State Grange Talent Contest, Festival - Grandstand.

5:00 p.m. Gospel and Country Showcase - Grandstand; A. Thrasher Brothers, B. Vic. Genre & Stone Mansion Band.

7:30 p.m. Thoroughbred Horse Racing - Clubhouse.

8:00 p.m. Gospel and County Showcase.

Sunday, May 28

Massey-Ferguson to sponsor FFA award

DES MOINES, Iowa – A memorandum of understanding has been signed between the National FFA Foundation, Inc., and Massey-Ferguson Inc., for sponsorship of the Future Farmers of America crop production proficiency award. The agreement was signed at Massey-Ferguson headquarters in Des Moines by Massey-Ferguson Vice President Glenn A. Christians and National FFA Program Specialist Robert Seefeldt.

The crop production proficiency award is one of 22 FFA proficiency award programs that recognizes outstanding achievement leading to careers in agriculture/agribusiness. The award is presented at local, state, and national levels to FFA members who complete a supervised experience program in crop production as part of their vocational education.

Citing the importance of encouraging young people to become more involved in food production and distribution, Glenn A. Christians, Massey-Ferguson vice president marketing services, said, "We are especially proud to become sponsors of this FFA award. We certainly appreciate the critical need to expand food and fiber production in the years ahead.

"The young people of today will be the farmers and agribusiness men and women of tomorrow. We salute the Future Farmers of America organization for the educational opportunities, practical experience, and encouragement they give to these most important young people."

The FFA crop production proficiency award program is designed to encourage vocational agriculture students to explore career opportunities in the crops industry through classroom study and practical application of classroom knowledge.

As sponsors of the FFA crop production proficiency award, Massey-Ferguson will provide funds for the 1978 award program of medals, certificates, plaques and cash awards.

Awards in crop production are presented at the local level in the form of a medal and a certificate. Each state winner receives a plaque and a check for $100. The state winner competes for recognition in each of the four FFA administrative regions, where the regional winner earns a check for $250, a plaque and travel money to attend the National FFA Convention in Kansas City, Mo.

Regional award winners compete against winners from each of the three other regions and the national winner is selected by a panel of judges from education and industry. During the National FFA Convention, a plaque and a check for $500 is presented to the regional winner judged to have made the most progress toward a career in the crops production field.

Cattle market

(Continued from Page 1)

nesday's market at Lancaster went to $61.10. New Holland Sales Stables had 73 head selling above $60 on Thursday.

Current prices are some $25 per hundredweight higher than the low recorded in February of 1975. Fed steers at that time were only bringing $34 per hundredweight.

Dwindling cattle numbers are the result of low prices of months and years past, feed shortages, drought, and the economy in general.

Grocery store and meat market advertising reflect the rise in cattle prices. For example, a round roast advertised by a Lancaster County store for $1.19 per pound in mid-January of this year is now being advertised for $1.89 per pound. Most butchers, while granting that farmers needed a price hike, are having a time of it trying to keep prices attractive enough for consumers. Their advice a few months ago was to "fill your freezer with beef now." All that was changed with the higher prices.

According to a recent report by the United States Department of Agriculture, here is what farmers can look forward to in the months ahead:

Livestock and meat prices will continue rising during 1978. Upward price pressures are suggested by prospects for only a slight increase in hog slaughter, smaller beef supplies, and continued strong consumer demand for meat. Supplies of poultry will expand, but prices will follow the trend of other meats.

Although the composite retail price of pork averaged 13 per cent above a year earlier in the first quarter, recent increases in hog prices have not been fully reflected at the supermarket. For the year, retail pork prices may average a tenth higher or more with per capita supplies up only slightly. Live hog prices are expected to average $5 to $7 per 100 pounds higher than 1977's $41.

The composite retail price of Choice beef also rose sharply during the first quarter, averaging more than 10 per cent above a year ago. For the year, beef consumption may fall to around 120 pounds per person, compared with over 125 pounds last year. The annual increase in retail beef prices may exceed 12 per cent. Slaughter steer prices may rise by a greater percentage than retail prices, with some tightening of marketing spreads likely. Choice slaughter steers may average in the high $40's for the year.

Pork production in 1978 may be up only 2 to 3 per cent – somewhat lower than earlier expectations. First quarter pork production ran slightly below a year earlier. However, a 2- to 4-per cent increase in pork output this spring and summer seems likely based on the March 1 inventory of market hogs. Fourth quarter hog slaughter could be about the same or slightly above that of last fall.

On March 1, the breeding herd was down 1 per cent. Current profits from hog production would suggest an expansion in June-August farrowings. But, on March 1, hog producers reported intentions to farrow 2 per cent fewer sows this summer. Sows and gilts which farrow this summer are bred from February through April. Thus, producers could modify their March 1 intentions during the breeding season.

Beef production for the year may be 3 to 5 per cent less than in 1977. Combined with the slight increase in pork output and the expected expansion in poultry, total red meat and poultry supplies for 1978 are expected to be about unchanged from last year.

Cattle feeders continue to draw on the 9 per cent smaller January 1 supply of feeder cattle. With a favorable steer-corn price ratio, cattle feeders have bid feeder cattle prices sharply higher. Feedlot placements during the winter may have been about 10 percent larger than a year earlier. Marketings may have been around 5 per cent larger as cattle continued to be marketed with minimum finish.

Fed marketings this Spring may be up 6 to 8 per cent from a year ago. Slaughter of grass-fed steers and heifers could be reduced a third. Beef production for the first half may be down about 2 per cent.

The total cattle and calves inventory will drop again this year—perhaps by about 3 million head. And this will be the fourth year of declining inventory of cows. Feeder cattle sales data suggest continued heavy movement of heifers into feedlots. In addition, there are fewer animals on farms intended for beef cow replacements, and cow slaughter, though it may be down about a fifth from last year, will still be relatively large in relation to the number of cows on farms.

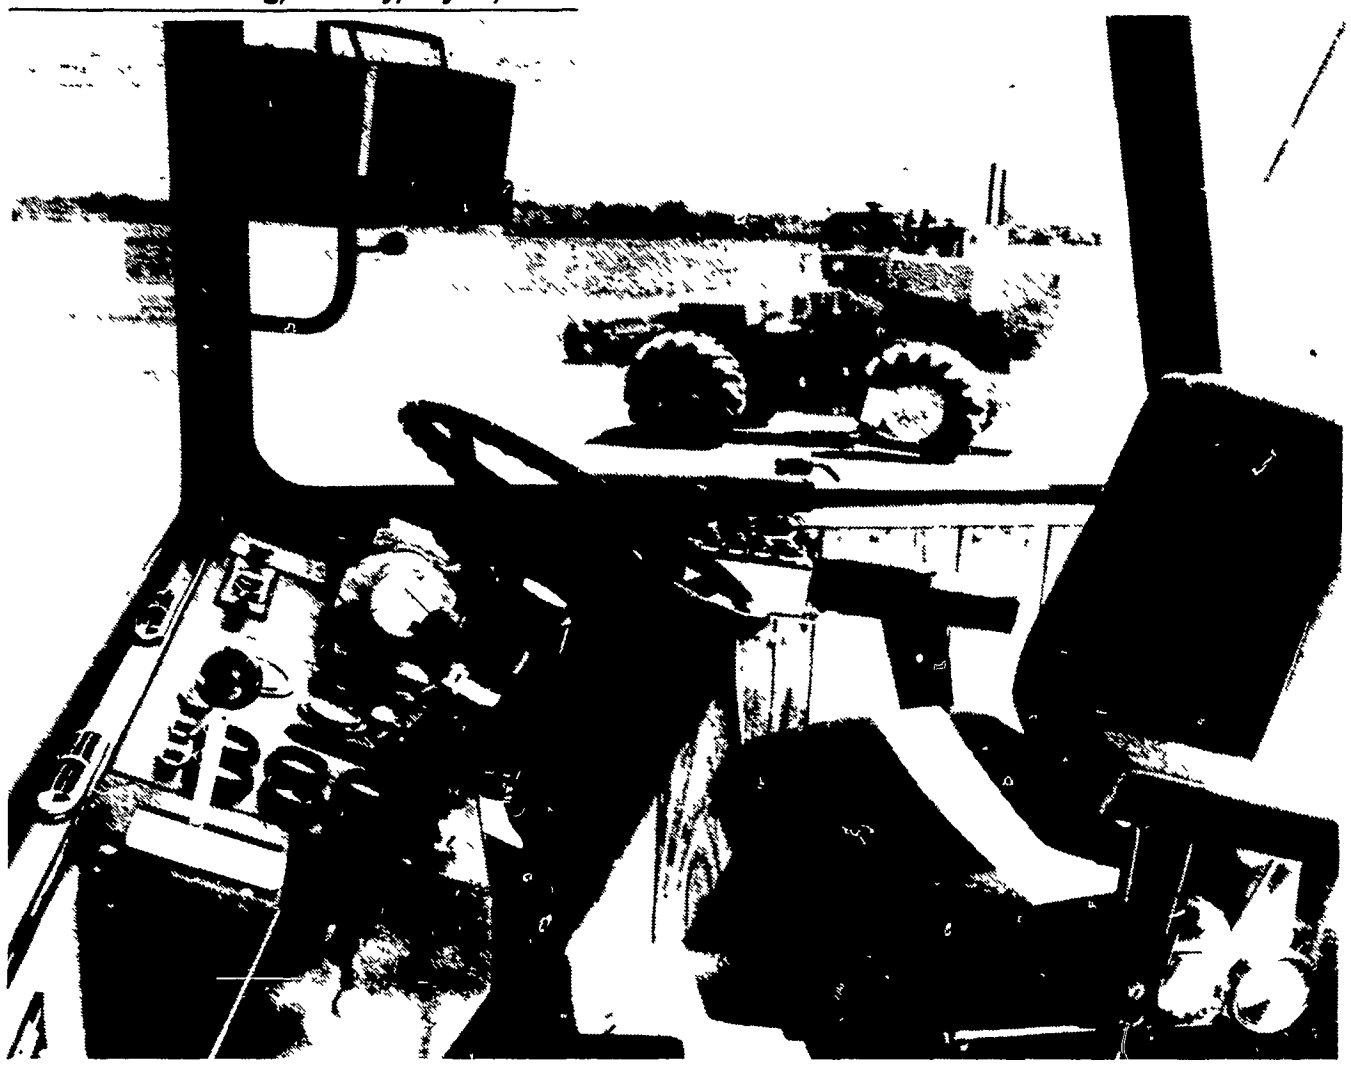
When Illinois farmer, Elmo Meiners, searched for a really big tractor a couple years ago, the biggest he could find was a 10-foot tall, 10-ton model powered by a 219-horsepower engine. He was miffed at what the manufacturer's considered "big." Meiner wanted what might be considered a cross between a Rolls-Royce and a Caterpillar. "If you want an odd ball machine that big and that fancy, you go see those crazy people in Texas," he was told. Woods and Copeland accepted the challenge and built him this 19-ton, 600-horsepower behemoth which is equipped with a color television, refrigerator, automatic transmission, leather upholstery, pecan paneling, stereo sound system, and much more.



Built at a cost of $105,000 in late 1975, the custom-built 600-horsepower tractor Elmo Meiners wanted -- and got -- is one of a kind. The Woods and Copeland Company hasn't built any like it since and is limiting options due to production requirements. A refrigerator is still available in models being built today, but the color television is not offered. In 1977 Woods and Copeland built 48 huge tractors -- ranging in horsepower from 375 to 475 -- and finished tractors have buyers even before they leave the plant.

19-ton

(Continued from Page 18)

of the machine he wanted were outside the scope of their company. Among the special features included in the one-of-a-kind machine are pecan paneling in the air conditioned cab; a color television receiver; AM&FM stereo receiver; 8-track tape deck; tilting steering wheel, a limousine-style buddy seat for a passenger; leather upholstered operator's chair, and a refrigerator for lunch and refreshments. The cab has been specially treated to reduce noise, and measurements indicate that the noise level in the cab is about equal to that in a family sedan running on the highway with air conditioning in operation.

Standing more than 14 feet tall from ground to cab top, the custom built tractor measures 20 feet long and almost 14 feet wide. A "hinge" between front and rear wheels allows tight turns in restricted areas. Total weight of the tractor is 19 tons, and its fuel tank holds 255 gallons, enough for about 10 hours of running. Steering and brakes are all hydraulic, and its full powershift transmission is the farmer's equivalent of the automatic transmission in modern passenger cars. With 12 forward speeds, the top speed of this agricultural giant is almost 25 miles an hour, and minimum speed is less than two miles an hour.

Woods & Copeland has specialized in the manufacture of 4-wheel drive high horsepower rubber tired farming tractors since 1970. Standard production models offered by the firm are the Model 320-C (320 horsepower) and the Model 450-C (450 horsepower). Their tractors are in use in large scale farming in several states, and in a major agricultural project on the Amazon River in Brazil.

When one thinks about the shift to four-wheel drive tractors, one has to wonder about what the future holds. Already these monsters are rated at 450 horsepower with some on the drawing boards as high as 600. They have eight big tires, as tall as a man, that individually cost about as much as a small tractor used to cost in the early days of farming.

ALL DAY CONVENTION

PLACE Blue Ball Fire Hall, Blue Ball, Lancaster Co , Pa , Intersection of Rt 322 & Rt 23 15 miles east of Lancaster
9 00 A M - The Perma Caps Guard story by John Mullin, Jenkintown, Pa Perma-Guard kills insects, stomach worms, lice, fleas, flies, roaches, termites etc mechanically It is not a poison but is safe to use in kitchens Same company makes a very outstanding grease trap and drain line cleaner & septic tank activator Mr Mullin's sales are growing fast with schools, hospitals, restaurants etc because it really works No more clogged plumbing
10 00 A M. - The natural mineral NATURMIN M42G out of a mine in Oregon, and XTRA FACTORS vitamin story The Xtra Factors company at Ephrata blended them together to match the farmers feed analysis John Riley of Western Pa , a long time feed dealer has found the combination to really work He will tell his experience at this hour followed by the Xtra Factors feed specialist who will speak about the relationship of healthy soil, healthy crops and healthy consumers He said he could give a lengthy talk but will give his best in his alloted time
1 00 P.M - The AGRISPON story by the company president and a few users Agrispon is a soil inoculant which supplies life to the soil in the form of micro-organisms, fungi, algae and bacteria which draw enough nitrogen out of the air to produce a heavy crop and release phosphorus, pot ash and minerals likewise We think it is one of the greatest things that ever hit the farmers market and only costs $6.50 an acre Much more could be written about it, by all means come to the meeting to hear about it A gal does 10 acres We mail it for $65 plus $1 for postage
2 45 P M - The SOIL CONDITIONER presentation by the company president and the state representative Pictures and demonstrations will be shown how it changes the soils structure quickly, even in the hour of the presentation Proof is piling up in this area of breaking hard pan and subsoil, releasing the water in swamps, pulverizing clay banks and making the whole field easier to work and more water absorbing for a drought One reported a good crop of soybeans in a drought while his neighbor got hardly any One reported he can plow a gear higher
4 00 P M - A VEGETABLE growers and buyers meeting to make plans for a better market system in Lancaster Co where there are many small farms with large families who should be growing vegetables and fruit for the Northeastern cities so they have the practice and market connections (the ball rolling) when the soon coming severity comes which could come suddenly from various reasons - weather, crop diseases, picking crew & truck strikes, oil embargo etc We invite organic & regular produce buyers to be present at this meeting All farmers that want to grow should surely be present so the buyers can know the potential production, whether it is worth coming for it or not -Sometimes silence is golden but not always
6 45 P M - A FERTRELL all natural fertilizer presentation why it gives so good results and why the sales are multiplying each year, necessitating a larger manufacturing plant immediately Rufus Miller, the president of Natural Development Co which makes Fertrell will be the speaker He may also talk about their vitamin & mineral nutri balancers if he has time
7 45 P M - The AGRISPON story repeated It is so important and precious that we want you to have a choice of hours If you can't be at the one, you can come to the other session
DEALERS WANTED FOR OTHER COUNTIES AND STATES.
There will be energy saving exhibits wind generators, solar system installations and very inexpensive solar food dryers etc We try to have a very comprehensive economy products program Also fertilizer spreading & natural spraying by our associate Dan Fisher

Penn State comes up with new canning methods

By JOYCE BUPP
Staff correspondent

STATE COLLEGE – If you're a home canner who follows recommended procedures, uses standard food preserving jars and processes for adequate lengths, chances are that you'll serve your family high quality preserved foods with little waste to spoilage.

That's a capsule summary of research undertaken in the kitchens of Penn State's Borland Laboratory, under the direction of Dr. Gerald Khun, Extension food technologist at the University's College of Agriculture.

Dr. Kuhn and his graduate assistant, Mary Kieth, depicted food canning comparisons with slides and samples for guests attending last Tuesday's "News Day" at Penn State.

Studies at the lab have centered on ways to improve Extension assistance to home canners who are looking for safe and efficient methods of preserving food while retaining maximum food values for their families' diet.

Sealing problems led the testers to experiment with the wide variety of new lids on the market. Two types that regularly performed well were a one-piece "Klik-It" unit and "Harvest Time," a two-piece ring and lid made of aluminum.

No plastic lids were found to be satisfactory in the rigorous testing. Centers tended to bulge up, pulling the sides of the screw-down bands up along with them. Bands deformed in this manner will not fasten the lid securely to the jar top and become useless for sealing.

All three-piece lids, which include a band, metal disk and separate gasket, also failed the kitchen tests. Seven of the 22 brands checked last year caused seal failures of over five per cent; these findings were reported to the product manufacturers.

The home canning research also branched out into studies on the effects of different processing methods on the amounts of Vitamin C retained in the finished product.

For the study, both chunk apples and applesauce were used. Using United States Department of Agriculture recommended procedures, the apple products were prepared in standard pint jars using two-piece aluminum lids.

Some apples were packed raw and other were packed after heating. Different amounts of headspace were allowed in the jars and some were processed in boiling water baths while others went through pressure canning.

To assess the effects of storage methods, some jars were then stored in the light and some in dark rooms. Storage of some was at 50 degrees and others were kept in areas where the temperature reached 85 degrees.

After data on all the jars was collected and compared, the results pointed to highest amounts of Vitamin C being retained with apples that had been processed in a pressure cooker, allowing double the normal recommended head space. The researchers theorize that the extra head space allowed the food to expand to full capacity during the canning process, thus forcing out the maximum amounts of air that remained in the jar during storage.

Raw pack apples retained their Vitamin C content to a higher level than the hot pack tested samples. Apparently oxygen stirred into the fruits during the pre-heating period destroyed Vitamin C levels before the apple products were even packed into the jars.

Storage temperatures, at least up to the three-month check period, did not seem to greatly affect Vitamin C content. Jars of food stored in the light was found to discolor and darken more rapidly than comparable ones stores in dark areas, but Vitamin C levels were not significantly changed.

Jones re-elected to UDIA board

ROSEMONT, Ill. – Lester C. Jones, Medford, N.J. was re-elected to the board of directors of United Dairy Industry Association (UDIA) at the organization's seventh annual meeting held recently in Dearborn, Mi. He was also re-elected first vice chairman of National Dairy Council (NDC).

Jones plays an active leadership role in the industry, holding offices in a number of dairy organizations. He is president of Interstate Milk Producer's Co-op; chairman of Federal Marketing Order 4's advertising and promotion agency; president of Dairy Council Inc. in Southampton, Pa.; and past president of the New Jersey State Board of Agriculture. He is also president of Atlantic Dairy Association, a regional member organization of UDIA.

The UDIA board member owns and operates a 900-acre dairy farm in partnership with his son Lester, Jr. The farm includes a herd of 700 Holsteins; major crops are corn, alfalfa and barley.

UDIA, an industry financed and directed organization, promotes the sale of U.S. produced milk and dairy products. Activities include the advertising and marketing services of American Dairy Association (ADA), the product and process research and development work of Dairy Research Inc. and the nutrition research and education programs of NDC.

Locust swarms are being reported on the Horn of Africa with some officials believing locust numbers may be approaching the size recorded in Biblical accounts of Egypt's eighth plague of antiquity.

Area egg processor subject of consumer film

By JOANNE SPAHR

PARADISE – Robert Trout, his mother, and two sisters always knew their family-run egg processing business was special – at least to them. But, just recently they had the pleasure of finding out that someone else thought a lot of it, as well. In fact, this person went so far as to make it the subject of a radio/television program which will be nationally syndicated and shown in such cities as Los Angeles, St. Louis, Dallas, and Jackson, Miss.

That person was Gene Crane, television personality with WCAU TV in Philadelphia. Two weeks ago Crane, his wife, and a video tape crew made a trek to the quaint town of Paradise, Pa. specifically to study the E. Roy Trout & Son, Inc., company and to make a two minute tape of egg processing.

"This has nothing to do with Acme Markets or with WCAU," Crane stated in an interview conducted prior to taping. Instead, the film is a consumer affairs program produced and syndicated by Alcare Communications, Wayne, Pa. for which Crane works on a free lance basis. crane researches, writes, and produces consumer oriented programs which are two minutes long each.

However, even though the programs are only a few minutes long, the time involved in producing them can amount to as much as a whole day.

In the case of Trout Eggs, Crane spent from about 10:30 a.m. to noon taping the program. His specific area of interest was processing, only. He and his two-man crew taped the procedure of washing, drying, inspecting, sizing and packaging eggs on the line.

Out of sight, behind the cameras, Crane threw questions at Robert Trout concerning the procedures involved in processing a case of eggs in one minute. Trout, standing midst egg processing equipment, fielded questions that dealt with ounces, weight, sizes, and quality of eggs as well as the differences between brown and white eggs. During this question and answer period, the camera was trained on the family businessman.

Getting ready to begin taping are (left to right) two members of Crane's camera crew, Robert Trout, and Gene Crane.

Robert Trout gets wired for sound by one of the camera crew.

While the taping was taking place, the camera crew monitored their portable color closed circuit television set. At one point a piece of machinery created an interference, and part of the show was reshot.

Trout, unrattled by the duplication, patiently repeated his answers.

The whole time the taping was going on, Trout's sisters, Mrs. Clara Rineer and Mrs. Helen Beecher, who also are part of the business, gave support from behind the scenes. Trout's mother, Mrs. Flossie Trout, Paradise R2, is a fourth member in this family-run business.

According to Crane, the purpose of the film he was making at the Trout operation was to teach consumers about the grading of eggs. He had gotten the idea from his wife, who, in their travels, had taken notice that egg cartons contained eggs of different sizes, and had wondered about the variance and how much is actually permitted.

Once he had the idea, Crane began scouting around for an egg processing plant he could work with. He came up with the Trout business when an outlet store manager who handles Trout eggs in Upper Darby, gave Crane the family's name.

Needless to say, the Trouts were "delighted" at the prospect of Crane coming to their business. Along with giving Crane full cooperation, they also bought him a hand painted picture created by a local artist and took Crane and his wife and crew to dinner at Harvest Drive Farm Motel and Restaurant.

Plus, during the taping session, nobody went hungry since Trouts handed out "eggs on a stick" to everyone who cared to indulge. An egg on a stick is a product Trout sells at their outlet stand at Bird-In-Hand market. The delicacies consists of a red beet egg or "Golden egg" on a stick.

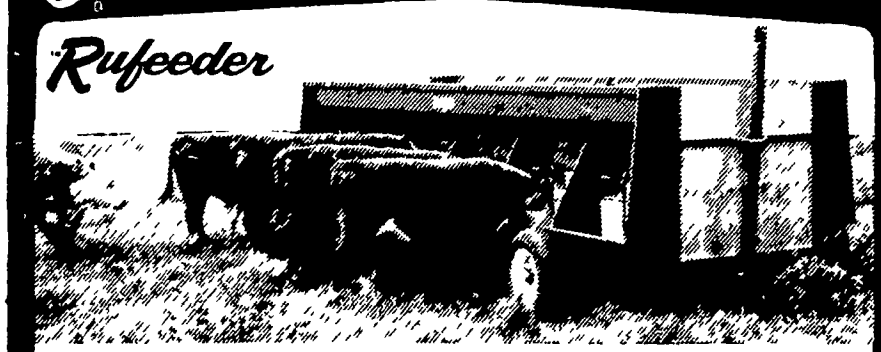
"They weren't used to this special treatment," noted Trout. "But, I just told them it was normal for Pennsylvania Dutch Country."

The Trout family business has been in operation for 50 years and in that time has won awards including the NEPPCO award, best of show in 1977. They are also Farm Show award winners.

Unfortunately, Pennsylvanias living in the southeastern part of the Commonwealth may not get to see the film featuring this company since it will not be aired in Philadelphia.

Feterl has a better way to feed roughage.

Rufeeder



Designed for all types of roughage. It is ideal for silage, baled hay, cubed hay, ground hay, field green chopping and chaff. The new RUFEEDER is 20 feet long, and on a free choice basis can handle approximately 70 head ●Feed capacity—375 cubic feet ●Mounted on special low profile heavy-duty gear. BROCK®

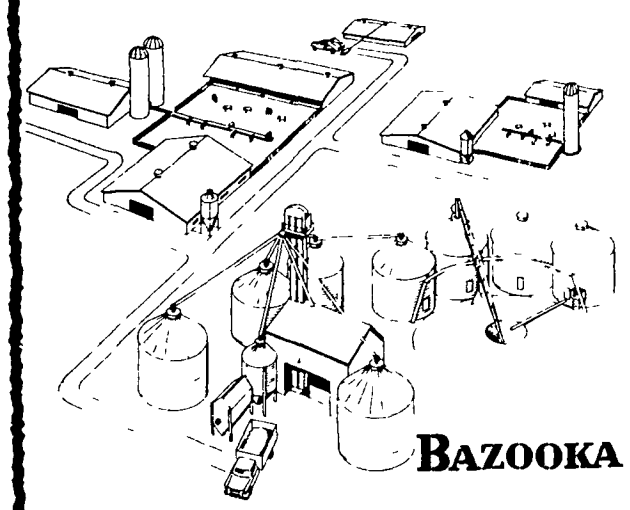
Brock grain bins are famous for their strength, durability and good looks. But with Brock you'll get far more than just a great grain bin.

You'll get a great dealer. A grain storage expert who can help you with system planning, financing, and installation.

That's why they chose us to be a qualified Brock dealer. And that's why you should see us today. We have a grain storage and handling system to meet all your needs.

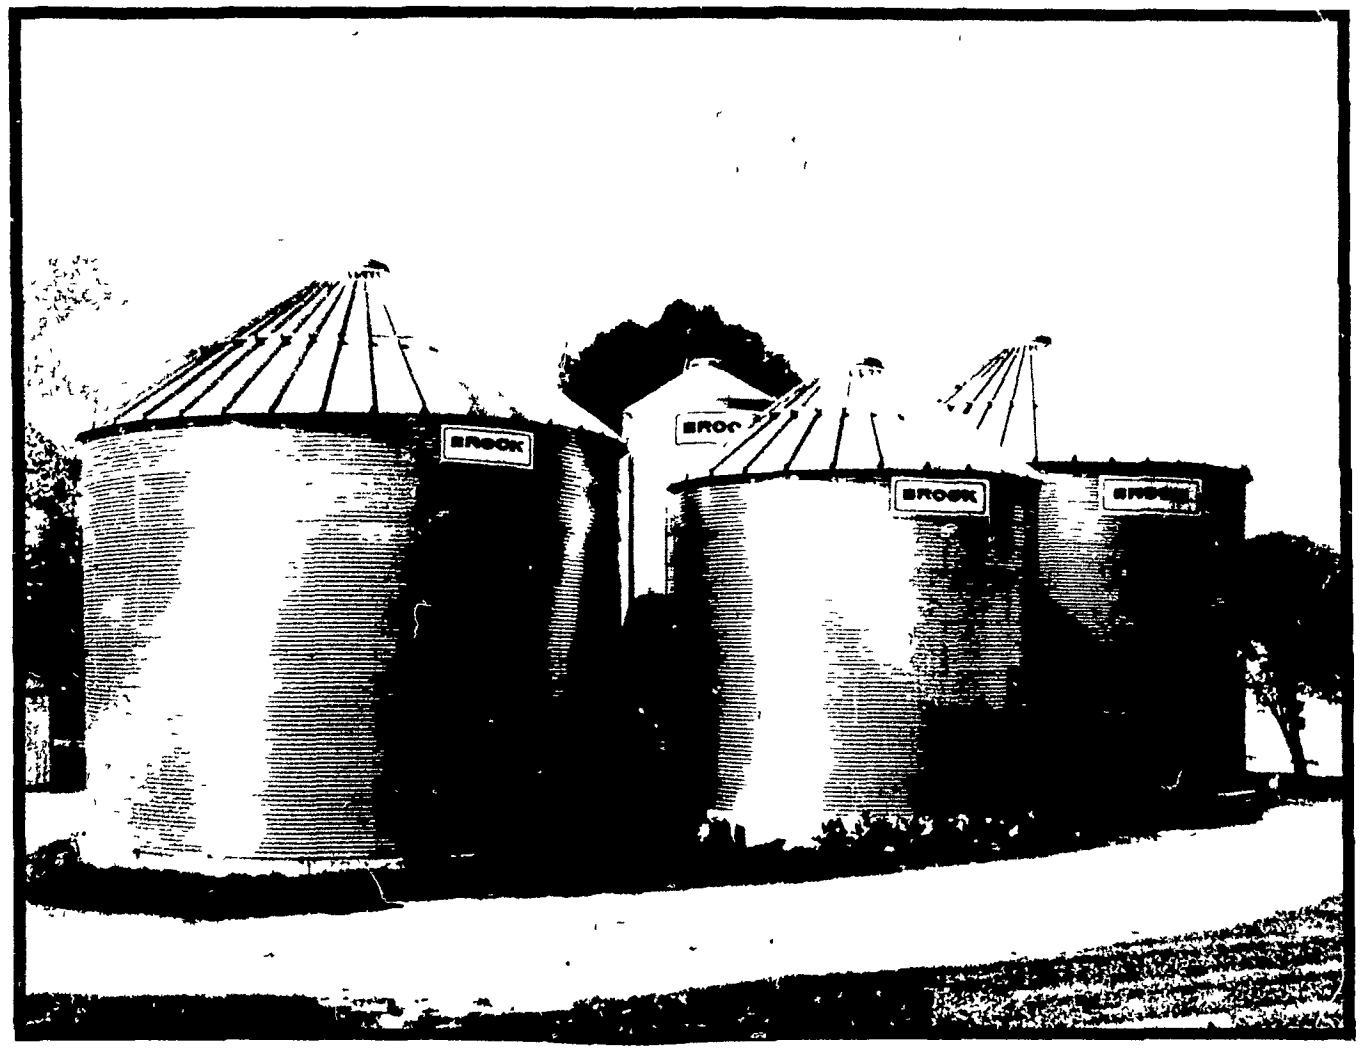


We'll help you put it together

Tell us what you need, and we'll design and install a complete new system for you, or modernize your present set-up.

Bazooka augers and U-trough conveyors keep your systems going longer . . . smoother . . . safer.

TWO OF THE VERY BEST IN FARM STORAGE



YOU CAN BE SURE THE SYSTEM WE DESIGN WILL STORE AND MOVE YOUR GRAIN SAFELY .... AND FOR A LONG, LONG TIME

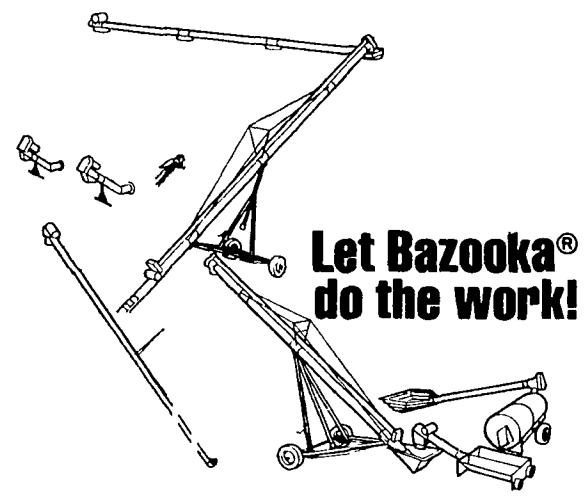
the Centerville Exit

BAZOOKA®
GRAIN MOVING SYSTEMS

Components that move grain can be as important as the storage bins or drying bins you choose. Augers are the heart of your system because they do the work . . . keep you going during the busy harvest time.

Bazooka augers are long lasting and smooth running. You have a wide choice of capacities, accessories and drives. You can also expand any Bazooka system with a minimum of expense.



Let Bazooka® do the work!

BAZOOKA transport augers have chrome-plated intake flighting that doubles its life, a galvanized drive shaft that reduces maintenance time, and permanently lubricated, precision machined chain reducer drive with cast iron housing Plus many other timesaving, convenience and safety features

BAZOOKA transfer augers have important differences at the drive end, like heavy duty thrust bearings, machined, cast iron sheaves, and easily adjusted motor mounts supported equally on all four corners

BAZOOKA sweeps and unloading augers can make quick work of emptying out a bin Portable types can be moved from one bin to another while permanent types are driven by powerheads located outside the bin

BAZOOKA Grainclean'r is a rotary type scalper/cleaner with a built in fines collector

Runoff, flooding topics of legislation

(Continued from Page 1)

water management plan for each watershed in the county as designated by DER, in consultation with included municipalities. This plan must be reviewed and revised every five years.

The counties are also required to establish a watershed plan advisory committee containing at least one representative from each municipality in the watershed along with an individual from the county soil and water conservation district and other agencies or necessary groups. This committee is then responsible for advising the county, evaluating policy and project alternatives, coordinating the plan with municipal plans, and reviewing the plan prior to adoption.

The Department of Environmental Resources, in consultation with the Department of Community Affairs, will review and approve all the watershed storm plans, revisions, and amendments. Decisions may be appealed to the Environmental Hearing Board.

Municipalities will be required to adopt or amend their ordinances and regulations to conform with the plan for their watershed and this Act. If they fail to do so, after appropriate warnings, the DER has the authority to notify the State Treasurer to withhold payment of all funds payable to the municipality and hold them in escrow until the municipality complies.

Under this bill DER also has the authority to mandate joint plans for affected counties when a watershed lies in more than one county; take such other actions as may be necessary and appropriate to coordinate storm water planning; publish guidelines for storm water management and model ordinances; and to serve as the Commonwealth agency for receipt of federal funds and expend them for storm water studies and research.

Commenting on this bill, Henry Hackman, consultant for the Lancaster County Conservation District, notes that, up to this point, there has never been any legislation similar to this.

"The Clean Streams Law only deals with erosion and sedimentation and not the run off of water. As long as a person desilts the water before it runs off his premises, he's fine. But, there is no legislative law on storm water control--nothing," he says.

Hackman did go onto say that there is a civil law taken out of the Pennsylvania Encyclopedia of Law which says no one can bring water to a point source and discharge it only another person's land.

Hackman is greatly enthusiastic about the present Senate bill, since he views this legislation as a preventative measure.

"With the civil law you must wait for the problem to be created, but with legislation you can prevent the problem from happening," he points out.

Chet Heim, lobbyist for the Pennsylvania Farmers Association, says much the same thing. He's seen the problems of agricultural land being devastated by run-off and wants to stop the problem before it starts. Because of this, PFA supports Senate Bill 744.

Charles Wismer, Trappe, legislative chairman for the State Grange, has a personal problem with storm water run off. He will be building a waterway this Summer because development around him is sending water into his fields.

"That bill, as we see it, has to do with new developments and not allowing them to send stormwater into the farmland. The developer must control the water. That experience is really close to me." Wismer has spoken in support of the bill on several occasions.

Senate Bill 743 is also seen as important to farmers. In its provisions it:

1. Gives the Department of Community Affairs, in conjunction with the Department of Environmental Resources, the power to review and approve all municipal flood plain management regulations and amendments.

2. The Department of Community Affairs could adopt regulations and standards for uniform enforcement of municipal flood plain management regulations and municipalities would be required to comply with department regulations within six months.

3. The regulations issued by the Department of Community Affairs would prohibit the subdivision of property located within a designated flood hazard area under certain conditions.

4. The regulations by the Department of Community Affairs would also prohibit any construction in the flood plain if the same structure could be built in an area safe from flooding.

5. Regulations by the Department of Community Affairs would also prohibit the construction of any structure in an area identified as a flood hazard area on a flood insurance rate map promulgated by the Department of Housing and Urban Development.

6. No person would be permitted to construct any structure in the one hundred year flood plain unless applying and obtaining a permit to do so from the Department of Environmental Resources.

7. The Department of Environmental Resources would have exculsive jurisdiction to regulate any flood control project constructed, owned, or maintained by a local government in the Commonwealth.

8. The Department of Community Affairs and the Department of Environmental Resources would have the power and responsibility to require the submission of municipal flood plain management regulations, municipal records and reports to them for review.

9. These departments would also be empowered to investigate complaints and conduct surveys of flood plains, institute prosecutions and civil enforcement proceedings, establish permit fees and enter land or any structures in a flood plain to ascertain compliance with the flood plain management regulations.

In remarks referring to this bill, Henry Hackman states that while there is a legislative law, Public Law 555, which pertains to flood plain management, that law only goes so far as to say that development can't encroach upon the stream channel.

"There has been no law up to now which deals directly with flood plain management," he says.

Chet Heim states that PFA supports Senate Bill 743 because, "We don't think people should continue building in flood plain areas only to go for disaster funds to bail them out."

Heim also stated that in the bill there are exemptions for farming in the flood plain areas. The bill does not allow for new buildings, but the farmer can continue to work his fields and even put up fences. However, no structure, per se, can be erected, unless by regulation, although existing buildings don't have to be torn down.

Food industry needs petroleum

UNIVERSITY PARK – Petroleum supplied 61 per cent of all fuel used by the food industries in Pennsylvania during 1977, a survey made by Thomas E. Gesell of Penn State has disclosed. Gesell sampled the energy consumption patterns of the nearly 2,000 food manufacturing and food processing firms in the Commonwealth.

Heavy reliance on petroleum was found in industries involving meat and dairy products, bakery goods, and a category termed "all other food industries." The latter group includes sugar and confectionery products, fats and oils, beverages, and miscellaneous foods.

The fruit and vegetable industry was a heavy user of coal, obtaining almost one-half of its total energy from this fuel, it was noted. The grain mill products industry displayed the strongest dependence on natural gas. Grain mills of the Commonwealth derived 60 per cent of their energy needs from gas

Pennsylvania food industries show a stronger reliance on coal than the U S average, a natural result of local supplies It was also found that Pennsylvania firms rely more heavily on petroleum and less on natural gas than is typical for the rest of the nation

for early post-emergence

Banvel®+atrazine

herbicide tank-mix combination kills young, tough broadleafs, vines, grasses before they damage your corn.

Banvel + atrazine together do a broad-spectrum job on weeds resistant to 2 4-D and not controlled by atrazine alone including tough to control foxtails Canada thistle cocklebur smartweed velvetleaf and others
Spray up to 3 weeks after planting when grasses are less than 1-1/2 inches tall
Season-long control usually results when Banvel + atrazine is applied according to label instructions
Order Banvel herbicide plus atrazine today as an important step toward total farm weed control

Leadership school set

HARRISBURG – The 55th annual leadership school of the Pennsylvania State Grange will be held June 20, 21, and 22 at Elizabethtown College at Elizabethtown, in Lancaster County.

Workshops are being planned for Grange leaders, with emphasis on topics of current significance. Departmental workshops also are being planned for the women's activities, junior and youth groups.

Research shows that homemakers use more energy just getting from supermarket shelves and preparing food when they get home than does the farmer producing it.

USDA lowers nitrite level in bacon

By KENDACE BORRY

ELIZABETHTOWN – On Monday, Carol Tucker Foreman, assistant to the Secretary of Agriculture, announced that the final order concerning the use of nitrites in bacon is that within 30 days bacon, brine cured or pumped, must be produced with a maximum of 120 parts per million of sodium nitrite plus 550 parts per million sodim ascorbate or sodium erythorbate. The last two ingredients are to be added to block the formation of nitrosamines.

The USDA also proposed that within one year that levels of sodium nitrite in bacon be reduced to 40 parts per million maximum. An alternative to using sodium nitrite would be the use potassium nitrite which maximum level would be allowed to be 49 parts per million. Also 0.26 per cent of the weight of the bacon would have to be potassium sorbate to prevent the formation of botulism and nitrosamines.

According to Stephen Krut, from the American Association of Meat Processors, Elizabethtown, Pa., there is concern on the part of meat processors over these announcements.

"A lot of people will have to swallow their inventory on hand," he noted. "New supplies will have to be ordered, processing techniques will have to be experimented with, and labels have to be changed on the meat products. More time than 30 days is needed."

"We aren't arguing with the 120 ppm," he continued. "We just need more time. A lot of plants will either have to shut down or operate illegally after June 16."

He went on to state that the American Association of Meat Processors had spoken to officials in the USDA about the time requirements but that they had no said anything about an extension in time.

The meat processors' organization was concerned over the second announcement, too.

"The proposal that potassium sorbate be added to the bacon is kind of scary," Krut continued. "The USDA stated that this proposal will be adopted unless evidence can be shown that it shouldn't. It alarms me that this is an overnight solution, and we're trading a known solution for the problem of botulism for one that may work. I haven't seen any research done on adding potassium sorbate, and no one I've talked to has either."

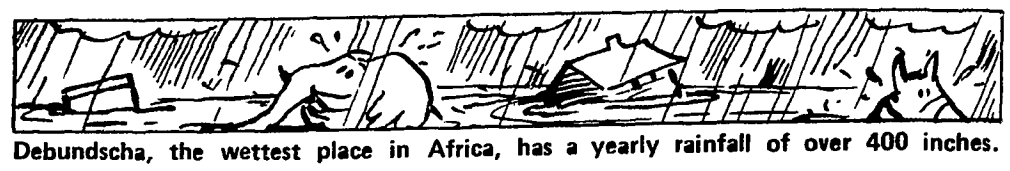
He added that the proposal is open to comments until November 27.

4-H to meet

WITMER – The Conestoga Valley 4-H Sewing Club will reorganize May 25 at 7 p.m. at the Witmer Fire Hall. Any youth from age 8 to 18 is invited to join the group.

Further information of the group is available from leaders Nettie Bare at 717-393-9031, and Mary Strubel, 717-393-1060.

Second meeting of the group is set for June 6 at the fire hall.



Debundscha, the wettest place in Africa, has a yearly rainfall of over 400 inches.

Figure it for yourself.

When you shortchange their nutrition, you shortchange yourself.

Looking for ways to cut on down on out-of-pocket feed costs without cutting down on milk production?

Cutting production costs will backfire if you end up shortchanging your herd's nutrition in the process.

But you can cut those costs safely by feeding homegrown grains and grain silage fortified with the right Vigortone Dairy Pre-Mix. These potent pre-mixes contain the proper levels of vitamins, calcium, phosphorus, and other minerals needed to balance your farm's feedstuffs.

Vigortone Dairy Pre-Mixes can be mixed in or metered on any palatable grain or roughage. This lets you change ration content to fit the supplies you have on hand without risking herd performance.

Better herd nutrition means a bigger milk check. Minimum out-of-pocket feed costs mean more in your pocket.

Your figures will prove it.

Dry cow nutrition pays future profits.

Shortchanging your dry cow's nutrition can be risky too. Most problems dairymen experience in getting cows back in the string can be traced to careless treatment during the dry period.

Keep them in top condition until their next lactation. To help you do it, Vigortone has developed unique dairy pre-mixes specially concentrated for dry cow rations.

Now is the time to compare.

See your Vigortone dealer soon. He's ready to compare the performance of Vigortone's cost-saving dairy feeding programs with any other you name.

Hamburgers may cause cancer

Barry Commoner, of Washington University's Center for the Biology of Natural Systems in St. Louis, has said that the all-American hamburger may cause cancer. Commoner is a leading authority on environmental factors linked to Cancer.

But, warns Commoner, the apparent cancer dangers in hamburgers is confined to those that are griddle fried and is far greater when the hamburgers are well done than when they are rare.

Also, the creation of cancer-causing substances in the burgers during cooking is almost eliminated when they are broiled under a flame or cooked in a microwave oven.

Commoner said that his research team believes that the possible cancer producing agent has nothing to do with beef, itself, or the fat in it, but is linked to a chemical change that occurs in the lean-meat tissue during high-heat cooking.

The team also found cancer-causing substances in several forms of beef extract, including bouillon cubes, beef broth and seasoning base and beef-flavor concentrate. Commoner said the cooking process apparently manufactures the dangerous chemicals and that the degree of cancer danger is directly related to the temperature at which the hamburgers or the beef extract are prepared.

Frying hamburgers by any method produced significant amounts of cancerous chemicals in the meat, Commoner's team found, but the levels in burgers cooked only until they were rare were less than half those of well-done hamburgers.

The team concluded that there is a critical temperature level for hamburger cooking – probably between 300 and 390 degrees Fahrenheit – and that burgers prepared below the critical temperature are safe.

Heisler Bros. top April Schuylkill DHIA

TAMAQUA – The herd of Heisler Brothers, Tamaqua R1, had the highest milkfat in Schuylkill County for the month of April, 1978, according to information released by the Penn State and J. Allan Shoener, County Agent. The herd averaged 2.24 lbs. of milkfat per cow per day.

Second highest milkfat went to Miller & Rex, Inc., Andreas R1, with 2.16 lbs. of milkfat per cow per day. Third in the county was Carl J. Snyder, Pitman R1, with 2.12 lbs. of milkfat per cow per day, and fourth was Bruce Leatherman, Tamaqua R1, with 2.02 lbs. of milkfat per cow per day.

Fourteen cows finished lactation records with 600 lbs. of milkfat in April. The records are based on 305 days or less. two times actual production.

Snow Q, owned by Bruce Leatherman, was high cow with 715 lbs. of milkfat. Carl & Dale Heisler had the second highest cow, 19, with 710 lbs. of milkfat. Third was Pepper, with 696 lbs, owned by Marlin L. Lesher, and fourth was Fobes, with 689 lbs.; owned by Carl J. Snyder.

DICKEY-john®
FARM GRAIN MOISTURE TESTER for CORN

The DICKEY-john Corn Moisture Tester provides an instantaneous digital read-out of the percentage moisture content of corn whether in the field, storage bin, or at the dryer

- Simple and quick
- No dials, gadgets, weights, thermometer or balancing scale needed
- Conversion chart on tester for grains other than corn
- Total elapsed time start to finish 15 seconds
- Design based on what the farmer wants in a grain moisture tester

Pseudorabies vaccine licensed

CHARLES CITY, Iowa. — A new vaccine, a killed-virus product, for swine pseudorabies, has been licensed by the Animal Plant Health Inspection Service, Salsbury Laboratories has announced.

Developed by Salsbury, the new product is the first killed-virus vaccine federally licensed for PRV. PRV is reported to cause losses of up to $26 million per year on the nation's farms.

The killed-virus product permits vaccination of pregnant sows, enabling the dam to pass immunity to the newborn pigs through her colostrum (first milk). Salsbury claims immunity transmitted by the vaccinated sow lasts for several weeks, the critical period when PRV losses are the greatest.

In laboratory tests submitted for government approval of the vaccine, Salsbury showed 83 per cent survival rate in pigs nursing vaccinated sows compared with nearly 100 per cent mortality in pigs nursing sows that had not been vaccinated. All groups of pigs had been challenged with a highly virulent (disease producing) virus. More than 500 sows and 1,000 pigs were used in field trials to determine the safety of the vaccine.

Dale King, Salsbury researcher and head of the firm's biological development, says that pigs—although acquiring passive immunity from their mother—can be successfully vaccinated to extend their protection.

Dr. James Cecil, Salsbury veterinarian and swine specialist, advises that breeding stock should be routinely vaccinated with the killed-virus pseudorabies vaccine. He says pregnant sows or gilts can be safely vaccinated during each pregnancy. If pseudorabies has been reported in the area, we strongly recommend the producer contact his veterinarian immediately, Dr. Cecil said.

The new Salsbury Pseudorabies Vaccine is the result of several years of continuing research to produce a killed-virus product, a safe vaccine for swine of all ages.

More information is available by contacting Salsbury Laboratories, Charles City, Iowa, 50616, phone 515-257-2422.

Protection from pseudorabies now begins with the pigs' first meal. Protective maternal antibodies from the vaccinated sow are passed through the colostrum to provide up to three weeks' protection.

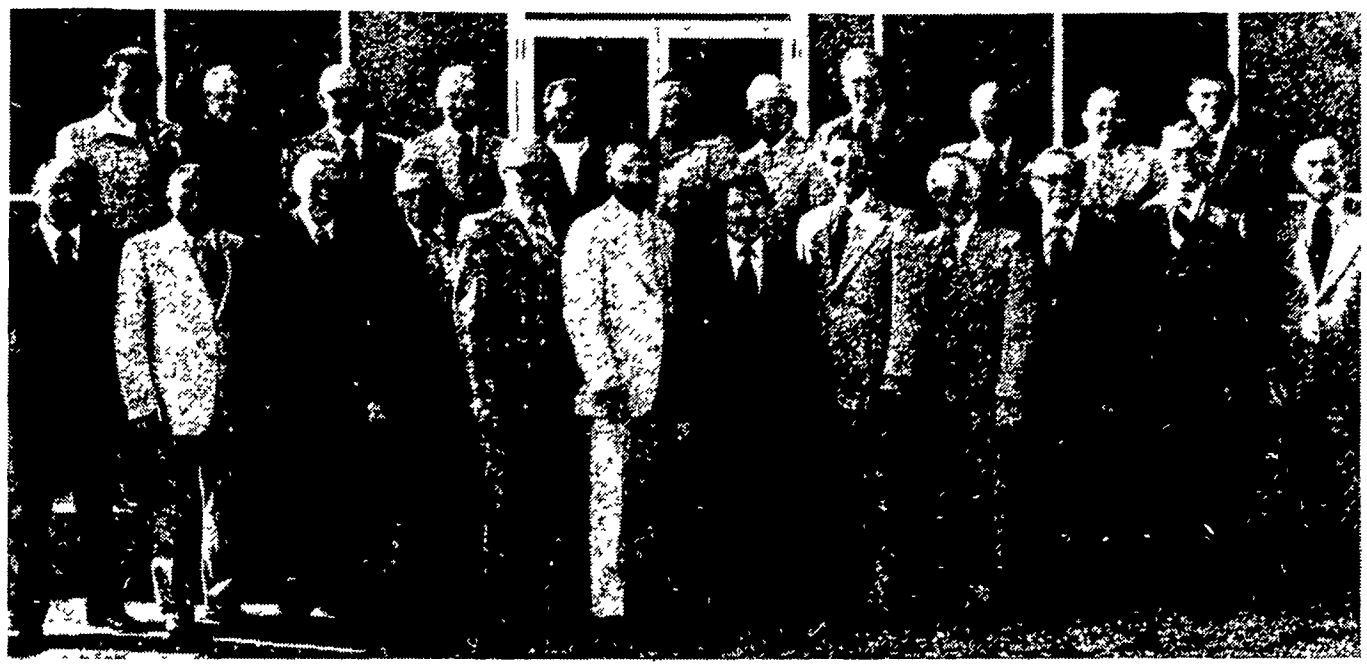
Quality Haymaking Begins Here.



The 18 territory managers honored recently by the Avco New Idea Company are shown with the firm's executives at Coldwater, Ohio. From left to right are: W. J. Coan, director of sales, Archie Sterk, Ralph Bergeland, Larry Stafford, Bob McCormick, Rod Cooper, Gerry Dube, Ralph Schmit, Tom Cooper, Bucky Linde, Don Hoyng, and Robert W. Engle, vice president and general manager. Back Row (left to right): Larry Ferenbaugh, Robert Gauthier, Charlie Ray, Charlie Bowers, Carl Peters, Tom Budde, Hersch Lonacre, A. C. Statton, Bill Mark, John Whalen, and Dave Dunn.

New Idea honors 18

NEFFSVILLE – The Avco New Idea Corporation, headquartered in Coldwater, Ohio, recently awarded charter membership into the company's Territory Managers Council (ANITMC) to 18 of its territory managers, six of whom work in Pennsylvania and adjacent areas.

The six men honored from this area are Bill Mark, Archie Sterk, Larry Stafford, Larry Ferenbaugh, Charlie Bowers, and Dave Dunn.

Initiated early in 1977, the ANITMC was designed to give recognition to the top managers within the company.

The top 18 territory managers in the company – those who accumulate the highest number of points per fiscal year – are honored for outstanding sales and management achievements. Points are awarded individually within several performance categories including wholesale and retail budgets, parts, advertising, dealer development, dealer service school attendance, and field demonstrations.

The regional manager for this area is Tom Cooper.

Store manager named

MANHEIM – Kathy Kopp was recently named store manager for Mccracken's Feed Mill, Inc. Her duties will include ordering and marketing pet supplies and animal health products as well as doing billing and bookkeeping.

Kathy Kopp

The daughter of Mr. and Mrs. Harvey Kopp, Manheim R5, she has worked at McCracken's since July of 1976.

UFW grant denied

WASHINGTON, D.C. – Under pressure from Farm Bureau, U.S. Labor Department now says it never signed contract to give United Farm Workers union $500,000. Government press release and photo of Labor Secretary Marshall with union leader Cesar Chavez were publicized in January. Farm Bureau had threatened lawsuit to force disclosure of grant's details. Labor Department now says negotiations are still taking place. Farm Bureau charges grant means taxpayer is financing farm worker unionization.

Students want farm training

UNIVERSITY PARK – Undergraduate enrollment at Penn State's College of Agriculture is now fifth largest in the nation. From 1970 to 1976 enrollment increased 184 per cent. More students are coming from towns and cities. In 1973, 70 per cent of freshman class were non-rural. Today one-third of ag students are female. Many students want on-farm experience. If you think you can help, contact your county agent for details.

Milk production

(Continued from Page 1)

year ago, and government removals for these commodities have dropped also. What's more, the prices being paid for manufacturing milk is higher than the support price. All this is taken as a sign of improved health for the dairy industry.

Citing figures compiled by the United States Department of Agriculture, York noted that the government support price for Class II milk now stands at $9.21 per hundredweight for milk averaging 3.5 per cent butterfat content. The actual Minnesota (M.-W.) manufacturing price for 3.5 milk stands at $9.24 per hundredweight. An opposite relationship was true the year before when the M-W price was 19 cents below the support level.

York finds the demand for milk stronger now than it was a year ago, which helps explain why M.W. prices are on the top side of the support levels. "This reflects a healthier situation," the veteran milk marketing specialist commented.

Another indicator of better times is a comparison of average blend prices received by producers this year and for the corresponding months in 1977. In Order 4, for example, an increase of 64 cents per hundredweight has been noted for average base milk delivered during the first four months of the year. The Jan. - Apr. 1978 average blend price stands at $10.52 in Order 4, York pointed out. Increases of 61 cents and 50 cents per hundredweight, have been recorded in Federal Orders 1 and 2, respectively. York explained that a major reason for Order 2's lagging behind the others in this price comparison is the fact that Order 2 was amended six months ago. "You should realize that Order 2 prices are zoned at the farm with the 15 cent permissable hauling deduction, while in the other markets the full hauling assessment could be charged against the producers," the LeHi spokesman explained.

York indicated further that if present trends in production and the general economy continue, a 25 cent per hundredweight price hike is likely when new support prices are announced in October. Blend prices will then be in the vicinity of $11 per hundredweight, York continued. The support price for milk containing 3.67 per cent butterfat, (the national average) currently stands at $9.43 per hundredweight, compared to $9.21 per hundredweight of milk testing 3.5 per cent butterfat.

"Milk production in the three major Northeastern states is running above a year ago," York continued. "However," most recent figures indicate that southern Pennsylvania and the Mid Atlantic area has turned the wheel."

Significantly, Joseph D. Shine, market administrator for Federal Order 4, issued a report this week which showed that milk production in Order 4 is down slightly for the second month in a row. Among other reasons, the comparatively high beef prices are thought to be responsible in the favorable turnaround. Dairymen saw fit to cull herds a bit harder than usual while at the same time improving their dairy economy.

Order 2 did not record downward trends in production. Instead, production increased by 23 million pounds in April of this year compared to April 1977. Market administrator Thomas Wilson, who announced statistical information for the Order last week, noted that the total amount of milk received in Order 2 during April was 866,955,167 pounds.

York, in his presentation, noted the need for even production throughout the year since consumption patterns are generally even. Base requirements in Order 4 help to create production volumes suited to marketing demands. Orders 1 and 2, which do not have a base plan, experience significantly higher seasonal production peaks, compared to Order 4.

Pennsylvania's milk production last month was up by one per cent, while that for the nation as a whole was down by one per cent.

To illustrate how production of storable dairy products is down somewhat from a year ago, York cited figures from the U.S. Department of Agriculture. Government removals, of storable dairy products, which have also decreased, were most evident in nonfat dry milk and American cheese. In April 1977, for example, the government purchased 6.6 million pounds of American cheese and 37.3 million pounds of nonfat dry milk. For April of 1978, the respective figures are 1.9 million pounds and 27.6 million pounds. To illustrate further, the government purchased 58.9 million pounds of American cheese during Jan.-March of last year, compared to just 3.1 million pounds for the same period in 1978. "This indicates that the market in commercial channels is stronger than a year ago," York concluded.

Lehigh Valley Cooperative Farmers, headquartered in Allentown, has 862 members and is expecting to have 900 members by June 1. While the cooperative's membership could only muster some 55 per cent of the dairy's milk requirements a few months ago, LeHi membership has grown so rapidly that production capacities could be attained by its own members in the very near future. For that reason, the board of directors voted recently to eliminate the 70/30 base building program, said Bill Stoudt, who is in charge of producers and fieldmen.

Billy Graham's brother speaks at 'farmer's breakfast on June 24

WILLOW STREET – An "all you can eat farmers' breakfast" at which evangelist Rev. Billy Graham's brother will be guest speaker is being planned by Teen Haven.

Mel Graham, the younger brother of the world-famous evangelist, is scheduled to speak at the Willow Valley Restaurant at 9 a.m. on June 24. The public is invited and tickets at $3.50 each may be obtained by writing to Teen Haven, Box 31, Willow Street, Pa. To phone in ticket requests, dial 717-299-2061 or 717-464-3337.

Graham, a farmer from Matthews, N.C., will talk on the importance of having and retaining a positive attitude in life. Wives are invited to come to the breakfast too, adds Rev. William Drury, founder and director of Teen Haven.

NZN®...a better way of getting zinc into plants.

NZN is a patented combination of nitrogen and zinc in liquid form. In foliar application, NZN has proven about four times more effective than other zincs. Including expensive chelated zincs.

In addition, NZN supplies nitrogen. So besides getting zinc into plant tissues faster than ever before, you're getting nitrogen in as well.

Test NZN against any other zinc. You'll be convinced before the season is over, that for getting zinc into plants, nothing comes close to NZN.

FFA land judging held

ELVERSON – The annual Berks County FFA land judging contest was held on May 9, at the Marvin Stoltzfus farm, Elverson, Pa. This contest is a joint effort of the Soil Conservation Service and the Berks County FFA. Each FFA was eligible to enter ten members in the contest.

The contest itself consists of several parts. Three pits are dug to either rock, clay, or water. At each soil pit the students must determine six characteristics-slope, soil texture, degree of stoniness, depth of topsoil, internal drainage, and total depth of soil. Then the most limiting factors of the given soil are determined.

The site is classified as to its capability class-from one to eight-based upon limitations of the site. Once the class is determined the student gives the most intense use of the soil and any conservation practices needed to control erosion on it and make it productive. Finally students identify limitations to use the site for a homesite, for a septic tank disposal field, and for a pond or lagoon.

Students from Twin Valley, Kutztown, Tulpehocken and Conrad Weiser participated in the contest. High individual was Larry Shrawder, Kutztown; Greg Koeing, Tulpehocken, was second; Ernie Geldinger, Conrad Weiser, third; Wayne Henderson, Twin Valley, fourth; Lowell Stutzman, Kutztown, fifth; Mark Rioux, Tulpehocken, sixth; Mike Heiter, Kutztown, seventh; Tom Kirk, Twin Valley, eigth; Ken Shealy, Conrad Weiser, ninth; and Larry Grumbine and Jeff Donkel of Tulpehocken tied for tenth.

In the team competition Kutztown placed first, Tulpehocken second, Twin Valley third, and Conrad Weiser fourth.

Following the contest Tom Klucick and Al Backer, of the Soil Conservation Service discussed each of the soil sites.

Livestock field day planned

UNIVERSITY PARK — A Junior Livestock Field Day will be held on the University Park campus of Penn State June 17.

This is an opportunity for 4-H and FFA members to participate in a variety of activities which help them learn more about livestock.

Some highlights of the program will include the following discussions: meet the meat - livestock productions and product; how is your cattle I.Q.?; health tips; exhibiting at the show; birth of a lamb; wool harvesting; sheep sense; fitting and showing demonstration; and swine parasites and their control.

An interesting feature of the swine derby contest will include weight estimation, reading ear notches, feed identification, and breed identification.

Also on the program will be a judging contest including two classes each of beef, sheep, and swine plus two classes of meat and/or other meat identification; a beef cattle showmanship contest; sheep showmanship contest; and a fitting and showing swine demonstration.

A short tour and the awards presentation will conclude the day's activities around 3 p.m.

Sheryl Bollinger wins Kunzler scholarship

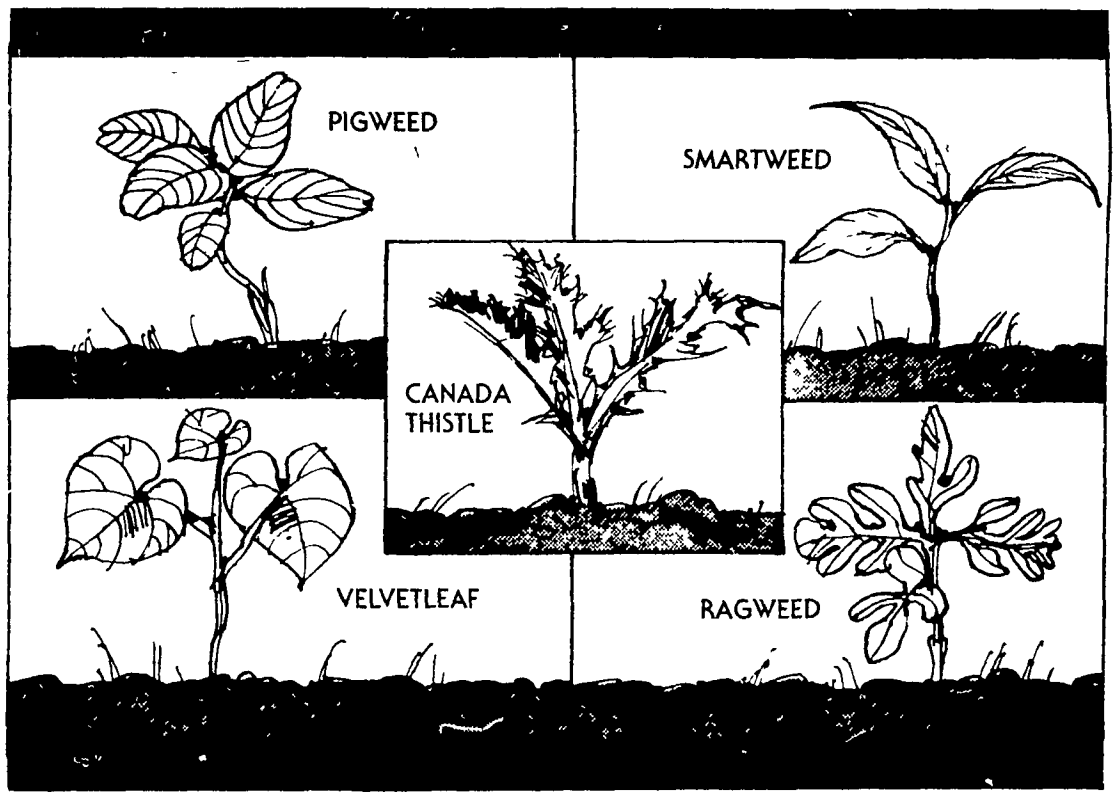
EPHRATA -- Sheryl Bollinger, daughter of Mr. and Mrs. Warren F. Bollinger, Lititz R4, was named winner of the $700 Kunzler and Company Inc. scholarship for 1978. Sheryl, a senior vocational agriculture student at Ephrata High School plans to attend the Berks Campus of the Pennsylvania State University, majoring in agriculture.

Bollinger has held the offices of secretary and treasurer in the Cloister FFA. She was a chapter delegate to the National FFA Convention in Kansas City, Mo., and was a member of the first place dairy cattle judging in the State FFA Contest. She later was the sixth place individual in the National FFA Dairy Judging Contest held in Kansas City, Mo. and a member of the second place team. Sheryl also participated in the Invitational FFA Contest at Madison, Wis. as a dairy team member from Pennsylvania.

She is president of the parliamentary procedure team that has won county, area, and regional contests. Sheryl will be attending the Summer FFA Convention participating in the State Parliamentary Procedure Contest. Her farming program consists of registered Holsteins, veal calves, market hogs, field corn, sweet corn. Her record book in agriculture was a gold emblem winner in both local and state competition.

Sheryl was the first girl from Ephrata to earn the Keystone Degree, the highest award for a FFA member on the State level. She is a member of the Middle Creek Church of the Brethren.

For post-emergence weed control on corn...
Banvel® herbicide...



...alone or tank-mixed with 2,4-D (depending on your weed problem):
...to control tough, late-germinating broadleaf weeds,
...to cover misses of pre-emergence herbicide application,
...to get control where weather or other factors make earlier application impossible,

...to make sure that late weeds cannot mature to become the nursery for next year's weed crop.

Ask us for application details about Banvel herbicide...from Velsicol.

Note: Before using any pesticide, read the label.

Stronger U.S. dollar would help farmer

HOT SPRINGS, Va. — A stronger U.S. dollar, coupled with fewer trade restraints on commodities ultimately could benefit the U.S. farmer as well as this country's balance of payments, a leading grain export executive said recently.

"It is clear to me that this country has the capacity to accommodate a larger level of exports of our farm products ... with no adverse effect on our own consumers," Michel Fribourg, president of Continental Grain Company, told a meeting of The Business Council here.

He challenged the belief that a cheaper U.S. dollar increases export of this country's farm products.

"No matter how low their relative cost may be, the volume of American farm exports does not increase in those markets - including the European Community and Japan - where high non-tariff trade barriers exist. Import quotas on livestock products such as meat, eggs, and dairy products deny the benefits of expanded world trade," he said.

Fribourg discounted the notion that using lower-valued U.S. dollars to buy more farm commodities in any way affects the consumers in those nations where internal prices are buffered by government action from the "real world." He cited the European Community, where the so-called variable levy system keeps the domestic values of all cereal grains totally insulated from competitive international values.

According to Fribourg, cheaper dollars cannot substantially increase the export of any U.S. product into those countries where the demand for that product is highly inelastic, as in the case of wheat for human consumption in Japan and other affluent countries.

He noted that softer U.S. dollars can work to the advantage of those commodities where there are no quantitative restrictions on imports, very low or non-existent import tariffs and for which there is an elastic demand - such as soybeans, edible vegetable oils and oilseed meals.

Fribourg said the effect of the lower dollar on increased purchasing power of foreign countries has been most apparent in those nations with centrally-controlled economies.

"Certainly the purchasing power of gold, petroleum and other products sold by the Soviets in exchange for strong currencies has increased."

He added that although the primary reason for recent large Soviet purchases of U.S. grain has been to cover a crop shortfall, he believes they recognize that... "U.S. grain today is relatively cheap and gives them an opportunity to gather contingency reserves within the limits of their storage capacity."

Fribourg pointd out that the decline in the dollar actually was a financial windfall to some other governments.

In Japan, for example, the lower dollar relationship to the yen has made it possible for the Japanese government to buy needed wheat for fewer yen, increase the profit from its wheat operations and more easily subsidize Japanese rice farmers and consumers at the expense of the American farmer.

The cheaper dollar also increases the subsidy to European Community agriculture. "As U.S. grains become cheaper in terms of EC 'Units of Account'", he explained, "the amount collected from the variable levy system increases. This in turn increases the financial ability of the European Community to underwrite the expenses of its own agricultural programs, including export subsidies."

"These are artificial systems...that cannot be justified in terms of world trade economics, logic or fairness," Fribourg concluded.

Pres. Carter signs farm bill

WASHINGTON, D.C. — President Carter signed into law the emrgency farm legislation May 15, announcing that he is raising the target price on 1978 wheat to $3.40 a bushel, as was authorized in the bill. Previously the wheat target price had been $3 a bushel.

The signing of the bill could mean $600 million more in income supplements for wheat growers this season. The move should have no effect on food prices.

In a statement, Carter said the four year measure will help "meet our goal of food and agricultural policies which are fair and equitable for farmers and which maintain our ability to compete effectively in world markets."

Acting Secretary of Agriculture Carol Tucker Foreman, speaking for Secretary Bob Bergland who is on a trip to Europe, said, "Higher target prices for wheat should encourage more wheat producers to sign up for the 1978 wheat program while the higher upland cotton loan rate provide producers needed added support, but will not bring the minimum U.S. price for cotton to a level that would interfere with U.S. exports."

The bill also gave farmers 10 extra working days to sign up for set-aside programs that originally carried May 15 deadlines. Along with the Senate action, Secretary of Agriculture Bob Bergland lengthened the sign up time to May 31 to account for late wet Spring weather and to alleviate the extra workload at the county level.

Fuel tax opposed

HUDSON, Ia. -- A proposed 6 to 12 cent per gallon fuel tax scale on commercial barge traffic on inland waterways will mean an average additional cost of 1.6 cents for a bushel of soybeans shipped from Chicago to New Orleans, according to Dr. Donald Frahm, American Soybean Association senior economist. In a study on the impact of a fuel tax currently being discussed in Washington, D.C., Frahm said the modest additional cost is not unacceptable. He does not expect it to seriously affect the market or the competitive position of U.S. soybeans in international trade.

PROVEN MILK REPLACER FOR GROWING BETTER DAIRY CALVES — *FASTER!*

Fasterized BY SPECIAL PROCESS

"Fasterized" —
Exclusive New Processing Technique

- FAST, EASY-MIXING! Helps take the "chores" out of feeding time.
- FEEL THE DIFFERENCE! "Fasterized" texture alone tells you this new process is unique.
- SMELL THE DIFFERENCE! Fresh, sweet, wholesome
- PALATABLE! Farm research proved calves actually refused other product when switched back
- NUTRITIOUS! Special processing helps retain correct balance of high-quality nutrients.
- UNIFORMITY! New production technique assures dependability — bag after bag, day after day

EXTRA!
A free measuring cup. There's a thermal cup in every bag. Use it later for a drinking cup, too.

VAN DALE

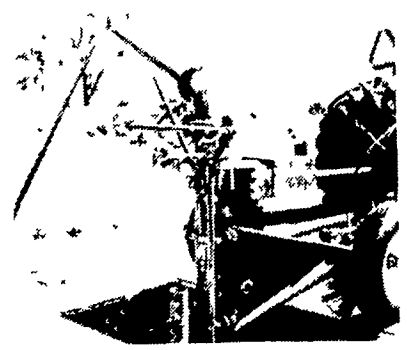
Slinger

These new top performers are making a big hit with a growing army of beef and dairy operators. From its rugged A-frame hitch back to its wide-throwing discharge baffle, the Slinger offers the last word in clean liquid manure spreading. When teamed with our agitator/filler pump, you get ultra-fast tank loading. Large 24" diameter fill hole cover is operated from tractor by adjustable control rod.

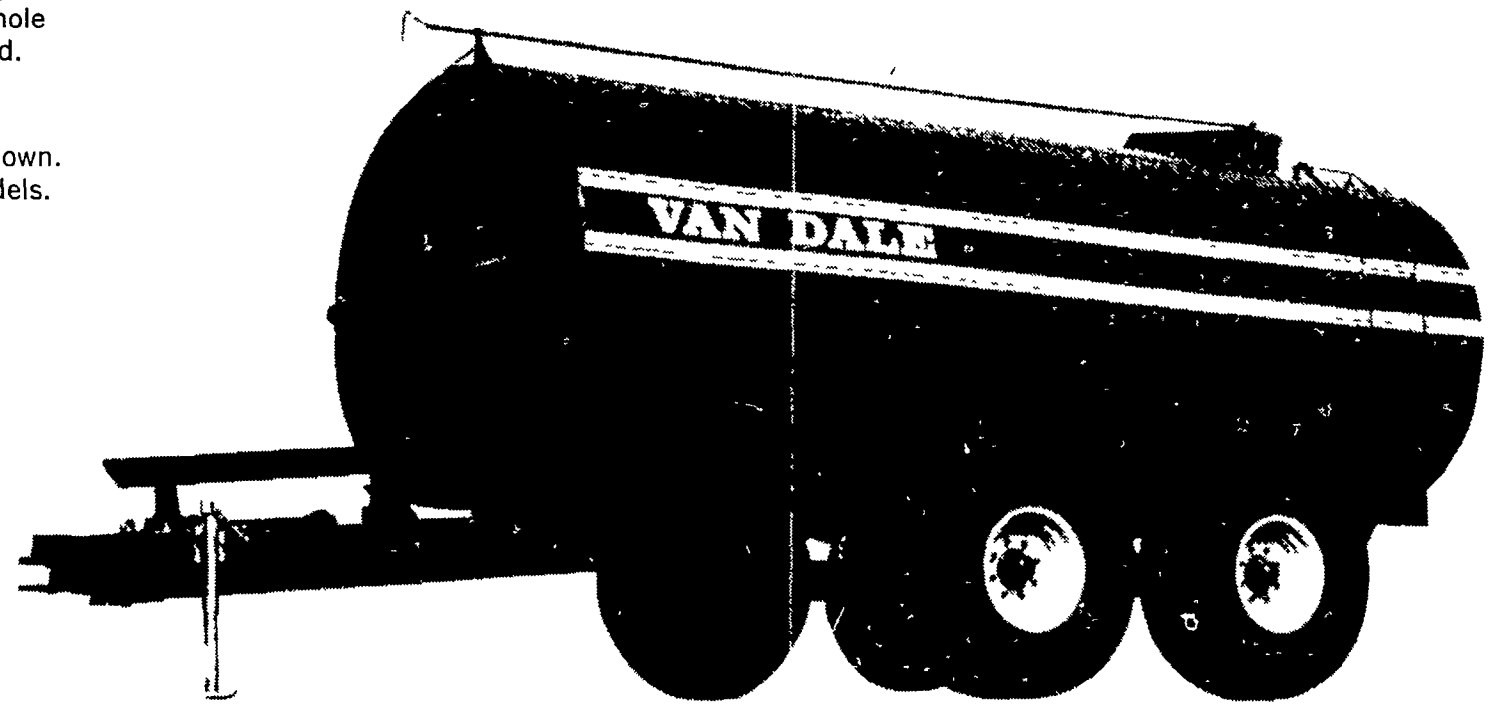
The Slinger's four jumbo flotation tires give you a unit that's on the job spreading when others are bogged down. You can choose from 1,500, 2,250 or 3,000-gallon models. And all of them offer you these standout features:

LIQUID MANURE EQUIPMENT

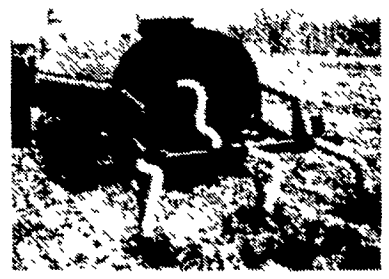
MAY SPECIAL - 15% DISCOUNT



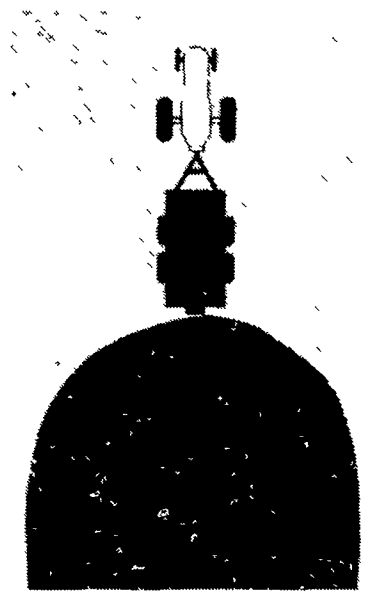
Just lower the chopper/agitator/filler pump into your liquid manure pit, hook up your tractor PTO and you're ready for high volume agitation Pump sucks in and blasts out liquid manure in a powerful jet stream that breaks up solids, making a slurry of pit contents Has large 20½ impeller in 27" housing Comes in 6, 8, 10 and 12 models



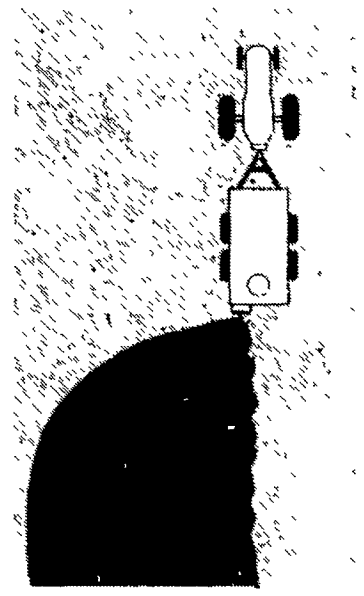
Powerful Auger-Impeller Combination—
Operates off PTO to throw manure in a con trolled, even center swath up to 40' wide Internal, full length 7" diameter agitator auger and 20½" impeller have common shaft, work off direct drive from PTO rated at 540 rpm Exclusive discharge baffle assures low, even spread pattern instead of separate plumes that tend to concentrate coverage



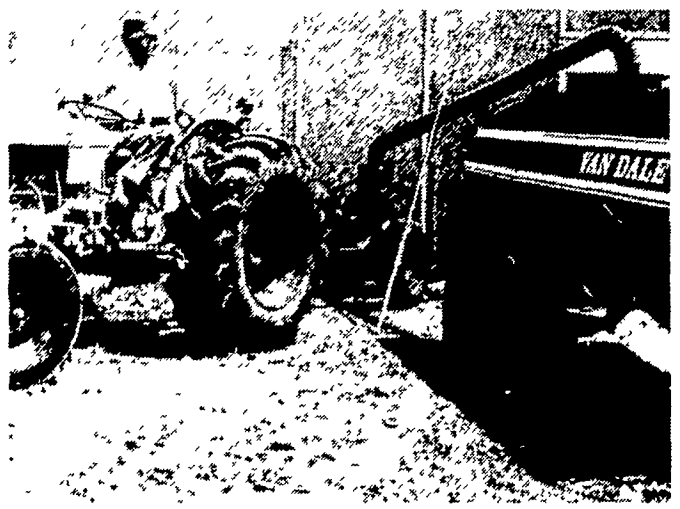
Liquid Manure Injector System—
Optional accessory that helps keep down odors and minimize runoff Master hose has 4" diameter, feeds liquid manure into 4" square, enclosed tool bar From there, three feeder hoses connect to spring loaded knives that open up soil for injection Adjustable width spacing permits use on sod, row crop and stubble fields Available for both slinger and vacuum type units



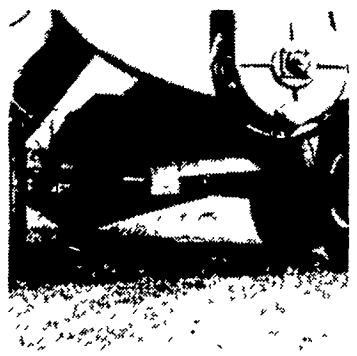
Van Dale's 180° Center Flow Spread Pattern—
The common sense way to throw it You spray both left and right instead of just one direction so liquid manure fans out in a low, controlled arc This eliminates blow back and rooster comb problems so common with ordinary liquid manure units Lets operator spread an even swath up to 40' wide, while traveling back and forth across field This also eliminates need to drive over ground already spread



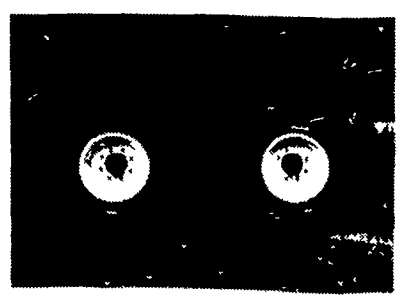
Ordinary 90° Pattern of Other Makes—
With side throw equipment, operator has to constantly circle—working from outside of field to the inside Causes blow back that throws manure on both equipment and operator Side throw spray often results in uneven coverage that can burn young plants



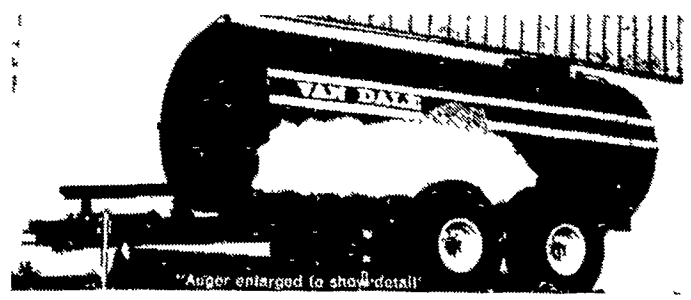
High Volume Pumping—
When you're ready to fill your spreader tank, just change the valve from agitate to fill and you're set You can load a 1,500 gallon spreader tank in less than two minutes Trailer mounting with hydraulic tilt lets you agitate and fill from different pit or lagoon locations with ease



Proven, Extra-Tough Undercarriage—
Stress-proof spindles and bronze bearings spread weight load . provide plenty of muscle to take full weight of tank plus tons of manure Field proven by years of full time use on heavy duty commercial fertilizer spreaders You get rugged box beam construction, separate and independent center axles Offers 9% wider track than most other makes to provide greater stability



Walking Tandem Axles—
Smooth out the roughest fields Right and left beams pivot independently to let front and rear wheels roll up, over and down land contours Keep tank level for smooth, safe pulling Wheels are closely spaced to reduce turning effort



Inside, VAN DALE Slingers have a full length powerful 7" Auger that turns at 540 RPM to charge the impeller for more throw power Especially important when using an injector to assure constant flow from start to finish Keeps slurry constantly agitated You spread an even, consistent blanket of liquid manure. It's an exclusive, standard feature on all three VAN DALE Slinger models

A highly competitive agribusiness climate in Lancaster County makes the Binkley and Hurst Brothers Inc. dealership "outstanding," according to the Case Campany.

Binkley & Hurst Bros. cited for 30 years of competition

ROTHSVILLE – "It's just a miracle how their business grew in the past few years," Jack Vulgaris says of the Binkley and Hurst Brothers, Inc. Case dealership, near here. Vulgaris, who is district manager for the Case Company in eastern Pennsylvania and New Jersey, presented the Lancaster County farm equipment outlet with a 30-year plaque last week.

"This is the most highly competitive county for farm business in North America," Vulgaris explained, noting that an agribusinessman in the Garden Spot has to be on his toes in order to beat the competition.

"Binkley and Hurst Brothers Inc. is one of our top performers out of the Indianapolis branch," the Case Company representative continued. "They just do an outstanding job and they're highly respected and highly regarded – just outstanding," he exclaimed.

Showering praise on a broader spectrum, Vulgaris reported that Lancaster County is "just an outstanding area; it can be compared to the Midwest. It is an extremely competitive area and it's tough to make a profit because of that."

The Binkley and Hurst dealership has managed to keep business growing vigorously despite the high business pressures in the area. According to Leonard Binkley, sales volume has more than doubled in the past five years. Serving northern Lancaster County from their headquarters on Rothsville Station Road, near Rothsville, the farm equipment outlet handles the full line of Case farm tractors and implements as well as a line of machinery and equipment from the Gehl Manufacturing Company. In addition, Binkley and Hurst is a retail distributor for the Hamilton Equipment Company.

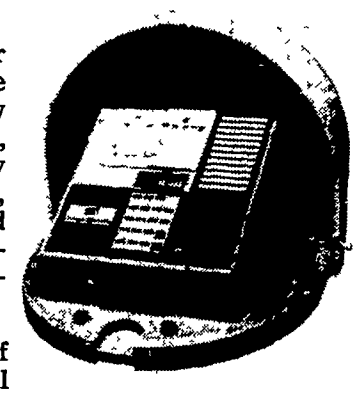
Formed in 1972 through an agreement between David Binkley and Leonard and Amos Hurst, the Rothsville firm is a successor to the former Walter Binkley & Son farm implement company. The original dealership dates back to 1947 and was founded by David Binkley's father.

Milk hearing set

HARRISBURG – The Pennsylvania Milk Marketing Board has scheduled public hearing for the South Central Area for May 23 at the Agriculture Building, Harrisburg. The area includes Fulton, Franklin, Adams, York, Lancaster, Cumberland, Lebanon, Dauphin, Perry and Juniata Counties. Hearings begin at 10 a.m.

WHAT'S NEW

IRRIGATION CONTROL



A new keyboard controller utilizing solid state microprocessor technology to provide specific timing, scheduling and reliability features for agricultural, nursery, greenhouse, and wastewater irrigation applications has been introduced by Johns-Manville.

The solid state design of the controller offers several important advantages over electromechanical units, says the manufacturer. Keyboard control minimizes the number of components needed to program the irrigation cycle and allows maximum programming flexibility. Reliability is better because less circuitry is needed. Accuracy is improved because solid state timing allows the operator to put down the exact amount of water required.

The 12-station controller (model KCS-12FC-AG) has the capacity for handling a wide variety of functions. These include:

Four 14-day schedules, multiple repeats, variable and accurate station timing, five automatic starts per day, and manual irrigation.

Other features include skip days where the irrigation cycle can be omitted for up to nine days, an important consideration in rainy weather conditions; and continuous recycling to help keep the soil moist during seed germination periods.

Further information on the KCS-12FC-AG controller is available from Johns-Manville, 909 W. Nielson, Fresno, Calif. 93708.

Pa. broiler, egg, and turkey meeting set

HARRISBURG – The 1978 Pennsylvania Poultry Conference scheduled for June 22, at the Host Farm in Lancaster, Pennsylvania will again feature three separate conferences for broilermen, eggmen, and turkeymen with prominent speakers from throughout the United States. The conference has grown in attendance every year for the last five years and nearly doubled last year when the separate conference for each commodity was instituted. A nationally known figure is also selected each year to address all three conferences in a joint session.

The Broiler Conference will include the following presentations: John Halladay, Russell Research Center, Athens, Georgia, "New Mechanical Handling Systems for Live Broilers"; Dr. Robert Eckroade, University of Pennsylvania, "Avian Infectious Bronchitis"; Charles H. Stevens, Spotts Stevens and McCoy, Inc., Engineering Consultants, "Pollution Management;" and Dr. Joseph MacNeil, Penn State "The Hidden Value of Taste Panels."

The Egg Conference includes Robert Fischer, Publications Editor, Hy-Line International, "New Breakthroughs in Cholesterol Research"; Dr. Roland Leach, Penn State, "Nutritional Effects on Egg Shell Quality"; Linda Fit-Hugh, Executive Vice President, California Egg Marketing and Research Agreement, "Egg Promotion California Style"; and Fred Adams, President, Cal-Maine Foods, Jackson, Mississippi, "Problems in Egg Marketing".

The Turkey Conference includes Ted Wasden, President of the National Turkey Federation, "What the Consumer Really Wants"; Dr. D.L. Cross, Clemson University, "Turning Waste (Litter) Into Profit"; Dr. Michael Humphrey, USDA, "Changes in Processing Regulations"; and Jack Merritt, Vice-President of Operations, Nicholas Turkey Breeding Farms, Inc., California, "Turkey Leg Problems".

The Educational Session of the day will come to a close with a price-outlook session for broilers, eggs, turkey, and feed. Speculating on these future prices will be John Pedersen of Poultry and Egg Fax, Stone Mountain, Georgia. In the evening, the Pennsylvania Poultry Federation holds its Annual Banquet featuring entertainment and announcement of the broiler, egg, and turkey industrymen of the year.

The conference and banquet are open to everyone and advance registration can be made by writing to the Pennsylvania Poultry Federation, 500 N. Progress Ave., Harrisburg, Pa. 17109 or telephoning 717-652-7530.

Grain reserve reported

WASHINGTON, -- A telephone report by the United States Department of Agriculture (USDA) field offices shows that 324.9 million bushels of wheat and 77.3 million bushels of feed grain had been placed in the farmer-held grain reserve through May 9, according to Stewart Smith, associate administrator of USDA's Agricultural Stabilization and Conservation Service (ASCS).

The figures cited by Smith were based on a telephone survey by ASCS. Feed grain in the reserve includes 21.3 million bushels of barley, 28.0 million bushels of corn, 24.2 million bushels of oats and 3.8 million bushels of sorghum.

The grain reserve takes grain off the market for a period of up to three years or until market prices reach certain rates specified by formulas in farm program regulations.

Beginning May 15, weekly telephone survey results will be included with the weekly report of price support loan activity which is usually issued each Monday.

Amos Funk speaks

(Continued from Page 1)

former Esta Myer of Oregon, north of Lancaster, Funk and his wife have shared in the work of their farm and community. "If there's something where he thinks he can help, he goes all out," Mrs. Funk said in a tone which revealed her admiration for the man she's been married to for 42 years. With their son, Fred, taking over more and more of the responsibilities, both have found more time for concerns and activities other than actual farming. Efforts to preserve farmland are just as strong as ever however, and Amos Funk's voice is one to be heard in countless meetings on the subject. He has become so renowned and respected that he has dedication and expertise has been sought by governors and college deans, among others.

A 1929 graduate of the old Manor Township High School, Funk had plans of going to Penn State, and he did. But with the advent of the Great Depression, "the money got all" and young Funk was unable to complete his college education. He had wanted a degree in agricultural economics and wasn't too sure of what his career plans were. As it turned out, he returned to the farm. According to many people in the area, it's the best thing that could have happened to agriculture in southeastern Pennsylvania.

"When you give that man a job to do, he gets it done," Mrs. Nancy Burkhart says of him fondly. She serves as treasurer of the Lancaster County Conservation District, a group with which Funk has been actively involved since 1950. He was chairman of the LCCD for 17 years and has been vice chairman since 1969.

A friend of all who have an interest in preserving farmland, Funk has made some special friends among those have benefitted profoundly from his conservation efforts. During February and March of 1977, for example, Funk worked tirelessly for the preservation of 58 acres of prime farmland which had been condemned by the Lancaster Area Refuse Authority for a landfill.

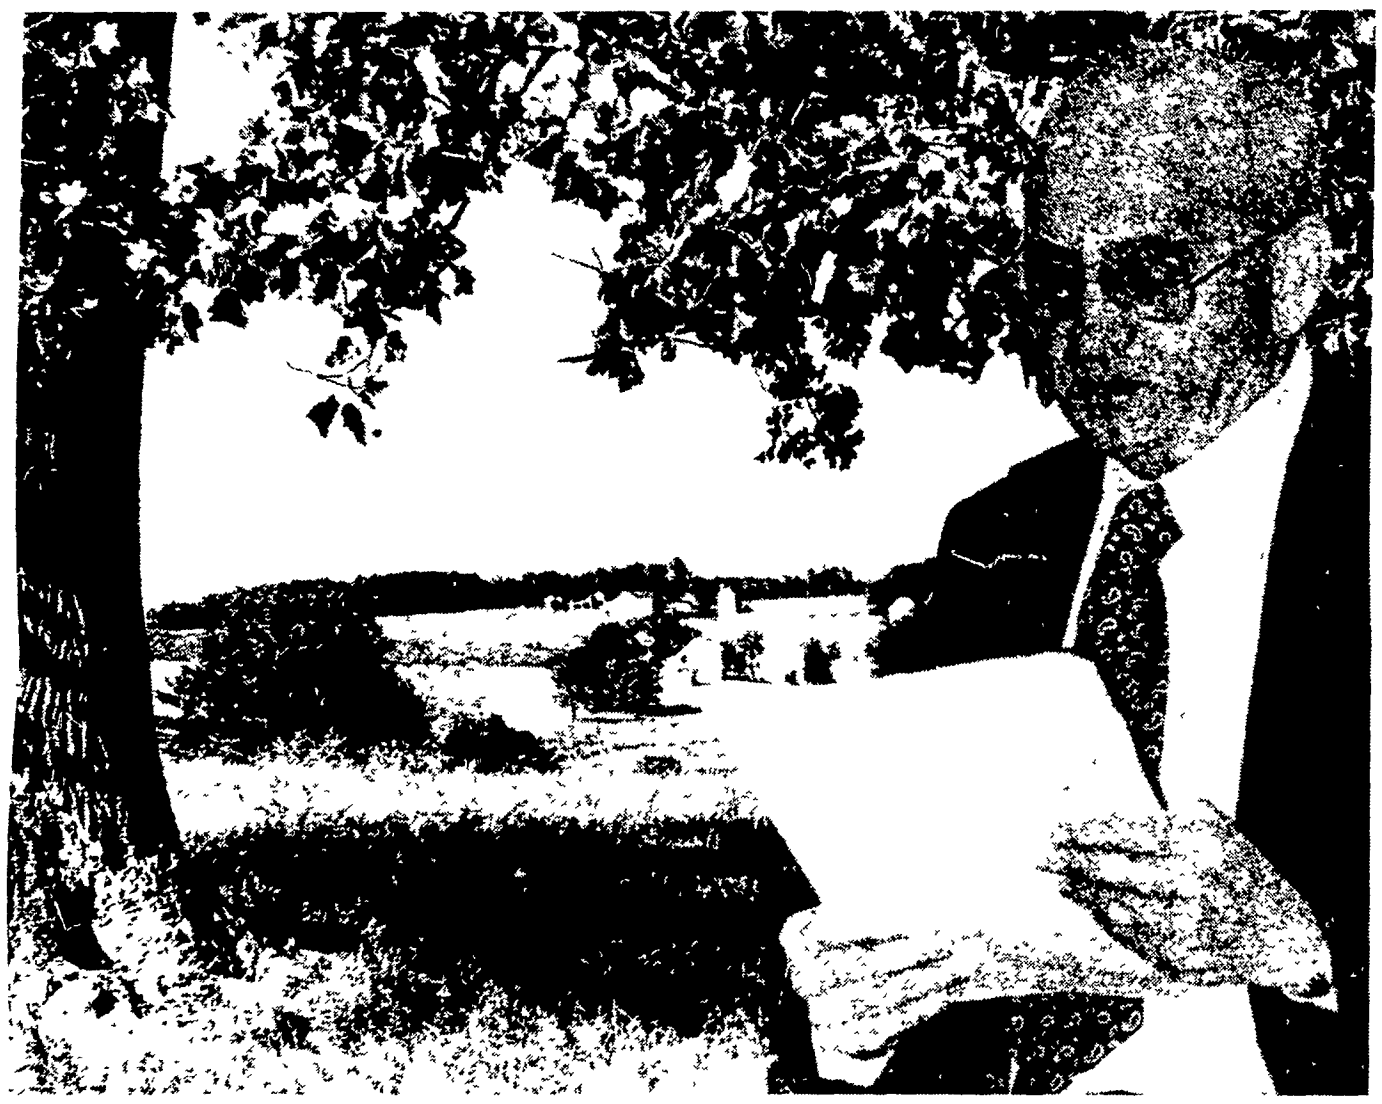
John and Abram Barley, owners of the farm which was involved in the case, were able to save their land and continue normal farming operations as a result of hundreds of concerned citizens. Amos Funk was one of the leaders in that concerted effort.

Abram Barley told **Lancaster Farming** the following, in regards to Funk's work to save 58 acres of their farmland:

"I could never appreciate enough what he did," he began. He worked to get all kinds of details for our behalf and was instrumental in presenting testimony at numerous meetings, including talks in Harrisburg before the House Agriculture Committee. He just put an endless amount of time into the case and initiated a fund-raising campaign. These are just a few things – whenever you needed him, he was there. We have a lot of confidence in him and just couldn't praise him enough," Barley exclaimed.

"Amos is a man who is extremely honest – he makes sure that when he gets up to make a statement,

(Turn to Page 47)



Amos Funk does not seek publicity, and it should be noted right from the start that the well-known farmer-conservationist was not seen giving a speech beneath a tree. The picture, above, is really two photographs spliced together to show Amos Funk in the type of backdrop that he loves. The two go together like a horse and carriage - love and marriage. What Amos Funk was really doing when his picture was taken was to present testimony on behalf of the Barley Brothers, near Lancaster, who last year had 58 acres of their farmland condemned for a landfill. Many people helped to win that battle for the Barleys, and Amos Funk was one of the most influential of all. It should be noted, too, that he is a very modest man. The information about Mr. Funk that is contained in this edition of Lancaster Farming was gleaned from acquaintances of his. "Mr. Conservationist" had no more than a faint hint that a feature about his work would appear in this newspaper.

A love for the land makes Amos Funk's work blossom at home and all around

MILLERSVILLE – Amos Funk quite often works for nothing, if money is considered to be the only form of retribution. He also works for anyone and all, if preservation of farm land is at stake. The Lancaster Countian loves his heritage, and is especially appreciative of the land and the bounty it holds. For that reason he works diligently for a cause a lot of people talk about; but only a few are as actively involved as he is. His rewards may be the realization that good stewardship of the soil will prevail

At a meeting held in Ephrata two weeks ago, to which fellow conservationists and a number of state legislators were invited, the well-known farmer-conservationist [illegible] he is convinced that reasonable growth of com- and a viable agriculture are reasonable goals

Despite a booming tourist trade in Lancaster County, and an unending stream of farms going out of production, he believes agriculture can enjoy a healthy future in southeastern Pennsylvania. But planning is needed. He has expressed his ideas and concerns at countless meetings.

At the legislative dinner in Ephrata, Amos Funk presented the following speech, which is representative of his expertise and dedication.

"If I were to ask each one of you today, what are your goals for Lancaster County by the year 2000 and even bevond, how would you respond? Have you thought about

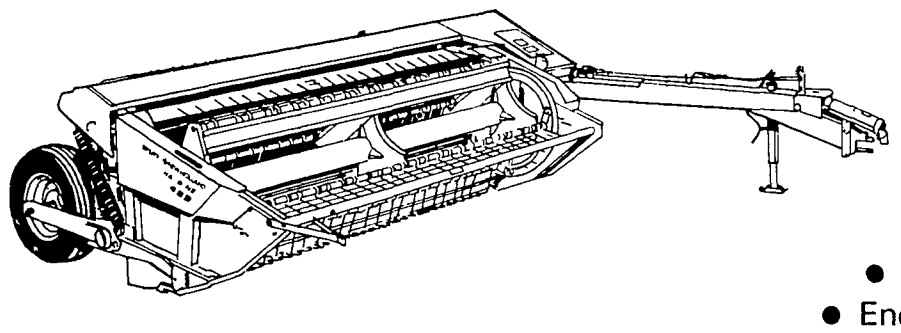
TEAMWORK THAT GETS THE JOB DONE FAST!

A new standard of excellence.

The Model 489 Haybine® Mower-Conditioner is designed for operators who demand the very best.



This all new, king of the nine-footers features.

- Rolls mounted in the main frame — not in the header.
- Chevron intermeshing rubber conditioning rolls.
- Gear driven conditioning rolls.
- Enclosed, balanced wobble drive.

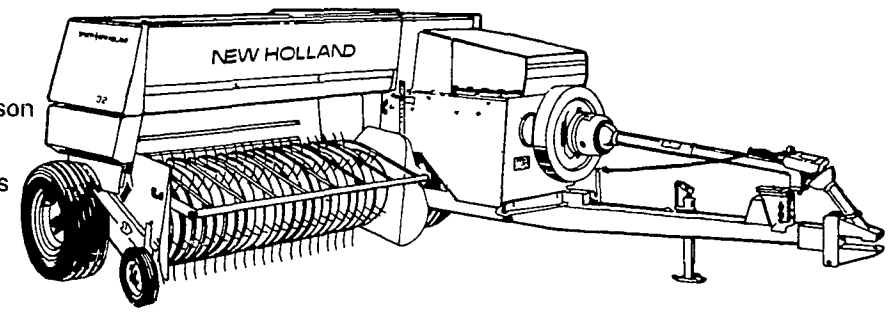
See it today

Here's how you can take the hands out of bale handling

Top of the 14" x 18" line.

- Designed and built for the big-volume hay growers and custom operators who make many thousands of bales each season
- Makes ideal bales for mechanical bale handling
- Famous Super-Sweep pickup is 75 inches wide and is offset to let today s wider tractors drive beside the windrow, not on it

The bigger the job, the happier you'll be with a Sperry New Holland baler See the capacity of the Model 320 for yourself



Sperry New Holland Model 320 baler.

This bale wagon does it all.

The Sperry New Holland Model 1034 automatic bale wagon:

- Picks up, loads, hauls, stacks, retrieves — even unloads a bale at a time from either side of the table!
- Takes the hands out of bale handling!
- Hauls up to 104 bales (14" x 18") per load!

If you like the idea of bales, but don't like the idea of lifting — or looking for hired help — this machine is a dream-come-true

Don't let your haymaking get bogged down this year because of a weak link in your hay system.

See your nearby Sperry New Holland Dealer listed on the facing page. He's ready to help you choose the right Sperry New Holland hay tools that will make your haymaking system work together like a team: To get the job done fast — and more profitably.

Phila. markets to open in July

This is a scene from 1977's tailgate markets in Philadelphia.

PHILADELPHIA – Three locations have been selected for weekly Summer markets as part of the Philadelphia Tail-Gate Market Project. Beginning the first week of July, farmers markets will be held every Tuesday at St. Peter's Episcopal Church in Center City-Society Hill; every Thursday at St. Cecilia's Elementary School in Northeast Philadelphia; and every Friday at St. Francis de Sales Church in West Philadelphia.

A fourth "test market" is scheduled for August 2nd in Chester, which is located in Delaware County. Saturday markets will be held at St. Cecilia's throughout September and October, and additional Fall markets will be arranged later in the season.

The purpose of the Philadelphia Tail-Gate Market project is to offer Pennsylvania farmers the opportunity to sell their produce for a fair return, while providing urban consumers with fresh local produce at reasonable prices. The markets are being coordinated by Nutritional Development Services, an agency of the Archdiocese of Philadelphia, and are made possible through a grant from the Pennsylvania Department of Agriculture.

There is still time to register for these markets, and any farmer who is interested in signing up should contact Cathi A. Hanssens, program administrator, Nutritional Development Services, 222 N. 17th Street, Philadelphia, Pa. 19103. Phone (215) 587-3767.

Puzzled again this year?

This year you could take a chance on a bulk-blend fertilizer. Or, you could rely on a premium granular formulation from Farmers' Fertilizer.
Farmers' Fertilizer will mix a formulation especially suited for the type of soil on your farm, and for the crops you grow.
That way, you'll get exactly what you need in basic N, P, K. Plus you'll get these benefits from the new premium formulations.

- Important secondary plant nutrients to beef-up your soil.
- At least three forms of nitrogen for better yields.
- Low calcium carbonate content to protect soil pH and reduce liming costs.
- Starter row fertilizer contains 100% mono-ammonium phosphate for less seed damage.

When you visit Farmers' Fertilizer, you won't have to wonder if you made the right decision for all your spring fertilizer and ag chemical needs.

Big tractor pull coming soon

GRANTVILLE – Raw, unadulterated horsepower will play a key roll at the Muncy Chief Penn National tractor pull at the Penn National Raceway, here, on May 29 and May 30, sanctioned by the National Tractor Pullers Association (NTPA).

The event will feature upward of 2000 horsepower machines competing against each other in an attempt to pull the weight transfer further than the other on a 300 foot clay track.

The Muncy Chief Penn National pull will be featuring super stock and modified tractors and four wheel drive trucks.

These machines have been finely tuned to generate tremendous amounts of horsepower.

Horsepower may be basic to the sport, but calculated use of horsepower is the basis of success. The balance of weight on the machine is also extremely critical, as weight distribution often spells the difference between success and failure. Tire pressures, tire speed and fuel/air mixture ratios also help spell success.

Many of the most respected competitors in the country will be competing at the Muncy Chief Penn National pull. As an NTPA sanctiones event, the event will see points given to the competitors in each weight class toward the championship for the class in Region I. In addition to the points championships, the points will also determine who attends the two indoor invitationals at Harrisburg, (Penn Winternationals) and Indianapolis, in (Super Pull VI) in early 1979.

Tractor pulling is North America's fastest growing motorsport, and under the guidance of the sanctioning organization, NTPA, the total purses paid to the competors have grown by 20 per cent increments in each of the past two years.

The schedule for the Muncy Chief Penn National pull is as follows:

May 29

1:00 p.m.: 5000 Super Stock; 150 Mini Tractors; 5000 Modified;

7:00 p.m.: 7000 Superstock; 5500 Four Wheel Drive Trucks; 12000 Unlimited.

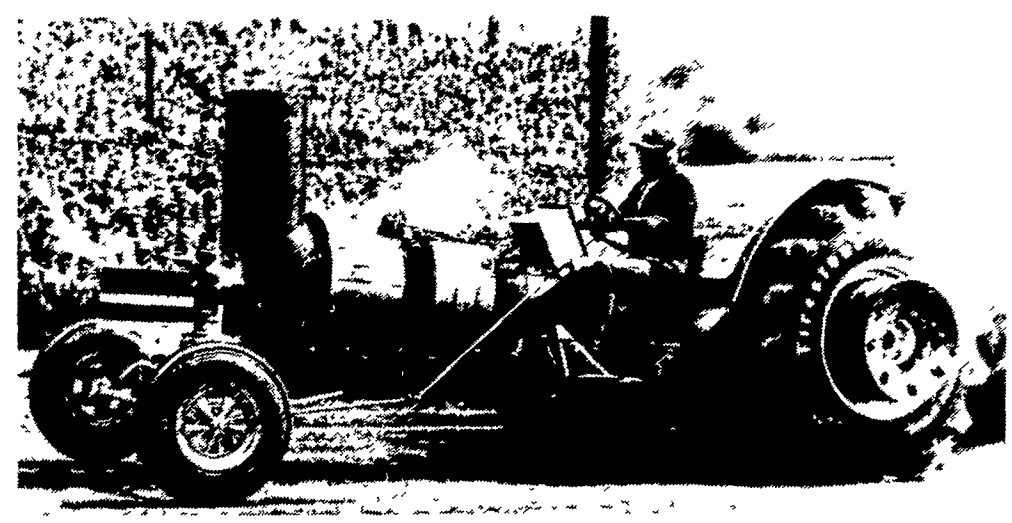
May 30

1:00 p.m.: 7000 Modified; 6500 Four Wheel Drive Trucks; 12000 Super Stock.

7:00 p.m.: 9000 Super Stock; 1700 Mini Tractors; 9000 Modified.

Tickets are available at the gate for $4.00 each for afternoon sessions and $5.00 each for night sessions.

More than smoke and dust will fly when the Penn National Tractor Pull gets underway on May 29 at Grantville.



Turbine-driven tractors scream like jets, pull like bulldozers, and move like a cross between the two.

4-H steer branding set

LANCASTER – For 4-H'ers with steer projects, it's time to freeze brand animals for the 1978 district shows and the 1979 Pennsylvania State Farm Show. Members of the 4-H Red Rose Beef and Sheep Club will be doing so today (May 20) at the Charles Myers Black and White Holstein Barn, 2220 Dairy Road, Lancaster, Initial weighing will also take place at that time.

The hours will be from 8 to 11 a.m.

Bees are learning to eat potatoes in Wisconsin University experiments to substitute baked potatoes for usual pollen sources.

CONTROL WEEDS IN ALFALFA WITH

BUTYRAC-200

Apply 2 to 4 weeks after alfalfa emerges. Controls broadleaf weeds in seedling or established legumes. This remarkable selective action — killing many broadleaf weeds without affecting certain broadleaf crops — has been proven by research men and commercial growers throughout the country.

We are distributors for a complete line of

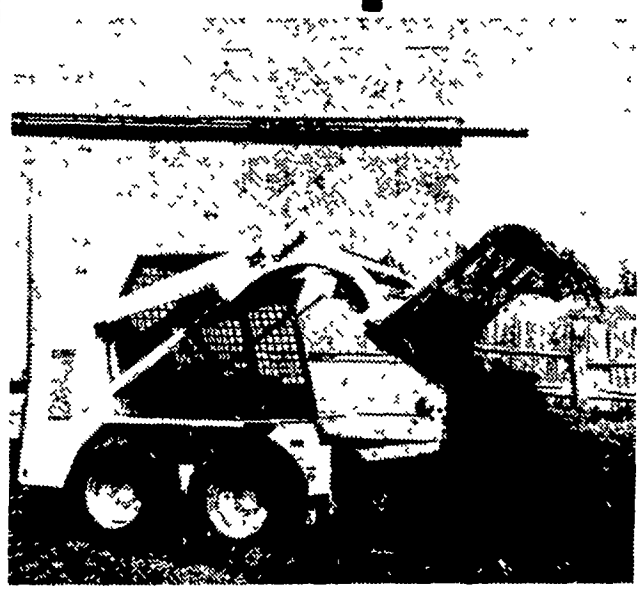
bobcat "It's some kind of animal!"



Built to fill a need for the new breed of farmer

The Bobcat skid steer loader was developed not too many years ago to clean out barns and other farm buildings where the only other way was tedious hand labor

But today's new breed of farm now relies on the Bobcat for a lot more than cleaning and loading. With a variety of attachment options and the speed and ease of the Bob-Tach system, he can excavate, backfill, trench, drill post holes, plow and remove snow, haul materials to the job site, rake, scarify. Four-wheel drive and compact size let you maneuver the Bobcat in tight work areas indoors and out to get heavy work done fast and economically

Want a demonstration at your place? Just give us a call, or drop in.

Lancaster Horse Show happening this weekend

By KENDACE BORRY

LANCASTER — The Lancaster Horse Show, in its 45th year, is in full swing this weekend at the Lancaster Riding and Tennis Club. Having started yesterday, May 19, the event will continue into Sunday with classes throughout the day and evening hours.

The show holds events for Saddle Horses, fine harness horses, Arabians, Morgan, hunters and jumpers.

According to Mrs. H. Cleves Dodge, show secretary, over 600 horses have gathered from all over the east coast for the event. Over 2500 entrees have been received in the various classes throughout the show, making the show the largest to be held at the Lancaster horse show grounds this year.

Ribbons, rosettes, trophies, bowls, and plates will be awarded to the winning participants in each class. A total of almost $16,000 prize money will be distributed to the lucky competitors.

Mrs. Dodge related that the jumper classes are always the most popular with the audiences. These are the classes where the large-muscled animals compete to see which horse and rider can jump and clear the greatest obstacle height. The tension grows as the jumps grow higher and the field narrows down to a few horses which try their best on the jumping course.

But, the horse enthusiast also added, each breed of horse shown, has its own special attraction. The wide variety of classes, from the hunter classes held on the outside course to the fine harness classes in the ring each add to the splendor of the event.

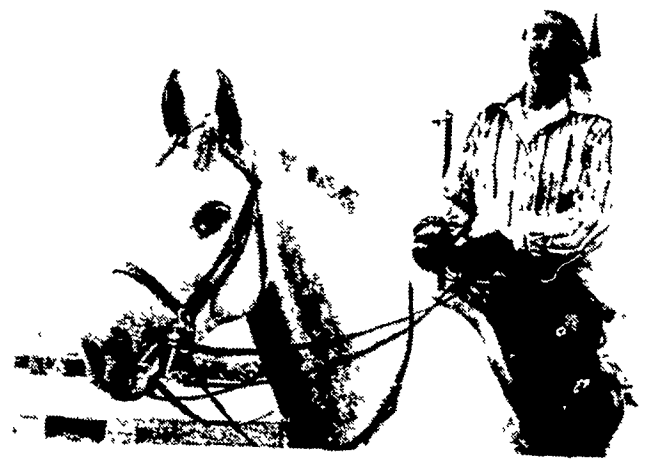
For those who come to watch the show, there is a wide variety of shops and stands to see also. Food is available for those who like to eat, and traveling tack and novelty shops offer a wide array of items to tempt the horse lovers. These will be open throughout the show.

Many of the horse owners and showers related that they travelled to the Lancaster Horse Show because of its "A" rating in the American Horse Shows Association, its location, and its closeness in time to the large Devon Horse Show.

One hunter competitor spoke of the outside course offered at Lancaster.

"It used to be that most of the shows offered a nice outside hunter's course in their show schedule," she related. "But few do anymore. Lancaster's used to be one of the nicest courses, and I hate to see it deteriorate because of limited space." She added that the outside course is smaller this year than some of those in other years.

However, rain or shine, the show will continue. Saturday morning begins with the hunter classes starting at 8 a.m. and Sunday the show begins at noon.



Joan Yovanovich, on Fancy Free, a Thoroughbred hunter, will compete in various classes at the Lancaster Horse Show this weekend. She travelled from Unionville to compete in the annual event.

Travel guide available

HARRISBURG – A concise guide for Pennsylvania tourists is now available free of charge. It is a brochure issued by the Pennsylvania Attractions and Travel Association illustrating the outstanding attractions, arranged by geographic regions. Included is a state map which not only locates the various attractions by number but also shows U.S. and Interstate Routes for the convenience of travellers. State parks and game lands are also indicated as an aid to campers.

One section of the folder consists of full-color photos and brief descriptions of the whole range of approved attractions - caves and caverns, miniature villages, museums, Penn-Dutch farms and homesteads, steam railroads, storybook parks, waterfalls, wild animal farms, and other facation sites. These attractions have endorsed the standards for quality set up by their association and have been accepted by the Bureau of Travel Development of the Pennsylvania Department of Commerce for inclusion in their travel promotion literature.

Copies of this folder may be obtained by writing to Pennsylvania Attractions and Travel Association; Dept. R, Box 801; Harrisburg, Pa. 17108.

Trade treaty will give foreigners incentive to buy U.S. farm land

WASHINGTON, D.C. – Tony T. Dechant, NFU president, on Tuesday urged all members of the U.S. Senate to vote to amend the United Kingdom Tax Treaty (a treaty which allegedly will make it easier for foreigners to buy U.S. farm land). Specifically, Dechant wants the Senate to delete Article 9 (4) or failing that, to reject the treaty.

Article 9 (4) limits the ability of the U.S. state income tax systems to levy taxes upon income earned by the outside interests.

While the Treaty applies only to the United Kingdom, Article 9 (4), if approved, would undoubtedly become a universal provision of future tax treaties. Eventually, this would mean that multinational corporations (grain, oil, land investors, and others) could evade an estimated $500 million in state income taxes, shifting the burden to the remaining local taxpayers.

"We don't need still more foreign money buying up American farms," Dechant insisted.

The delay in Senate action on the Treaty was being attributed to the rising tide of opposition to the Treaty.

"The closer we look at it," said one opponent, "the more we find wrong with it," noting that it will result in a loss of income tax revenues for the state governments, result in a loss of revenue for the federal government, create new incentives for the export of plants and jobs, create a tax break for foreign flag ships, and provide a bonanza for multinational corporations at the expense of farmers, consumers, and taxpayers.

Dechant pointed out that about 20 states have statutes relating to alien ownership of farm land, but that perhaps only a few would prove to be effective. Seven more state legislatures have considered laws to ban alien or corporate farming in the past year.

But, Dechant noted, a Treaty is the law of the land and it can supercede state laws which are in conflict with it. Approval of Article 9 (4) could cause some eventual legal challenges to state laws on alien ownership of farm land, he explained.

One of the most serious aspects of the Treaty is that Secretary Blumenthal has made it plain that he intends the U.K. Treaty to be a model for future trade treaties, including those now in negotiaton with Germany, France, Denmark, and Canada.

Last week the National Farmers Union said that efforts of various states to deal with the problems of alien and corporate invasion of agriculture are hindered by the difficulty of discovering the real owners of purchased land. The acquisitions are often concealed through brokers, trustees, or corporate fronts, he added.

The Farmers Union statement deplored a universal official ignorance of the facts.

"This trend will accelerate if the reports of widespread land purchases by foreign investors continues to persist," the NFU told the U.S. Senate Commerce Committee.

Tony Dechant

It was expected that the Senate would begin debate on the United Kingdom Tax Treaty (Executive 94-2) on May 8. The treaty did not come up and speculation is that action might be put off until after action on the Labor Reform Bill is completed late this month.

Unusually late strawberry season seen

(Continued from Page 1)

as a thumbnail. He hopes to pick the first fruit about two weeks from today, but added that if the weather stays cool, it could be later. What he would like to see, weatherwise, is lots of sunshine and air for his crop.

Carlton Groff, of Kirkwood, noted while he doesn't expect a "boomer crop" of strawberries, he would hope for a good one. He thought the strawberries came out of the winter better this year and the moisture content is higher than last year's, but again stressed that the berries will be late. He thought he might have berries by June 1.

One thing Groff related was that if the week of June 1 to 7 is anything like the week of May 10 to 17, most of the strawberry crop can be written off as a loss. Wet weather would complicate things then, and disease could hurt the crop if the wet weather continues into harvesting time. But, right now, he added, disease is under control. All he would like is some sunshine.

"The stalks look healthy," Melvin Eby, a strawberry grower from Manheim noted. "It should be a good crop but mine will be a full two weeks late."

The farmer went on to say he hadn't had any real problems this year with frost because he doesn't grow the early variety of strawberries. He hopes to pick his first of the season in about three weeks.

And Bob Gooding, from the Masonic Homes Orchard Department at Elizabethtown, spoke of a fair crop. He was afraid that too much rain may have hurt the blossoms and when spoken to, was leaving shortly to check the crop.

"With too much rain, you get pollination problems too," he stated. "I know we've been hurt some, but I still expect a fairly good crop. The bees are ready to go in now."

He stated that it would be another three to four weeks before the strawberries would be ready to be picked.

Commercials available

PARK RIDGE, Ill. – Duplicate copies of American Egg Board's television and radio commercials are now available to egg producers and others interested in incorporating them into local or regional advertising programs.

Producers may also obtain duplicate tapes containing only the background music used in the radio commercials, according to Dee Munson, AEB director of advertising.

AEB has payed the required talent fees and only the cost of duplication will be charged to the user, Munson said.

Duplication costs for tapes of the radio commercial background music will be ten dollars for each copy requested.

Costs for duplicating the television and radio commercials will vary, depending on whether video tape cassette or reel is needed.

"We will be happy to furnish exact price quotations once we know what type of duplicate tape is needed," Munson said.

Requests for tapes or additional information should be directed to Munson at AEB, 1460 Renaissance, Park Ridge, Ill. 60068.

"Let us never forget that the cultivation of the earth is the most important labor of man."

xxx

The size and diversity of the regulated for-hire motor carrier industry is reflected in the numbers of individual carriers – 16,472 companies, of which 13,000 are relatively small concerns, grossing less than $500,000 a year. Revenues earned by the industry in 1977 totaled an estimated $30 billion and an increase in the neighborhood of six to seven per cent is expected in 1978.

Amos Funk Speaks

(Continued from Page 40)

it's truthful and accurate," he concluded.

Similar comments can be heard from others who know him. Funk has served on numerous committees and received nearly an equal number of awards.

The Lancaster County conservationist and farmer served as an advisor for agricultural land use to Governors William Scranton and Raymond Shafer and is a member of an agricultural advisory council at Penn State University. In addition, Funk is chairman of the National Association of Conservation Districts' research committee for the Northeast and a past president of the Pennsylvania Soil and Water Conservation District, Inc. The Lancaster Countian is also a past president of the Pennsylvania Vegetable Growers Association and the Conestoga Valley Association, of which he is a charter member.

The recipient of the Keystone Chapter Award from the Soil Conservation Society of America, and the first Manor Township citizen to receive the prestigious "Service to Mankind Award" from the Penn Manor Sertoma Club, Funk is also active as an advisor to several private organizations. Whenever someone wants to discuss land use and conservation, Amos Funk is likely to be on the program.

Funk has received honors from the American Conservation Society, the Lancaster County Conservation District, and numerous other organizations – all because he believes wise land use is essential for the continued well-being of mankind.

In a separate article appearing below, Amos Funk details why he believes in soil conservation.

Meat import bill approved

WASHINGTON, D.C. – The U.S. Senate last Friday approved legislation which would amend the 1964 Meat Import Act to reduce meat imports when domestic supplies are heavy and increase them when domestic supplies are light. The bill was introduced by Senator Lloyd Bentsen (Texas) and had 28 co-sponsors. Attention now turns to the House where there will be a hearing in a Ways and Means subcommittee on a total of 76 bills dealing with meat imports. Senator Bentsen this week urged the chairman of the House Ways and Means Committee, Rep. Al Ullman, to expedite House approval of the Senate bill.

Get fresh cows off to a fresh start with WAYNE FRESH 'N WORM

Now you can give your cows super nutrition and safe worming all in one unique first-feeding product - Wayne Fresh 'N Worm.

Just pour out the 5-lb. bag for her vital first meal right after calving. You'll help her recover fast from calving stress. And you'll give her a gentle yet thorough worming. You'll often see milk production jump three to four percent, too.

Tasty Fresh 'N Worm is loaded with a special protein, energy and vitamin combination designed specifically for the fresh cow's needs. It also contains Wayne's chelated minerals for quick availability.

Ask one of the Wayne Feed dealers listed below about Fresh 'N Worm. And about Wayne Super Livestock & Dairy Spray, the special ready-to-use, fast knockdown, residual insecticide. It contains Vapona and Ciodrin for the control of flies and mosquitoes.

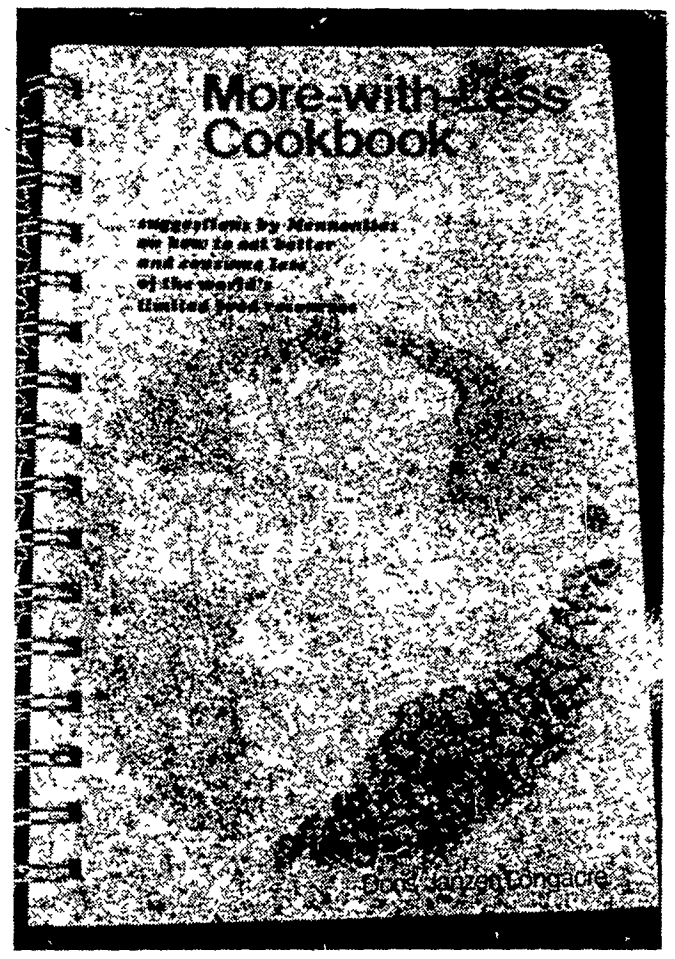
HOMESTEAD NOTES

Doris Longacre works at her desk at the Mennonite Central Committee office in Akron. Here the thousands of recipes were perused, filed, and selected for testing for use in the cookbook.



You can eat more with less

By SALLY BAIR
Staff Writer

LANCASTER – With gardens growing and the fresh fruit and vegetable season approaching, Lancaster countians will soon be eating their way through the abundance which the "Garden Spot" produces annually. Good food - and good eating - comes naturally in this tiny portion of the world.

In other places, however, abundant food is lacking; indeed, even adequate food is not available and the result is hunger, and the extreme, starvation. World hunger is remote to most of us in the "Garden Spot," but it is a continuing problem.

Doris Janzen Longacre feels that each family can show a healthy concern for the world food crisis by using less, and she has edited a unique cookbook, offering helpful suggestions and thrifty recipes to those who are concerned about dwindling resources. Her cookbook, called "More-with-Less," was commissioned by the Mennonite Central Committee and shows that less can be more in terms of enjoyment and fulfillment.

Doris edited the book: many others contributed and tested. Almost all of those involved have already committed themselves to more thrifty eating habits.

Mrs. Walton Hackman, 2701 Funk Road, Hatfield, recalls that the cookbook grew out of sharing a picnic table and many pot luck meals. Karin and her family were neighbors to Doris Longacre in Akron, with adjoining yards. "We thought then 'Wouldn't it be nice to teach people to be more conscientious about food?' The book was born around that table."

Doris says the cookbook is designed to help people learn to conserve food, use better nutrition, retain a spirit of creativity in their cooking and to conserve energy. She said it takes a new look at our eating styles and helps Mennonites (and others) conserve food, rather than simply focus on ethnic cooking.

The first four chapters of the book are devoted to helping people understand the philosophy behind "more with less."

"It is really a philosophy of using food. Most letters we get indicate that the first four chapters are much more important than the recipes. Many letter say 'We are having fun trying to eat more simply. We feel we have better nutrition.'"

A home economist, Doris tested many, many recipes for the book.

She said, "My husband Paul is very adventuresome in his eating, so that was an extremely important bonus. We have lived in two countries - Viet Nam and Indonesia - and to us trying a new food is like reading a new book. We enjoyed a lot of the recipes." Her two daughters, Cara, 12, and Marta, 10, also shared in the testing. Doris explained, "We have always encouraged them to try new things, telling them they will miss a lot in life if they don't."

Rod and Mary Lou Houser take bananas from their newly assembled dehydrator.

Doris says she feels people today are much more aware of good nutrition. The rate of death from coronary heart disease is dropping, something she credits to improved diets with less fats and sugars, and more exercise.

There are two things about which she is pessimistic: television commercials, most of which are not directed to good nutrition, and the ever increasing consumption of energy.

She said, "I don't know what it takes to convince people. We could still maintain quality living with a decrease in consumption." She cited Norway and Sweden as countries who have decreased their energy consumption because they have worked harder at it than we have."

It is sometimes difficult for people to see a relationship between their eating less and a hungry person being fed. Doris said, "Of course, the waste left on plates will not go to any hungry person. My response is that it is too late when the food is on the plate. We should not cook as much and should not put as much on the plate." Another thrust of the book she said, "If we spend less on our own food and eat food which is less expensive, we will have more to give to projects which help hungry people."

Another point Doris makes is that most North Americans think everything comes from here. In reality, much of the food we eat is imported. "A lot of Winter vegetables are grown in Mexico where land and wages are cheap. Even some beef is imported from countries like Haiti, Brazil and Honduras. The land should be used for food for those countries, not for export for this country. We need to rely more on our resources and allow others to rely on their resources."

Doris said she feels a strong plus in this section of the country is the large amount of direct marketing between farmers and consumers. "This is great - communities need to eat food which is raised locally. This area should work very hard to retain the locally-owned food markets."

Mrs. Lloyd Lefever, (Miriam) 5850 Main Street, East Petersburg said that finding recipes to submit for testing was no problem. "That was the way I was brought up - my mother really stretched things. It's my way of life. Being thrifty is a part of our Mennonite background. We're frugal."

Miriam admits to having lots of "little tricks" which she uses all the time to make her cooking nutritious and economical.

"For instance, don't remove the skins on potatoes - just scrub then well and cook them. That's the secret to keeping in vitamins."

She said that when she cooks chicken for deboning she always cooks the bones and the skin again. The resulting broth may be thin, but it is perfectly adequate for stock.

While most of the testers for the recipes were home economists by profession, Miriam is not. She said, "I enjoy cooking and learned in my 30 plus years of experience." Testers were asked to try a recipe the first time exactly as it was sent in. Only on the second try could they improvise and add to or change to make it more to their liking. Miriam said, "It was hard for me not to change them the first time because of my upbringing with mother." She found the testing fun, and said, "My husband was very kind. Some recipes we really liked and some we didn't."

Miriam clips many recipes and likes to collect cookbooks which have the potential of becoming collectors' items. Because of her abilities and interests, she was co-editor of the Black Rock Retreat Family Favorites Cookbook. She is a member of the East Petersburg Mennonite Church.

About the "More with Less" cookbook she said, "I think this cookbook helps us adjust our own thinking. When we use less, it makes us more compassionate to those who don't have."

Mrs. Rodney (Mary Lou) Houser, Lancaster R6, agrees, "It's a responsibility to use our resources wisely." The Housers live on a 20-acre farm and rent apartments in their huge brick farmhouse.

"We try to be self-sufficient," Mary Lou said, and admits readily that her spending and eating habits have changed since the early days of marriage. "We have eliminated junk food and try to substitute dried fruits, raw vegetables, and fresh fruit. We love baked things, but I try to halve the sugar."

Mary Lou said she learned her cooking ability "by osmosis" as the oldest girl in a family of nine on their Montgomery County dairy farm. It was a pleasure for her to search out recipes to submit to the cookbook.

"I enjoyed experimenting with the family and I liked being able to send in the family favorites."

She is an improviser and says she often substitutes whole wheat flour for part of white flour in a recipe, or adds wheat germ or powdered milk.

She was excited about the cookbook idea, adding, "We practice a lot of things which were written about. A lot more people would, too, if they knew how." She said that both she and her husband were raised on farms, in the midst of abundance, adding, "The hunger problem was so remote then." But she is obviously pleased as she relates changed eating patterns in her family, saying, "We reinforced each other."

You can eat more

(Continued from Page 50)

Mary Lou says their shift to a simpler cooking style happened gradually. "When I stopped teaching, I had more time and one thing led to another. A lot of it came from the reading we were doing. Now we are oriented to living more simply."

The Housers have a large garden, an orchard and berries and preserve their food in a variety of ways, including a large new dehydrator for drying foods.

Her husband Rod said, "I always liked the idea of organic food, but I don't think we find the answer there. You can get wholesome, well-prepared food and good nutrition from basic ingredients."

One thing the Housers practice in their nutritional habits is purchasing grains in bulk. They bake their own bread and make their own granola so they can use large quantities.

"We get all our flours at the mill, and it is definitely cheaper than at any supermarket," Mary Lou states. Rod cautions, "Sometimes when you buy packaged things from health food stores you're really getting "more for more." Health food stores are a source of some beans and products which aren't available at supermarkets. Rod bakes bread every Saturday morning.

Mary Lou, who teaches art on a part-time basis at Lancaster Mennonite High School, says when she began reading about a more natural way of life she realized that some authors contribute to an elitiest way of eating which requires a lot of energy and a lot of money.

"There's got to be a balance in eating responsibly" Rod acknowledges with a laugh, "We're not purists We like steak, too, sometimes." And their daughter Amy, 8, enjoys an occasional potato chip. They also have a son Ted, two.

As part of their simpler lifestyle, Rod sometimes bicycles to Lampeter-Strasburg High School where he teaches science. They drive two small cars, out of necessity since they are both working, and, Mary Lou adds, "I try not to be as fashion-directed. We wear something until it wears out."

Miriam takes a break and looks through the More-with-Less Cookbook, to which she submitted recipes.

Mary Lou and Doris agree about the negative influence of television commercials. Mary Lou says, "The desire to change has to be there. The motivation for changing has to be external and people must be aware of the need."

The Housers are members of the Akron Mennonite Church which most of their friends attend. Most have also contributed to the cookbook and share the philosophy.

Another cookbook contributor, Mrs. David King, Cochranville R2, said she has heard many good remarks about it.

"Young mothers like the economical recipes and ones which they don't have to go out and buy all new ingredients for. My family really enjoys the recipes." She said she likes the savings many of the recipes offer, "For instance, I purchase one bottle of fresh dressing, and then I have the bottle and make my own dressing."

Karin Hackman may sum up the philosophy of the book best when she says, "I like the attitude of the book, the sacredness of food and life and sharing. I don't know any other book that puts it in that perspective."

Pa. milk production up

HARRISBURG – Milk production in Pennsylvania during April 1978 totaled 671 million pounds, up one per cent from a year earlier according to the Crop Reporting Serivice.

The number of milk cows in the Commonwealth during April was 699,000 head, down 4000 from a year earlier. Milk production per cow averaged 960 pounds in April, up nearly two per cent from a year ago.

United States milk production during April 1978 totaled 10,686 million pounds, down one per cent from a year earlier. Production per cow averaged 982 pounds in April, up one per cent from a year ago. Milk cows on farms totaled 10,833,000 head, down one per cent from a year earlier.

April milk price to be $9.60

NEW YORK, N.Y. – Dairy farmers supplying milk plants regulated under the New York - New Jersey marketing orders during April will be paid on the basis of a uniform price of $9.60 per hundred pounds or 20.6 cents per quart. Market Administrator Thomas A. Wilson, who announced April's price, also stated that the uniform farm price was $9.65 per hundredweight in March 1978 and $9.02 per hundredweight in April 1977. The uniform price is a marketwide weighted average of the value of farm milk used for fluid and manufactured dairy products.

The seasonal incentive fund (Louisville Plan) removed a total of $2,600,985.50 or $.30 per hundredweight from the dairy farmers' uniform price for April. Deductions for this fund will continue through June and will be returned in the August through November uniform price calculations.

The total amount of milk received from the 17,934 dairy farmers supplying the New York - New Jersey Marketing Area was 866,995,167 pounds during April 1978. This was more than 23.0 million pounds above last year. The gross value to dairy farmers for milk deliveries was $84,783,111.52. Mr. Wilson explained that this included differentials required to be paid to dairy farmers but not voluntary premiums or deductions authorized by the farmer.

Regulated milk dealers (handlers) utilized 371,837,364 pounds or 42.9 per cent of the total amount of milk for Class I. The Class I milk is used for fluid milk products such as homogenized, flavored, low-test and skim milks. For April 1978, handlers paid $11.25 per hundredweight, or 24.2 cents per quart, for the milk used in Class I products compared with $10.56 a year ago.

The balance of the milk, 57.1 per cent, was used to manufacture Class II products including butter, cheese, ice cream and yogurt. For this milk the handlers paid $9.15 per hundredweight.

The uniform price is based on milk containing 3.5 per cent butterfat. For April 1978, a differential of 12.1 cents was applied to the price for each one-tenth of one per cent that the milk tested above or below the 3.5 per cent standard.

All prices quoted are for bulk tank milk received within the 201-210 mile zone from New York City.

George H. Wolf

Wolf elected to bank advisory board

STEWARTSTOWN -- George H. Wolf, president of Wolf Farms, Inc., Stewartstown R2, has been elected to National Central Bank's Red Lion/Stewartstown Advisory Board.

A Stewartstown resident, Wolf also serves on the boards of the Pennsylvania Potato Growers Cooperatives, Harrisburg; the Potato Research Board, Harrisburg; and the Production Credit Association, York.

The new bank director was a recipient of the Pennsylvania Master Farmer Award in 1972, and he served as president of the York County Chapter of the Pennsylvania Farmer's Association in 1972-73.

Vine crops have special needs

UNIVERSITY PARK – Vine crops (Cucurbits) including cucumbers, muskmelons, pumpkins, squashes, and watermelons, are generally considered warm-season crops.

Most of these vine crops require soil temperatures of at least 55 degrees F. However, below 60 degrees F. growth is slow. All vine crops are stunted by chilling temperatures (about 33-45 degrees F.) and are readily killed by frost, says experts.

Vine crops can be grown on most fertile well-drained soils. Generally, the soil should be mellow and hold sufficient water for crop production and yet able to drain excessive water rapidly. Low areas surrounded by timber or by higher land on all sides should be avoided since such sites usually lack good air and water drainage and warm too slowly during Spring.

All vine crops except watermelons grow best on soils with a pH of 6.2 to 6.8.

Watermelons will grow well on soils with a pH of 5.5 to 6.8. Magnesium seems to be especially important for all vine crops. If a magnesium problem exists which has not been corrected by Fall-Winter applications, a Spring application of either dolomitic limestone or a straight magnesium carrier such as magnesium sulfate (Epsom salts) may still be beneficial for the current year's crop, especially on cucumbers and watermelons.

All vine crops except watermelons require approximately the amount of nitrogen supplied by 3½ pounds of 5-10-5 fertilizer applied per 100 square feet.

Watermelons should receive no more than the nitrogen contained in 1½ to 2 pounds of 5-10-5 fertilizer per 100 square feet.

Also, stripped and spotted cucumber beetles should be controlled. This is because they transmit the most common disease of cucurbits, Bacertial Wilt.

Bacterial Wilt causes a sudden wilting and collapse of plants. Good control measures include the use of hotcaps to keep beetles from chewing on the very susceptible young plants and using recommended insecticides starting the day of seeding or transplanting and continuing once a week until the plants bloom.

Flower arranging course open

UNIVERSITY PARK – Flowers are for your enjoyment. And chances are you'll want to use some of the ones from your garden in a floral arrangement soon – so you can enjoy them indoors as well as outdoors.

A guide for flower arranging is a home study course, "Flower Arrangement," from Penn State University. In addition to giving directions for making attractive arrangements, the course has information on drying flowers and instructions for making corsages from your garden flowers.

To get the course, send you name and address with $4 to Flower Arrangement, Box 5000, University Park, Pa. 16802. Make check or money order to Penn State. Ask about prices for group study.

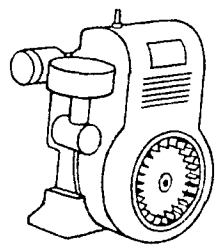
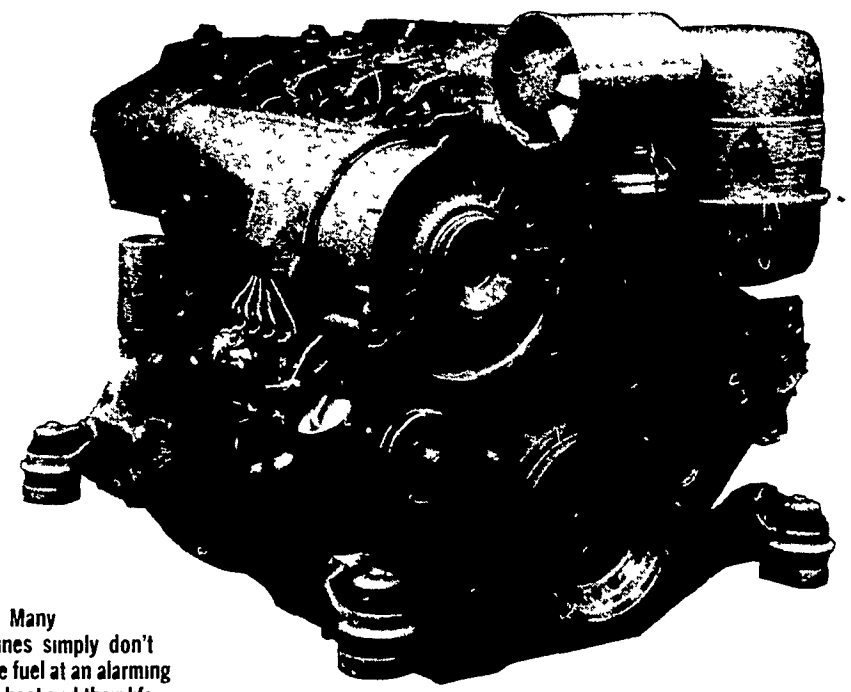
All air-cooled engines are NOT created equal





It's easier to call an engine "heavy duty" than it is to build it that way Many carburated "heavy duty" industrial engines simply don't deserve the title. They consume expensive fuel at an alarming rate they are prone to break down or overheat and their life expectancy is measured in hundreds of hours If any engine in the world qualifies as heavy duty, it's Deutz Deutz engines are often chosen to power equipment with unit price tags over half a million dollars—that's heavy duty

When it comes to cooling efficiency, the Deutz precision-engineered axial-flow cooling air blowers have no equal This direct approach to cooling (without coolants, additives, cavitation) means our engines need only about 60% of the air volume liquid-cooled engines require Combustion efficiency is greatly improved by higher head temperatures and engine life is extended by cooler oil temperatures

If you think air cooled engines are prone to overheat, talk to Deutz users in the scorching heat of the Imperial or San Joaquin valleys There, Deutz engines deliver more than 20,000 hours of trouble free service before a major overhaul

There are lots of things that separate Deutz engines from water-cooled and other air-cooled engines Things like blower design, big lube oil coolers, oil-cooled pistons, special alloy cylinder heads, a research and development team of more than 1,000 engineers These are all important advantages Still we say. If you can find an engine that uses less fuel than a Deutz—buy it

Representing Carroll County dairy farmers during the annual commodity princess pageant were, from left: Miriam Hess, Beth Bassler, newly crowned princess; Robin Graybill, 1976 princess; Virginia Powel, alternate; and Loretta Muller.

Carroll County selects dairy princess

JOYCE BUPP
Staff Correspondent

WESTMINSTER, Md. — Brown-haired, brown-eyed Beth Bassler was crowned the 1978 Carroll County, Md., Dairy Princess on May 12 during the annual pageant held at the county's Ag Center.

The 17-year-old daughter of Mr. and Mrs. Robert Bassler, New Windsor R2, is active in 4-H dairy projects and exhibits her Holstein animals in area dairy competition. She's received top 4-H recognition for cake decorating, crafts projects, and photography. An accomplished seamstress, the new princess made the gown that she wore during the pageant competition.

Beth will graduate in June from Francis Scott Key High School, where he activities include membership on the volleyball and softball teams, the cheerleading squad, chorus, band, and treasurer of the student government association.

A member of St. Luke's Lutheran Church, Beth sings in the choir, teaches Sunday school and works with the youth group. She plans a career in nursing and will begin studies at West Virginia Wesleyan College in September.

Runner-up in the pageant was Virginia Powel, daughter of Mr. and Mrs. William Powel, Union Bridge R1.

A junior at McDonough School, Virginia hopes to study veterinary science. She's a member of the newspaper staff, hockey team, and ecology club.

The owner of two Guernsey animals which have competed at national show level, Virginia takes part in youth dairy acvities through both 4-H and FFA. She is a member of the Pipe Creek Meeting, Society of Friends.

Other entrants in the pageant were Loretta Muller, daughter of Mr. and Mrs. Henry T. Muller, Westminster, and Miriam Hess, daughter of Mr. and Mrs. George Hess, New Windsor.

Master of ceremonies for the annual dairy event was Nona Schwartzbeck, Montgomery County dairy wife. She and her husband, Joseph, operate the Peace and Plenty Farm, Union Bridge R1. David Grigg provided entertainment during the evening program with guitar and vocal selections.

Judges for the pageant were Pepper Armacost, Upperco, Md., and Mrs. Leroy Bupp, Seven Valleys, Pa., both dairy farm wives, and Max Buckel, Baltimore County Extension agent.

MAGNESIUM DEFICIENCY

IS IT A PROBLEM ON YOUR FARM?

IT HAS BEEN ESTABLISHED THAT THERE ARE PERIODS IN WHICH AN ANIMAL'S REQUIREMENTS FOR MAGNESIUM MAY BE INCREASED BRIEFLY, THEY ARE

1) ADVANCED PREGNANCY — The intake must supply Magnesium for two animals
2) EARLY LACTATION — During this period a 2-day flow of milk will remove all of the Magnesium in the blood
3) HIGH NITROGEN LEVELS IN FORAGES AND HAY — This is caused by heavy nitrogen fertilization and is believed to be more pronounced where there is an imbalance in the phosphorus and calcium content of the plant.

TO AID THE FEEDER IN COMBATTING THIS CONDITION OF MINERAL IMBALANCES, SEA BOARD OFFERS IT'S Mg14

Mg14 is a supplemented mineral feed containing 14% MAGNESIUM and all other major and minor mineral elements, salt and vitamins to efficiently balance the nutrition cattle obtain from the pasture

For more information concerning this valuable Mineral Supplement, and for all your Mineral and Ingredient needs, CONTACT YOUR LOCAL FEED DEALER

On being a farm wife

—*And other hazards*

By JOYCE BUPP

Drip. Drip. Drip. Drip.Drip. Drip. Drip.

That's the sound of a farmer tearing his hair out.

Or, at least it has been around here as the rain continued to pour down and the bags of seed corn sit idly gathering dust in the shed.

While farmers can grapple with bugs, diseases, undependable market conditions and bureaucrats, weather stands as the unconquerable barrier. And, rain, it seems, is either too much, too little, too early or too late.

The mood of a rained-out farmer often resembles the gray leaden skies overhead. There's manure to be hauled, ground to be plowed, acres of seeding to be planted and alfalfa to be cut for livestock feed.

The list of must-be-done field work grows for each and every day that machinery sits idled in the barn. Every day of prolonged, dreary weather in the midst of the field work season represents dollars disappearing into the heavy mist.

Experienced farm wives have come to dread lengthy periods of rain. The delays of planting, or harvesting, have been known to put some farmers in less-than-ideal frames of mind.

The frustrated agriculturist may spend this time delivering livestock to market, cleaning out pens, rearranging a cluttered shop (I've never heard of an uncluttered one), or running all over the county picking up parts. Beware of his making trips to pick up parts; farmers have fallen under the spell of a shiny new piece of equipment at times and are especially susceptible when the weather frees them from the constant pressure of just keeping the old machinery running.

If, however, he chooses to spend his rain-vacation in the house catching up on book work or telephone business, you may discover him raiding the cookie jar and spreadingpapers across the kitchen table, where you planned to cut out a new pattern. Should it happen, enjoy the advantage of this sudden burst of togetherness. Hand him the list of household repairs that have gone untouched for the last six months.

And just as soon as the winds blow across the hills and the sun beams its warm golden beams again, he'll magically be transformed into the smiling dust-covered, weary stranger who only ever shows up at the house at mealtime.

Ida's Notebook

Ida Risser

I'm back to discussing old books again. This book was printed in 1835 and is a "Dictionary of General Knowledge." In leafing through it, I was amazed at some of the definitions.

Here is a sampling of some of them: Adult - "A person between ages of 14 and 25;" (I wonder what you were after that?), Apple - "a well known fruit from which cider is made;" Bag - "a name given in derision to German rye bread, signifying, good for nothing;" Cat's Head - "large kind of apple;" Cauliflower - "the finest sort of cabbage with a seeded head;" Celery "a sort of parsley used in winter salads;" Thistle - "a prickly weed that infests corn fields."

Actually though, I learned a lot from the book and was surprised at the complete scientific knowledge contained in it. I didn't know a coloquintida is a bitter apple and a blast is a blight, etc.

xxx

The weather really does affect our moods more than we realize. On a rainy dismal day when things go wrong, we tend to magnify them. On such a day I was trying to type up a year's program for our 4-H Community Club from suggestions given by the officers and leaders. Well, things just did not gel. Tours had to be taken in the daytime instead of the evening I was told. Some places where we planned to visit were too busy and others were closed for vacations. Nothing seemed to work out right.

Then another day comes along with the sun shining and a bright red cardinal sitting among the tender green leaves of our apricot tree and the phone rings. It is our son at Penn State calling to catch up on the news and tell us about his doings. If your husband comes in from the barn and suggests that you go out to eat lunch (just when you were pondering what to make), then it seems like a day really worth living. That garden and yard will just have to wait a bit for attention.

CONSUMER GUIDELINES

Always refuel lawn mowers outside to reduce the risk of fire The engine should always be cool when refueling Store mower fuel in a sturdy container with a tight cover—never store in a glass container

Farm Women Societies

Berks Co. Society 4

The monthly meeting of Berks County Farm Women Society 4 was held at the home of Georgeanna Fullerton on May 2. There were fourteen members present.

After reading a report from Hamburg, the group decided to sponsor a handicapped child going to camp for one week during the Summer.

This was the group's safety meeting. Program was given by Lowell McMullen, followed by a questions and answer period.

The June 6 meeting will be hosted by Jean Waldo.

Berks Co. Society 9

Berks County Farm Women Society 9 met on May 3 at the home of Mrs. Pat Haas, Weavertown.

Ten members were present to hear a program by Pat DiRienzo from the Council on Chemical Abuse. She explained what the organization is doing to fight both drug and alcohol abuse.

Current projects for the club include sending three patients from Hamburg State Hospital to camp this Summer and the planning of a hoagie sale in July.

The group's next meeting will be on June 7 at the home of Mrs. Joan Hafer Weavertown. Everyone is t bring their favorite desser using milk or milk products.

Dauphin Co. Society 1

Dauphin County Farm Women Society 1 entertained Society 10 on May 9 at the Conewago Elementary School. Mexican style food was served and Mrs. Tom Williams showed slides of their recent visit to Mexico City with the Friendship Exchange.

Society 10 ladies were greeted by Society 1 President Pat Baum. Each guest received a planter to take home.

A short business meeting followed with a discussion of Londonderry Township's invitation for Society 1 to participate in Londonderry Days over the July 4 weekend.

On June 12, Society 9 will entertain Society 1.

Dauphin Co. Society 16

Dauphin County Farm Women Society 16 held their April meeting at the home of Evelyn Dehmey. After discussing the Spring Rally plans, and finalizing their cookbook preparations, the group proceeded to have their annual country auction with the sale of plants, knick-knacks, and clothes.

On May 23 the group will host Society 8, from Halifax, with a covered dish supper and "Covered Bridges" slide show by Ruth Andrews. The program begins at 6:30 p.m. in the Swatara Hill Church Fellowship Hall.

Lancaster Co. Society 1

A mother and daughter banquet was held on May 12 by the Lancaster County Farm Women Society 1. There were 71 mothers and daughters present at the event which was held at the Brunnerville Fire Hall.

A short business meeting was conducted by president Rachel Bollinger. Committee reports were given.

For a number of years, Lancaster County Farm Women Society 1 has honored two high school seniors with a $25 savings bond. This year's winners were Audrey Ann Hevener for the outstanding home economics award and Steven Martz for the outstanding vo-ag student.

Rhoda Oberholtzer gave the program. Her topic was "Mothers and Daughters in flower design."

The group's next meeting will be June 3 with Amy Brubaker and Viola Wolf acting as cohostesses.

Lancaster Co. Society 21

Recently Lancaster County Farm Women Society 21 met at Shady Maple near Lancaster. Society 10 members were the group's guests.

Several committee reports were given. Hazel Aument reported on the progress of the group's state project "Happiness for others". Vice president Lois Aument reported on the county board meeting.

Program for the evening was "Landscaping with Spring Valley Landscape." Robert Shenk was the speaker. He showed a variety of slides and sketches on landscaping.

Hostess for the evening was Libby Steinberg.

Lancaster Co. Society 22

The May meeting of Lancaster County Farm Women Society 22 was held at the home of Mrs. Harold Ranck, Willow Street, with Mrs. Parke Lefever serving as co-hostess.

The business meeting, conducted by Mrs. Clair Witmer, president, consisted of a donation to the dairy princess and final arrangements for the Spring Rally.

Herb Witmer, State Public Welfare Department, spoke on social services for children. Those mentioned included mental health and mental retardation programs, aging programs and medical assistance programs.

He advised that delinquents usually come from insecure home life or failure scholastically. He urged that people be effective as parents and show affection to their children. It is everyone's responsibility to work in youth groups and established agencies for young people.

Lancaster Co. Society 29

On May 15, Lancaster County Farm Women Society 29 members visited with the residents of Lehman's Nursing Home in Rheems. They sang old gospel favorites accompanied by an accordion and treated them to candy.

A business meeting was conducted in the dining room with President Marty Bixler presiding.

A committee of four were appointed to search for a group project. Meeting was then adjourned with the owner, Betty Lehman, serving refreshments.

June 25 at 12:30 p.m. will be the society's family picnic. It is to be held at Sico Park in Mount Joy with members bringing a hot and cold dish, place settings and lawn chairs. It will be held rain or shine.

Lancaster Co. Society 30

On May 15, Lancaster County Farm Women Society 30 spent the evening at the Hair Brush Barber Salon, Ephrata, Pa.

Will Elser, manager of the shop, and Chris Remlinger, hair stylist, asked for volunteers for a free permanent, hair cut, and henna treatment. Jean Mentzer, from the Jean Mentzer's Beauty Salon, Denver R2, gave make up demonstrations.

Several of the members participated in the demonstrations and went home looking different than when they arrived.

Farm Women Societies

(Continued from Page 56)

The group's next meeting will be on June 26, at 7:30 p.m. at the Farm and Home Center, Lancaster. Society 19 will be entertained at this meeting.

Lebanon Co. Society 5

Kimmerling's Grange Hall was the location of the Lebanon County Farm Women Society 5 May meeting where Lebanon Co. Society 15 and Berks County Society 2 were entertained. Twenty-five members and 45 guests attended.

Speaker for the evening was Mrs. Ruth Dourte, who talked on feelings - good, bad, and indifferent. Several games were also played. Winners were given fresh strawberries and flowers. Refreshments were served.

Society 5 held a short business meeting. A motion was passed to give $5 to the Easter Seals Society.

On May 24, the bus will leave from Hills at 4 a.m. for the tour of the West Mooreland Glass Co. and Bedford Village.

Margaret Light will host the June meeting, members are asked to please bring their wedding pictures.

York Co. Society 7

The York County Society 7 held their May meeting at the Starview Countryside Recreation Building with Mrs. Charles Gallagher and Mrs. Victor Aldinger acting as hostess and cohostess.

President Mrs. Robert Emswiller chaired the business meeting. It was announced that the York County Farm Women's picnic will be held July 26 at the 4-H Center.

Society 7 will entertain Society 27 on July 12 at the Starview's Sportmans' Club at 6:30 p.m.

Poems were read and the group sang songs in honor of Mother's Day. Each member was presented with a pot of flowers. Refreshments were served to the 17 members present.

The next meeting will be held on June 14.

York Co. Society 20

Colonial Rest Home hosted the May meeting of York County Farm Women Society 20, with members holding a birthday party for Mary Gibson, a Society member who is a guest at the home. Program chairman were Ruth Hendrix and Arzula Bose.

Upcoming county activities that the group will take part in include a bakeless bake sale, sponsored by the county council, and the July 26 countywide picnic. Members planning to attend the summer picnic are asked to make reservations with their local representative. An invitation was issued to take part in an October bus trip to Niagara Falls, which is also being sponsored by the county association.

Fifteen crib blankets were presented by the women to York Day Nursery. Construction of the coverlets is an annual project of the group.

During the next scheduled meeting on June 14, the society will host Society 16 from Dover at the New Freedom Lutheran Church, with the program slated to begin at 7 p.m.

York Co. Society 26

The 12th anniversary of York County Farm Women Society 26 was held at the York Valley Inn recently. A buffet luncheon was served to the 21 members and three guests present.

Society 26 also recently entertained Society 34.

During their business meeting, it was announced that four members would help at the York Hospital Fete.

The president's bus trip will be on June 27. Those participating will travel to Harper's Ferry.

Each society is to supply a $3 gift for the York County Farm Women picnic to be held at the 4-H Center on July 26, beginning at 11:30 a.m.

The next meeting of the group will be held at the home of Mrs. Gerald Mansberger, Etters R3. Date for the meeting June 13, starting at 7 p.m. Plans will be made for a youth program meeting.

Giving Is Best?

'Tis much better to give than to receive—and it's deductible. The trouble with some people who give until it hurts is that they are so sensitive to pain

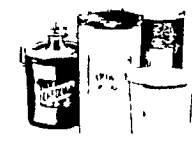
Home on the Range



Now that Summer is coming, a hearty hot supper sandwich could be just the thing for active children in the evenings. This week we have nine such sandwiches to choose from.

Don't forget to send in those dairy recipes for our June 3 Dairy Issure. If you would like to help with out multi-paged recipe layout, send us your favorite recipes by May 26. And, don't forget that this year we will be sending out special gifts to all the contributors that participate.

HAMBURGER HOT DOG BAKE

12 slices bread
Butter or margarine
1 pound lean ground beef
¼ cup catsup
1 teaspoon salt
6 frankfurters
2 medium onions, sliced
6 slices processed American cheese
2 eggs, beaten
1 cup milk

Spread six bread slices with butter; arrange in bottom of greased 13 x 9 x 2 inch pan. Toast in moderate oven (350 degrees F.) for about 15 minutes. Combine beef, catsup, and salt. Spread over toast (⅓ cup per sandwich). Top with frankfurters (cut almost in half lengthwise), onion and cheese slices. Cover with remaining bread slices. Combine eggs and milk; pour over bread. Bake in moderate oven (350 degrees F.) about 50 minutes. Serves six.

Mrs. Anna Mae West
Amberson, Pa.

TOASTY 'WICHES

Bread
Margarine
Mayonnaise
Ketchup
Bologna
Cheese (any kind)
Sliced pickle
Onion (optional)

Place slices of bread on a cookie sheet, buttered side down. Spread with ketchup. Next, cover with sliced pickle, then cheese, onion, and bologna. Top with another slice of bread, spread with mayonnaise on one side and margarine on the other. Turn buttered side out. Set oven on 400 degrees F. Turn to brown sides evenly. In season, lettuce slices may be added after the 'wiches are browned. Use your imagination. Anything can be added. Tomatoes may be substituted for ketchup.

Lois E. Martin
Chambersburg, Pa.

HOT SANDWICHES

5 pounds pork roll
1 pound cheese (any kind you prefer)
1 quart pickles
Mayonnaise

Combine ingredients, adding enough mayonnaise to hold mixture together. Put on buns or bread and wrap in foil. Bake at 350 degrees F. for 15 minutes to ½ hour or until the buns are nicely brown.

Esther Mae Hoover
Ephrata, Pa.

BEEF-EGG SCRAMBLE

¼ pound ground beef
¼ cup chopped onions
2 tablespoons chopped green pepper
½ teaspoon salt
1/8 teaspoon pepper
3 eggs
1-½ tablespoons water
4 hamburger buns, split and toasted

Cook and stir ground beef, onion, green pepper, salt, and pepper until meat is brown and onion is tender. Blend eggs and water; pour over mixture. Cook over low heat just until eggs are set. Lift cooked portions with spatula and turn to cook eggs evenly. Serve in buns. Makes four servings.

Sylvia J. Ruoss
Blain, Pa.

HAM AND CHEESE ROLLS

½ pound boiled ham (cut in bite-sized pieces)
½ pound mild cheese (cut in bite-sized pieces)
⅓ cup minched onion
2 hard-boiled eggs, diced
½ cup olives, sliced
3 tablespoons mayonnaise
½ cup chili sauce
12 split hot dog buns

Mix ingredients all together and stuff into hot dog buns. Wrap in aluminum foil and bake 15 minutes at 400 degrees F

Mrs. Janet Heller
Robesonia, Pa.

HOT TUNA HERO

2 (7 oz.) cans tuna (drained and flaked)
½ cup mayonnaise
¼ cup sour cream
¼ cup chopped parsley
1 tablespoon lemon juice
½ teaspoon garlic salt
1 long loaf French bread
3 tablespoons margarine
¼ pound Swiss cheese, thinly sliced

Combine first six ingredients. Slice bread lengthwise. Spread with margarine. Place cheese and tuna mixture between bread halves. Bake in 350 degree F. oven for 25 minutes. NOTE: English muffins also work very well in place of the loaf of bread, baked with a little less time.

Mrs. Fred Hartlaub
Gettysburg, Pa.

GOOEY BUNS

1 pound Lebanon bologna
¾ pound mild processed cheese
¼ cup prepared mustard
⅓ cup salad dressing
1 tablespoon minced onion
2 tablespoons chopped sweet pickles

Grind bologna and cheese together. Add other ingredients and mix well. Put mixture in buttered hot dog buns. Wrap in foil and bake at 325 degrees F. for 25 minutes.

HAM AND CHEESE SANDWICHES

4 slices Edam or Gouda cheese
4 slices cooked ham
2 eggs
½ teaspoon paprika pepper
1 tablespoon tomato paste
1 tart dessert apple
3 tablespoons all-purpose flour
½ teaspoon salt
3 tablespoons grated cheese
¼ cup butter
Garnish:
Parsely sprigs
Tomato quarters

Cut the slices of cheese to the same size as the ham slices. Peel and core the apple, then slice thinly in rounds. Arrange the apple slices between the four pairs of cheese and ham slices. Mix the flour with the eggs, salt, paprika, grated cheese, and tomato paste. The mixture should be slightly runny. Coat the ham and cheese sandwiches with the egg mixture. Melt the butter in a frying pan and add the sandwiches. Fry for four to five minutes on each side, until well browned. Garnish with parsley sprigs and tomato quarters. Serve hot with a green salad. Serves two to four people.

BANANA BEEF SANDWICHES

3 large tomatoes
1 banana
¼ cup butter
1 tablespoon all-purpose flour
1 teaspoon salt
4 rolls
lemon juice
1 medium onion
8 oz. ground beef, or half beef and half pork
½ teaspoon pepper

Peel and halve 2 of the tomatoes. Slice the third tomato into four. Peel and slice the banana. Sprinkle the slices with lemon juice to prevent them from discoloring. Peel and finely chop the onion. Melt the butter in a frying pan. Add the onion and fry for five minutes. Add the ground meat and peeled tomato halves and fry until the meat is well browned, stirring to break up the tomatoes. Sprinkle over the flour, salt, and pepper and stir well. Cook for one minute longer. Slice the tops off the rolls. Scoop out some of the soft center and fill with the meat mixture. Garnish with the tomato and banana slices and serve hot with a tomato cocktail.

Above two recipes by:
Mrs. James Coombs
Gardners, Pa.

HAM AND CHEESE SPECIAL

16 slices bread (crust removed)
¾ pound grated sharp cheese
1 pound cooked and ground ham
4 beaten eggs
3 cups milk
½ teaspoon dry mustard
Dash salt

Lightly butter 13 by 8 inch pyrex dish. Line with eight slices of bread. Top with ham and cheese. Add other bread. Beat remaining ingredients and pour over sandwiches. Cover with foil. Refrigerate overnight for four hours before baking. Remove from refrigerator. Melt ½ cup butter. Mix with crushed corn flakes. Top and bake for 45 minutes at 325 degrees F.

Mrs. Fred Hartlaub
Gettysburg, Pa.

BROILED TUNA SANDWICH

1 (7 oz.) can tuna fish
¾ cup diced celery
1 cup mayonnaise
½ cup diced sweet pickles
Salt and pepper to taste

Combine tuna, which has been drained, with celery, mayonnaise, pickles, and salt and pepper. Arrange on four slices of white bread on baking sheets. Bake five minutes in 350 degree F. oven or until tuna is thoroughly heated. Top each with another slice of bread and a slice of cheese. Broil three to four inches from heat source for two to three minutes, or until cheese melts.

Mrs. Charles Biehl
Mertztown, Pa.

Junior Cooking Edition

Fun-to-make desserts are the theme of this week's column and a wide variety are included. There are pies, gelatin, and many cakes.

Below you will find chiffon cake, chocolate cake, peppermint angel food cake, broken glass gelatin, chocolate shoo-fly pie, rhubarb pie, and an old fashioned chocolate cake. Pick your favorite or make them all.

More recipes are needed for the dairy issue which is coming up shortly in June. Send your recipes to: **Lancaster Farming,** Junior Cooking Edition, Box 366, Lititz, Pa. 17543. Be sure to include complete directions and your name, age, phone, and address

CHIFFON CAKE

2¼ cups cake flour
1½ cup granulated sugar
3 teaspoons baking powder
1 teaspoon salt
½ cup vegetable oil
5 unbeaten egg yolks
¾ cup cold water
2 teaspoons vanilla
1 cup egg whites
½ teaspoon cream of tartar

Measure cake flour into large bowl. It should be spooned lightly, not packed. Add sugar, baking powder, and salt. Make a well in flour mixture and then add vegetable oil, egg yolks, cold water, and vanilla. Beat until smooth. Set aside.

Whip egg whites and cream of tartar together until it forms very stiff peaks They should be stiffer than for an angel food cake. Pour egg yolk mixture lightly over whipped egg whites, folding with a rubber scraper Stir just until blended. Do not stir Pour into ungreased 10 inch tube pan Bake at 325°F for 55 minutes, then at 350°F. for ten to 15 minutes or until top springs back when lightly touched. Remove from oven and put inside down to cool.

Ellen Zimmerman
Leola, Pa.

xxx

CHOCOLATE CAKE

3 cups brown sugar
4 tablespoons cocoa
lard the size of three eggs
1½ teaspoons vanilla
3 eggs
3 teaspoons baking soda dissolved in vinegar
¾ cup thick milk
3 cups flour
3 teaspoons baking powder
1-1/8 cup boiling water

Cream brown sugar, cocoa, lard, and vanilla together. Add three eggs, baking soda dissolved in vinegar, thick milk, flour, baking powder, and lastly add boiling water Mix well Pour into greased pan Bake at 350°F. for 30 minutes or until top springs back when touched lightly.

xxx

PEPPERMINT ANGEL FOOD CAKE

1 cup sifted cake flour
1 cup sifted confectioner sugar
1⅔ cup egg whites (about 12)
1½ teaspoons cream of tartar
¼ teaspoon salt
1 cup granulated sugar
1 teaspoon vanilla
½ teaspoon peppermint extract
12 drops food coloring

Sift together cake flour and confectioner sugar four times, then combine egg whites, cream of tartar, and salt in a large mixing bowl. Beat until stiff, but not dry. Beat in sugar two tablespoons at a time, mixing well after each addition Add

Ladies Have You Heard

By Doris Thomas

Lancaster Home Economist

FROZENS ARE FRESH

What do you think when you hear the expression, "fresh frozen food?" Do you consider this a contradiction in terms?

Actually, frozen foods are fresh. Fruits and vegetables are picked when they are ripe, not before, and then processed. Meat products are frozen immediately after slaughtering and seafood as soon as the catch is made. Other foods are produced specifically for freezing. Their fresh state is frozen. Modern freezing processes help assure the consumer that the food's color, flavor and texture will be retained when the food is cooked. Freezing keeps to a minimum the loss of nutrients during storage, handling and preparation. Hence, the term, "fresh frozen."

It is an all-too-common tendency, particularly on the part of the consumers, to regard any fresh food as representing perfection in terms of nutritive value, and to regard all processed foods as nutritionally inferior. This is often an inaccurate view, particularly if fresh foods have been stored several days at temperatures **well above their freezing points.** Most foods lose vitamins during any kind of storage.

Fresh frozen, then, is hardly a contradiction but a statement of fact. No food is perfect, and no food processing can make the food more perfect than it is. Freezing, though, can preserve the essence of the freshness which the product would otherwise lose were it not consumed at its point of origin.

DO YOU BUY ON IMPULSE?

Don't blame yourself too much because impulse buying doesn't just happen. It is an impulse reaction provoked by marketing experts teamed up with psychologists who engage in what is called motivational research - which means getting the consumer to buy a product because it has a pretty package or intriguing shape.

Industries spend hundreds of thousands of dollars on these techniques. They know what effect colors have upon the consumer and why one label or one package catches your eye and tempts you to buy one over another.

So, you really don't have much chance unless you build your defenses and learn to control impulse buying by applying the following defenses:

*Shop with a plan: Set a budget for all of your shopping; then draw up lists and make yourself stick to them.

*Think it over: Before you make any major purchase, think the matter over carefully. If possible, wait a day or two after the idea strikes you.

*Be informed: Knowledge is power. Be up-to-date about prices, quality, store reputations, labels and brands.

*Learn to spot the tricks designed to catch your eye. Ask yourself two questions: Do I need it? Can I afford it?

*Understand influences children have on buying habits. If they are shopping with you, learn to keep their wants in perspective.

*Don't be afraid to put things back on the shelf or return them once you have bought them.

Junior Cooking Edition

(Continued from Page 58)

flour mixture in four parts, folding about 15 strokes after each addition. Divide batter in half. Fold vanilla into one half of mixture. Fold peppermint extract and red food coloring into other half. Drop batter by alternate spoonfuls in an ungreased 10 inch tube pan. Pull metal swirling gently through cake. Bake at 325°F. for 50 minutes or until done.

xxx

BROKEN GLASS GELATIN

3 small packages flavored gelatin-red, green, and orange
½ cup boiling water for each package (total 4½ cups)
1 cup pineapple juice
½ cup water
¼ cup granulated sugar
1 package lemon gelatin
1 cup whipped cream

Mix red, green, and orange gelatin with boiling water, mixing each in a separate pan. Pour into bread pans or long cake pans. Let cool. In another kettle, mix pineapple juice, ½ cup water and ¼ cup sugar. Bring to boil and mix in lemon gelatin. Let cool. Chill until it is like unbeaten egg whites. Mix one cup whipped cream in with lemon gelatin mixture.

Cut red, green, and orange gelatin into squares. Fold into lemon gelatin mixture. Must be done quickly. Chill until serving.

xxx

CHOCOLATE SHOO-FLY PIE

2 cups brown sugar
1 cup vegetable oil or lard
2 eggs
4 tablespoons cocoa
2 cups molasses
2 cups hot water
2 teaspoons baking soda
2 teaspoons vanilla
¼ teaspoon salt
½ teaspoon cinnamon
4½ to 5 cups flour

Bottom part:

2 cups granulated sugar
2 tablespoons cornstarch
2 tablespoons cocoa
butter - the size of a walnut
2 cups water
2 eggs

Cream together brown sugar, lard or cooking oil, 2 eggs, and 4 tablespoons cocoa. Add molasses, hot water, baking soda, vanilla, salt, cinnamon, and flour. Mix well. Set aside. Mix ingredients for bottom part of pie, forming chocolate pudding. Pour bottom mixture into unbaked pie shell, then pour top mixture over it. Bake at 350°F. for 35 minutes or until done. This recipe makes four pies.

Kurvin John Fox
Age 9
Ephrata, Pa.

xxx

RHUBARB PIE

2 tablespoons butter
2 cups rhubarb
½ cup water
1¼ cup granulated sugar (divided)
2 tablespoons cornstarch
1/8 teaspoon salt
2 egg yolks, beaten
¼ cup cream or rich milk
2 egg whites

Melt butter, add rhubarb, water, and one cup sugar. Cook slowly until tender. Combine remaining sugar, cornstarch, salt, egg yolks, and cream. Add to rhubarb and cook until thick. Put in baked pie crust, use egg whites as meringue.

This recipe may be used as a pudding. Fold in the beaten egg whites when rhubarb is taken from the stove. Chill.

Age 13
New Holland, Pa.

xxx

OLD FASHIONED CHOCOLATE CAKE

2½ cups flour
2 cups granulated sugar
½ cup cocoa
2 teaspoons baking powder
½ teaspoon baking soda
½ cup shortening
½ cup milk
1 teaspoon vanilla
1 teaspoon salt
3 eggs
1 cup water

Sift flour, sugar, cocoa, baking powder, and baking soda. Add shortening, milk, vanilla, salt and eggs. Beat until fluffy. Add water. Mix well. Pour into greased cake pan. Bake at 350°F. for 30 minutes.

- RAISE CALVES -

WITH FEWER LOSSES, LESS LABOR, AND LOWER OVERALL COSTS PER ANIMAL

NEW LIFE SAVING CALF RAISING PROGRAM SWEEPING THE COUNTRY

"Feed Your Calves Outdoors"

Fresh air and sunshine environment now recommended by many leading agricultural colleges, nutritionists, veterinarians, and calf raising specialists. It has proven itself in better calf health with fewer losses and now with the new Nurs-Ette Feeding Program it can also be lower cost and considerably less labor. You can utilize your present inside group pens, free stalls, hutches, old buildings or shelters. In most cases your present facilities for raising calves can be adapted to the fresh air program.

Simple and Successful

1 - COLOSTRUM AT BIRTH AND FOR NEXT TWO DAYS.
2 - NURS-ETTE STARTER MILK REPLACER FORMULA FOR A WEEK.
3 - NURS-ETTE GROWER MILK REPLACER FORMULA TO WEANING.
4 - WEAN TO GRAIN WITH NURS-ETTE MILK REPLACER PELLETS.
5 - GOOD MANAGEMENT, DRY AND DRAFT FREE SHELTER.
6 - PLENTY OF FRESH AIR AND HEALTHFUL SUNSHINE.

IT WORKS!!

The Nurs-Ette method of feeding is natures way — free choice nursing just like the calf running with the mother cow.

FOR FULL DETAILS OF THIS NEW CALF RAISING METHOD THAT IS PROVING VERY SUCCESSFUL, WRITE TODAY FOR FREE INFORMATION AT NO OBLIGATION. JUST FILL IN THE COUPON AND MAIL TO ADDRESS BELOW.

Warmer weather needed for field work

HARRISBURG – Five days were suitable for fieldwork in Pennsylvania during the week ending May 8, 1978, according to the Pennsylvania Crop Reporting Service. Rain late in the week halted fieldwork but was welcomed by farm operators who are looking for warmer weather now.

Temperatures during the week ranged from six to 12 degrees below normal, the coolest since early March. The first significant rainfall in two weeks moved in and covered the state May 4 with light amounts recorded the following two days.

Soil moisture was rated mostly adequate to somewhat short. The late week rains were welcomed in all areas because some soils were so dry they were quite hard to work.

Plowing caught up by three days last week and is now 73 per cent done, only four days behind the 79 per cent of a year ago. Northern counties are two-thirds done, central counties are about three fourths, and southern counties report 82 per cent of their plowing completed.

Potato planting is 47 per cent complete, two days ahead of last year when 44 per cent was done. Northern operators have eight per cent of their potatoes in the ground, central counties are half done, and southern operators have 82 per cent of their crop planted.

As with potatoes, corn planting is now two days ahead of 1977, at 17 per cent planted compared with 12 per cent a year ago. Northern counties still report less than five per cent planted, central counties show 15 per cent, and the south reports 29 per cent planted.

Although some boot is reported, both barley and wheat remain less than five per cent into the boot stage of development. A year ago wheat was 11 per cent into boot and barley 13 per cent. The crops are reported in good condition, but as with all other crops, operators indicate a need for a warm-up to normal temperatures before development will be significant.

The cool weather has obviously retarded hay and pasture development. Alfalfa and clo-tim hay conditions are rated good to fair with mostly good condition in the south. However, growth is very slow and operators are concerned with the prospects of a repeat of last year's very short first cutting. A slight amount of alfalfa has been cut for silage in the south. Southern operators are spraying for weevil. As growth has been minimal, feed from pastures is ten days later than normal.

Peaches are rated 35 per cent in pink and 12 per cent full bloom, compared to 88 per cent in or past full bloom a year ago. Cherries are at 34 per cent pink and 24 per cent full bloom or past, where a year ago they were considered virtually all in or past full bloom. Apples are one-fifth in pink and seven per cent in full bloom. A year ago 94 per cent were in or past full bloom. The lateness was an asset as temperatures went below freezing the previous week. Reports of cherry damage were statewide with scattered damage reported to apples, peaches, plums and apricots. The extent of damage has not yet been assessed. Strawberries are blossoming and a small quantity of asparagus is being cut.

Career decision workshop held

LANCASTER -- The Lancaster Women's Center is offering an introductory career-decision workshop on May 25 from 7:30 to 9:30 p.m. at the Unitarian Church of Lancaster, 538 Chestnut Street. The workshop is designed for women who are reentering the job market or want a career change, and will include an assessment of personal values and an introduction to an 11-step career-planning method.

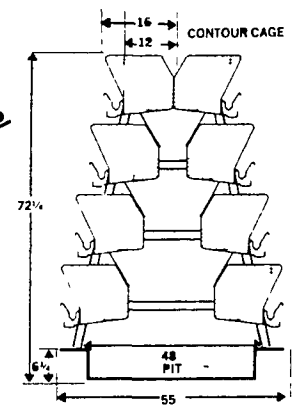
For reservations send $2.50 in advance to the Women's Center, 230 West Chestnut Street, Lancaster 17603 or call Ann Stoltzfus at 717-299-4271 for more information.

THE SYSTEM

DIAMOND AUTOMATION OFFERS SEVEN NEW CAGE SYSTEMS

ATTENTION POULTRYMEN!

CHECK THESE DIMENSIONS →



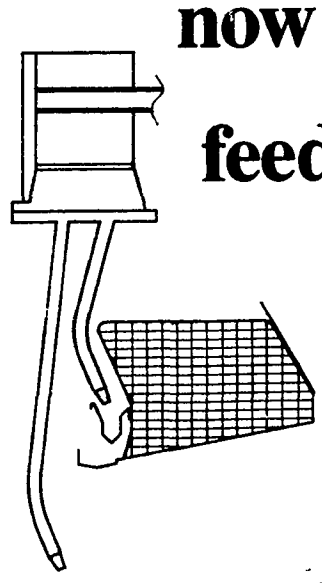
4 HIGH REVERSE CAGE IS THE MOST ADVANCED, COMPACT AND EFFICIENT SYSTEM FOR NEW AND CONVERTED HOUSES.

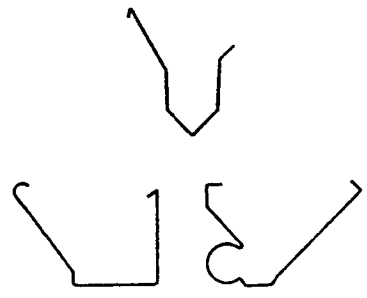
EGG MAKER SERIES —
4-HIGH LAYER REVERSE CAGE

For producers who prefer higher bird density with the reverse cage concept, Diamond Automation has developed this new 4 tier modified stair step system. It features a big reverse cage with Contour front. Any of the four Diamond feeding systems can be used. No chute scrapers are used on the manure drying boards.

NO OTHER COMPANY OFFERS YOU SO MUCH

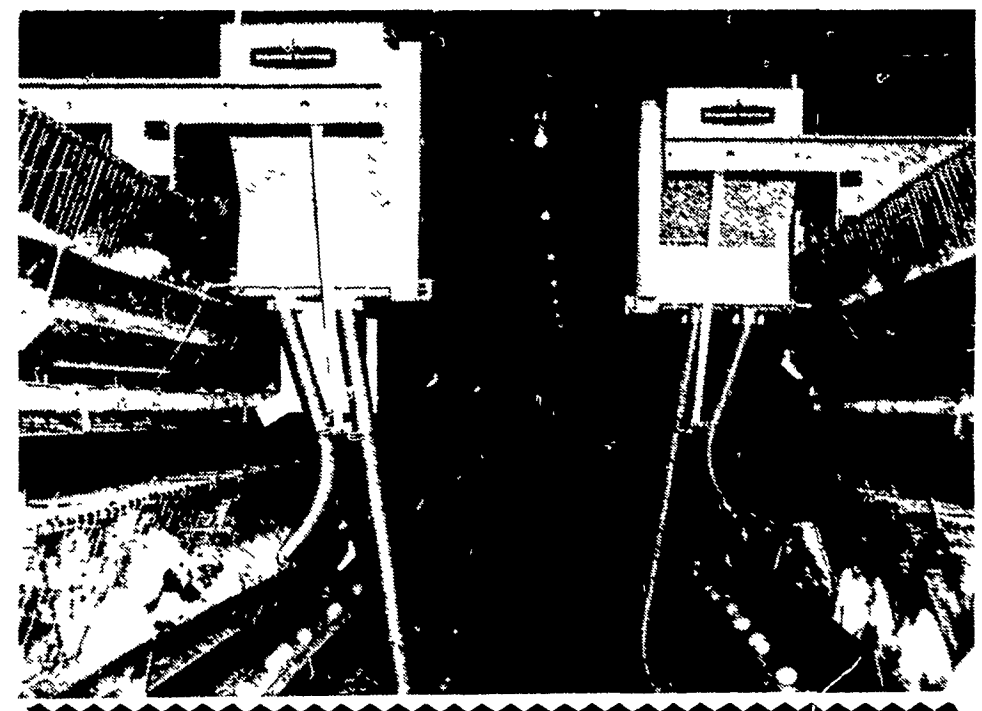
Producers can now choose from *four* feeding systems





The Feedsaver® System is the first truly controlled feeding system. Battery powered hoppers travel down the cage row at timed intervals and deposit a predetermined amount of feed in the deep "V" troughs. All birds get the same fresh feed There's no high-grading. A feed sensor automatically compensates for differences in bird's feeding habits The Feedsaver® System cuts feed and electric energy costs For some, the feed savings are substantial

Two new types of Diamond chain feeders are also available . . . the flat chain and the link chain . . in addition to the Keenco F-80 chain feeder. All are compatible with the new cage systems and deliver a balanced ration to the birds. Trough design reduces feed waste from billing-out



Let the Diamond Feedsaver Cage System Work for you.

Higher indemnity rates proposed for brucellosis infected cattle

WASHINGTON, D.C. – The U.S. Department of Agriculture has proposed a separate brucellosis indemnity rate for female calves and non-registered dairy cattle. An increase in the indemnity rate for registered cattle was also proposed.

Paul Becton, director of brucellosis eradication for USDA's Animal and Plant Health Inspection Service, said the proposed new rates are $250 for registered cattle, $150 for non-registered dairy cattle, and $25 for female calves destroyed because of brucellosis infection or exposure. The $50 for other non-registered cattle would remain unchanged.

The changes would bring indemnities closer to the animals' true market values, according to Dr. Becton. The action should encourage greater participation by cattle owners in the cooperative state-federal brucellosis eradication program. Under the program, owners receive an indemnity payment plus the salvage value for destroyed animals.

Previously, no indemnity was paid for female calves. Dr. Becton said the change is necessary because exposed female calves – those nursing a brucellosis reactor – are possible reservoirs of brucellosis infection. Male calves pose no threat of spreading the disease.

Dr. Becton said a separate rate for non-registered dairy cattle should be added because the value of these animals is considerably high than that of other non-registered cattle.

Brucellosis, also called Bang's disease, affects cattle and other livestock causing losses due to abortion, decreased milk yields and the need to buy replacement cattle. The disease also may be passed to man an undulant fever.

Interested persons will have until July 5, 1978 to file written statements, views or comments on the proposals. These should be sent to the Deputy Administrator, USDA, APHIS, Veterinary Services, Federal Bldg., Room 805, Hyattsville, Md. 20782.

Brown Swiss class leader named

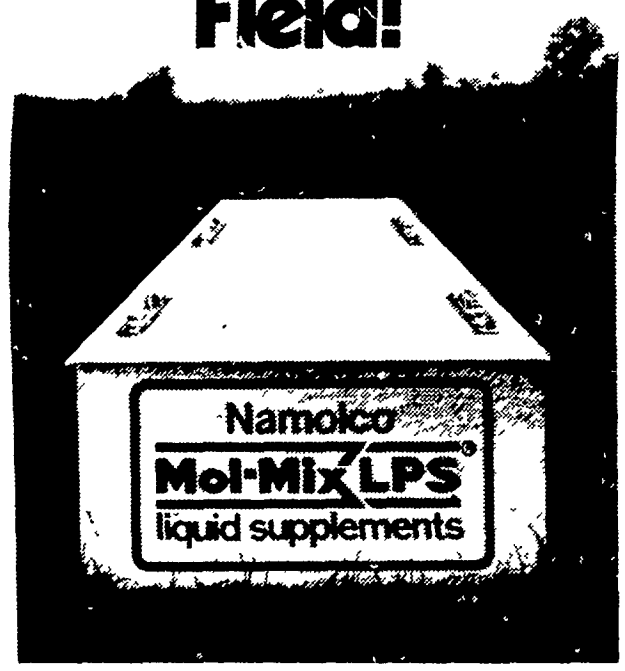
BELOIT, Wis. – A new Class Leader was recently recorded on the Honor Roll lists of Brown Swiss Cattle Breeders' Association of the U.S.A.

Forest Lawn E. Penny 613021 recently completed a Junior Two Year Old record that put her first in both the 305 Day and 365 Day Milk Honor Roll. In 305 days "Penny" produced 21,040 pounds milk with a 3.1 per cent test and 647 pounds fat. In 363 days her record was 24,048 pounds milk, 3.2 per cent test and 763 pounds fat.

Forest Lawn E. Penny was part of the M.C. Alexander herd, Williamsport, Tennessee, when she made her Class Leading record. During this time, she was owned by Howard Prather, Belfast, Tennessee, who purchased her as an open heifer at the Kentucky National Show and Sale in 1975. "Penny" was bred by Darrell Worden, Forest Lawn Farm, Wausau, Wisconsin. Consigned by M.C. Alexander, "Penny" sold in the Midwest Revue Sale on April 8, 1978 to Pineland Dairy, Waynesboro, Georgia for $4500.

Classified "Very Good 89", "Penny" is sired by U W Beautelaim Echo 160159. "Echo" is a son of Norvic Lilason's Beautician 138750, a "Superior Sire".

We're Outstanding in your Field!



If we re not out there already we should be We ll show you how performance proven Mol-Mix/LPS® liquid supplements are specially designed to provide your cattle with a **balanced** diet including the **guaranteed** dry matter and sugars levels which insure a high measure of overall energy value Mol-Mix/LPS also contains the special slow release formulation and a combination of top-quality ingredients that give your cattle that extra energy and nutrition so essential to maximum meat production and good herd health And Mol-Mix/LPS comes to you in convenient liquid form for top dressing applying on roughage or for use in self-fed lick wheel feeders which we will keep filled for you

This Spring ask us for the Liquid Leader and see for yourself why year after year top-quality Mol Mix/LPS will remain outstanding in your field!

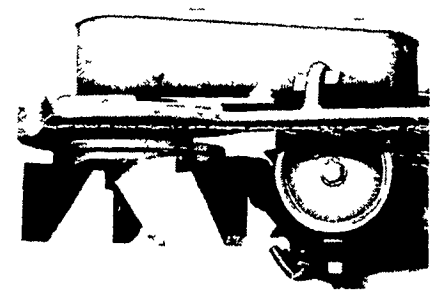
PATZ Silo Unloaders give you two big, lugged drive wheels for sure traction and flotation. Silage is removed evenly with the Patz exclusive self-leveling device. Preset depth control adjustment; "no-load" starting with the PATZ throw-out clutch; and easy lifting, high into the top of the silo for refilling; are additional features of this durable performer. Call us for design matched systems, installation and service of quality PATZ equipment.

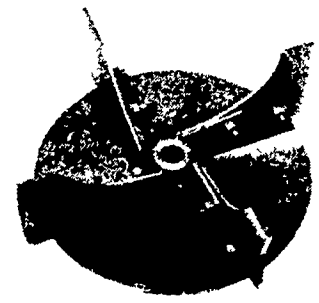
...but DON'T STOP with the UNLOADER

The big capacity of the PATZ Silo Unloader can be design matched to a choice of Material Movers, Conveyors, Conveyor-Feeders or In-bunk Feeders to completely automate your feed handling chores.

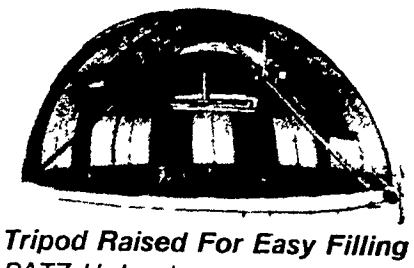
Claw-Like, Hardened Steel Gathering Chain
Steel claws and rakers cut and pull apart the hardest packed or frozen silage.



Spring Tensioned Frost Cutter
Four hardened steel, self sharpening blades shear away frozen silage.



Adjustable Impeller Blades
Four impeller blades adjust for close tolerance and efficient silage throwing.



Tripod Raised For Easy Filling
PATZ Unloader prepares easily for raising high into silo top.

Get the PATZ facts first

Richmond urges urban understanding

WASHINGTON, D.C. – Stressing the link between emergency federal loan guarantees for New York City and the Emergency Agricultural Credit Act, Congressman Fred Richmond (D-NY) recently urged his urban colleagues to support legislation to assist the nation's financially ailing farmers.

In a floor statement, Rep. Richmond, secretary of the New York State Congressional Delegation, noted the similarities between the $4 billion Emergency Agricultural Credit Act and the pending $2 billiion New York City Financial Assistance Act.

Richmond stated: "We urban dwellers understand the farmers' plight because our cities, too, are faced with rising costs, an eroding tax base and continual demands for essential municipal services... Farmers have sacrificed. They have refinanced their land and homes, continually repaired old equipment, and have continued to plant crops even though they know it will force them deeper into debt. The Federal government – and we, members of Congress from both urban and rural America – have the ultimate responsibility of assuring the continued survival of both family farmers and the people of New York."

The New York City Financial Assistance Act, which authorizes up to $2 billion in Federal guarantees of city bonds with a maximum term of 15 years, is pending in the House Committee on Banking, Finance and Urban Affairs. Unlike the Administration proposal, the Committee bill permits use of part of the $2 billion for short-term, seasonal loans to meet New York City's immediate cash needs.

Richmond added, "For our farmers, the Emergency Agricultural Credit Act is vital if they are to survive and prosper in an open market, without government handouts - just as for our urban consumers, the New York City Financial Assistance Act is vital if we are to bring our budget under control and provide the services necessary to keep our city alive."

Ice cream battle continues

WASHINGTON, D.C. – Despite the opposition from ice cream makers USDA plans to go ahead with quality standards for ice cream. Plans call for USDA inspection, testing and grading ice cream as "U.S. Premium, U.S. Grade A or U.S. Grade B". Grading would be optional for manufacturers but grading would require recurrent, unannounced USDA inspections. Ice cream makers say each plant would have to spend $65,000 each year to meet inspections. They say cost would be passed to consumers.

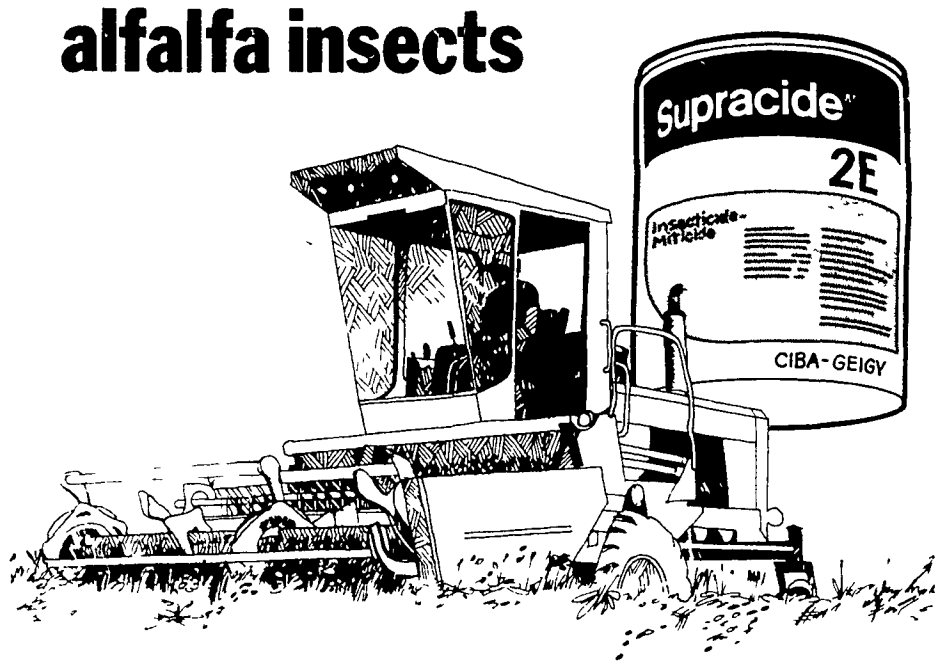
Also, last year's battle to stop revised ice cream standards which would have cut nonfat dry milk sales in half isn't over. FDA dropped plan to use imported casein but now International Association of Ice Cream Manufacturers is requesting FDA consider using all whey varieties to make ice cream. Present rules allow only sweet whey. Whey is cheese-making by-product and at least four times cheaper than nonfat dry milk.

Commercial nonfat dry milk sales have already dropped 41 per cent since 1966. Last year production exceeded sales by 38 per cent. Latest ice cream revision effort spells more trouble for dairy industry, according to the Pennsylvania Farmers Association.

Truck tax elimination urged

WASHINGTON, D.C. – Farm Bureau is urging provisions for farm truck exemption from federal highway use tax be written into this year's tax bill by House and Senate committees. Farm Bureau wants farmer-owned, farm-use, not-for-hire trucks exempted from tax which currently covers about 1.5 million trucks and costs farmers $150 million.

OUR RECOMMENDATION:
for
alfalfa insects



You know how much a good crop of alfalfa is worth today. It's never been higher You'd like to grow more of it per acre Insect control plays an important role

Supracide is what to use. Why? 14 to 21 days of control, for one thing. Short interval to harvest, for another These are only two reasons to use Supracide on your high-priced alfalfa Ask us about some others.

Supracide® trademark of CIBA-GEIGY for methidathion

SUPRACIDE 2E is not a restricted Insecticide - it is a general use pesticide.

CONTROLS - Alfalfa Weevil, Aphids, Spittlebugs, Leafhoppers.

It is a long lasting locally Systemic Insecticide.

Available through your local Custom Applicator or Farm Supply Dealer.

THE DE LAVAL® HERRINGBONE
DE LAVAL MILKING PARLOR

THE MOST POPULAR HERRINGBONE SYSTEM SOLD IN THE UNITED STATES.* ISN'T IT RIGHT FOR YOU?

De Laval leads the field with the features that have made the Herringbone Milking System a favorite with farmers everywhere Advantages like ease of operation, efficient cow movement, and compact space utilization have made the double row Herringbone the most commonly installed new milking facility today, and more people who install Herringbones, install De Laval Here are some very good reasons why

- FAST, SMOOTH FLOW OF COW TRAFFIC
- EASE OF MILKING
- MINIMAL SPACE REQUIREMENTS
- FLEXIBILITY TO MEET YOUR NEEDS
- DURABILITY FOR LONGER LIFE

Order 4 milk $10.71 for April

ALEXANDRIA, Va. – Market Administrator Joseph D. Shine recently announced an April 1978 base milk price of $10.71 per hundredweight for the Middle Atlantic Marketing Order and an excess milk price of $9.10. The weighted average April price is $10.54 and the butterfat differential for the month is 12.1 cents. The April base milk price is unchanged from March but is 71 cents above the April 1977 base price. Order No. 4 prices are announced for 3.5 per cent milk f.o.b. plant location within 55 miles of Philadelphia, Pa. and also within 75 miles from the nearer of Washington, D.C. or Baltimore, Md. There is a 6-cent direct-delivery differential applicable to producer milk received at plants located within 55 miles of Philadelphia.

Shine reported that April producer milk receipts totaled 481.1 million pounds, an increase of 2.6 per cent from March, on a daily basis, but down 0.7 per cent from a year ago. This is the second straight month that milk production has been below last year. Class I producer milk accounted for 54.54 per cent of total April producer deliveries, compared to 59.24 per cent in March and 55.54 per cent a year ago. Base milk represented 89.82 per cent of total April production. There were 7,966 dairymen shipping to Middle Atlantic Order handlers during the month and the average daily delivery per producer was 2,013 pounds, an increase of 0.5 per cent from last April.

Middle Atlantic Order pool handlers reported Class I in-area milk disposition of 7.52 million pounds per day during April. When adjustment for variation in calendar composition is made, April fluid milk sales were up one per cent from March and were 0.8 per cent above last April. This marks the first time in eight months that adjusted in-area fluid milk sales have been above the corresponding month of the previous year.

Japan to buy more beef

WASHINGTON, D.C. – Beef trade teams from the United States and Japan have agreed on measures to increase Japanese imports of high quality beef on a global basis by 10,000 metric tons yearly. The agreement is effective with the current Japanese fiscal year, which ends March 31.

High quality beef would include "choice" and "prime" grades.

The additional 10,000 tons will elevate Japan's imports of high quality beef to at least 16,800 tons. Three thousand tons of the total imports will enter under the hotel quota, which was 1,000 tons last year. The remaining 13,800 tons will be imported under the general quota.

USDA officials said the United States, with its high quality grain-fed beef, should be in an excellent position to capture a fair share of this market.

Custom rates up this year

HARRISBURG -- Machinery custom rates for selected farming operations are higher this year, up an average of 5.6 per cent from last year, according to the Pennsylvania Crop Reporting Service.

The custom rates are surveyed each year by the Crop Reporting Service to serve as a comparison for farmers to prices they are paying. Custom rates are given as averages from reports by custom operators throughout the Commonwealth and most are stated by acre, ton bale or bushel to reduce variations due to machine sizes.

Average rates are shown separately for most items in the survey by two regions of the state, "mountain" and "valley." The difference in rates between regions reflect differences in terrain, soils and alternatives for labor and equipment used.

The farming operations listed under the survey include: corn picking, combining, silage making, potato harvesting, plowing and cultivating, planting and drilling, spraying, and a number of miscellaneous items such as grinding, spreading fertilizer and manure loading.

Copies of the survey are available from the Crop Reporting Service, Department of Agriculture, 2301 North Cameron Street, Harrisburg, Pa. 17120.

Pa. wheat crop down

HARRISBURG – Pennsylvania's 1978 wheat production is expected to total 7.84 million bushels, or 12 per cent below last year, according to the Pennsylvania Crop Reporting Service.

This is based on conditions as of May 1. Acres for harvest are off 25,000 to 245,000 while expected yield is off one bushel to 32 bushels per acre. U.S. Winter wheat production is forecast at 1284 million bushels, 16 per cent or 242 million bushels below the 1977 crop.

Hay stocks on Pennsylvania farms May 1 are estimated at 583,000 tons or 11 per cent below a year ago. The U.S. total of 24.0 million tons is up 23 per cent from 1977.

U.S. Spring potato production forecast of 19.9 million cwt. is up one per cent from the April 1 forecast, but 13 per cent below last year.

Peach production in the nine southern states is forecast at 533 million pounds, three per cent above last season's total.

Ram sale set

HARRISBURG – Pennsylvania's second Performance Tested Ram Sale takes place June 3 at Meat Evaluation Center at Penn State starting at 2 p.m. The sale is sponsored by the state Agriculture Department in cooperation with Penn State University and the Pennsylvania Sheep and Wool Growers Association.

Antioxidant approved for meat use

WASHINGTON, D.C. – Tertiary butylhydroquinone (TBHQ) would be added to the list of antioxidants approved for use in meat and poultry products under a proposal announced recently by Carol Tucker Foreman, assistant secretary of agriculture for food and consumer services

TBHQ is not on the list of substances approved for use in meat and poultry products, although the Food and Drug Administration permits its use in some other types of foods to maintain freshness, Ms. Foreman said. USDA has determined that TBHQ would not cause meat or poultry products to be adulterated under the meaning of the federal meat and poultry inspection acts, which are administered by USDA's Food Safety and Quality Service (FSQS).

Oxford's graduating FFA class wins praise, underclassmen encouraged to set high goals

By DIETER KRIEG

OXFORD -- Kenneth Thompson, a veteran of 24 years of teaching at Oxford Area High School, made it clear to nearly 300 people last Saturday evening that he's very much impressed with his graduating class of vocational agriculture students. He made no attempt to hide his high esteem of the class, and openly challenged underclassmen and their instructors to meet the standards set by the Class of 1978. In Thompson's opinion, that will be hard to do.

The occasion for the vo-ag instructor's appreciative remarks was the annual parent and member FFA banquet, held here a week ago in the cafeteria of the Oxford Area High School. For 15 graduating vocational agriculture students it was also a kind of last supper – an event during which their instructors gave them a fond farewell, with wishes that they would do well in their work and hopes that they would return for visits in years to come.

Aside from the 114 FFA members and instructors Ken Thompson and Scott Gold, the group was joined in the celebration by parents and guests.

The most highly honored of all the students was 17-year old Ed Breckbill, the son of Mr. and Mrs. Richard Breckbill, Oxford. A senior, Breckbill's chief interests and main accomplishments are in dairy farming. A member of the Oxford FFA dairy cattle judging team which won first-place honors at Penn State last month, Breckbill is recognized for his expertise with registered Holsteins, particularly judging. He has participated in numerous shows and other functions both on the local and state level. Aside from his school and extracurricular work, he has major responsibilities with the family's 130-head herd of Holsteins.

According to Thompson, Breckbill is "the first student I've had in quite a while who really knows his bulls and breeding." The veteran teacher also praised the tall and slender youth for his leadership qualities, academic achievements, and helpful, good natured attitude. An officer in the Chapter, he served as chaplain during this concluding school year.

Breckbill, who is planning a career in dairying, was one of two recipients of the coveted DeKalb Award and in addition was named the Chapter Star Farmer. The youth was also cited for his ninth place in the State Record Book Contest which had 163 entries.

Angela King, 1977-78 FFA president of the Oxford and County FFA Chapters, was also a big winner of awards last week. Praised for her abilities and dedication by both instructors, she was given a DeKalb Award, a certificate of appreciation, and an FFA Foundation Award in diversified livestock production.

During other moments of the awards ceremonies, recognition was bestowed on a number of students and several adults. Details follow:

In crop production, Mike May and Samuel Rinard were cited for their achievements. Agricultural mechanics awards were presented to Charles Astle, Robert Kinney, Jeff Roland, Albert Brimmeier, and Bernie Hostetter.

David Ham and John Horton were winners in farm safety. Public speaking award winners included Bonnie Arrowhead, Peter Scallan, and Gloria Williams. In dairy production, the honors went to Bernie Hostetter, Bonnie Lamborn, Lorna Monger, Tommy Culberson, and Alan Mason. An award for achievements in agricultural processing went to Dean Weaver and James Palmer. Sales and service accomplishments were recorded by Danny Brooks and Joe Fisher.

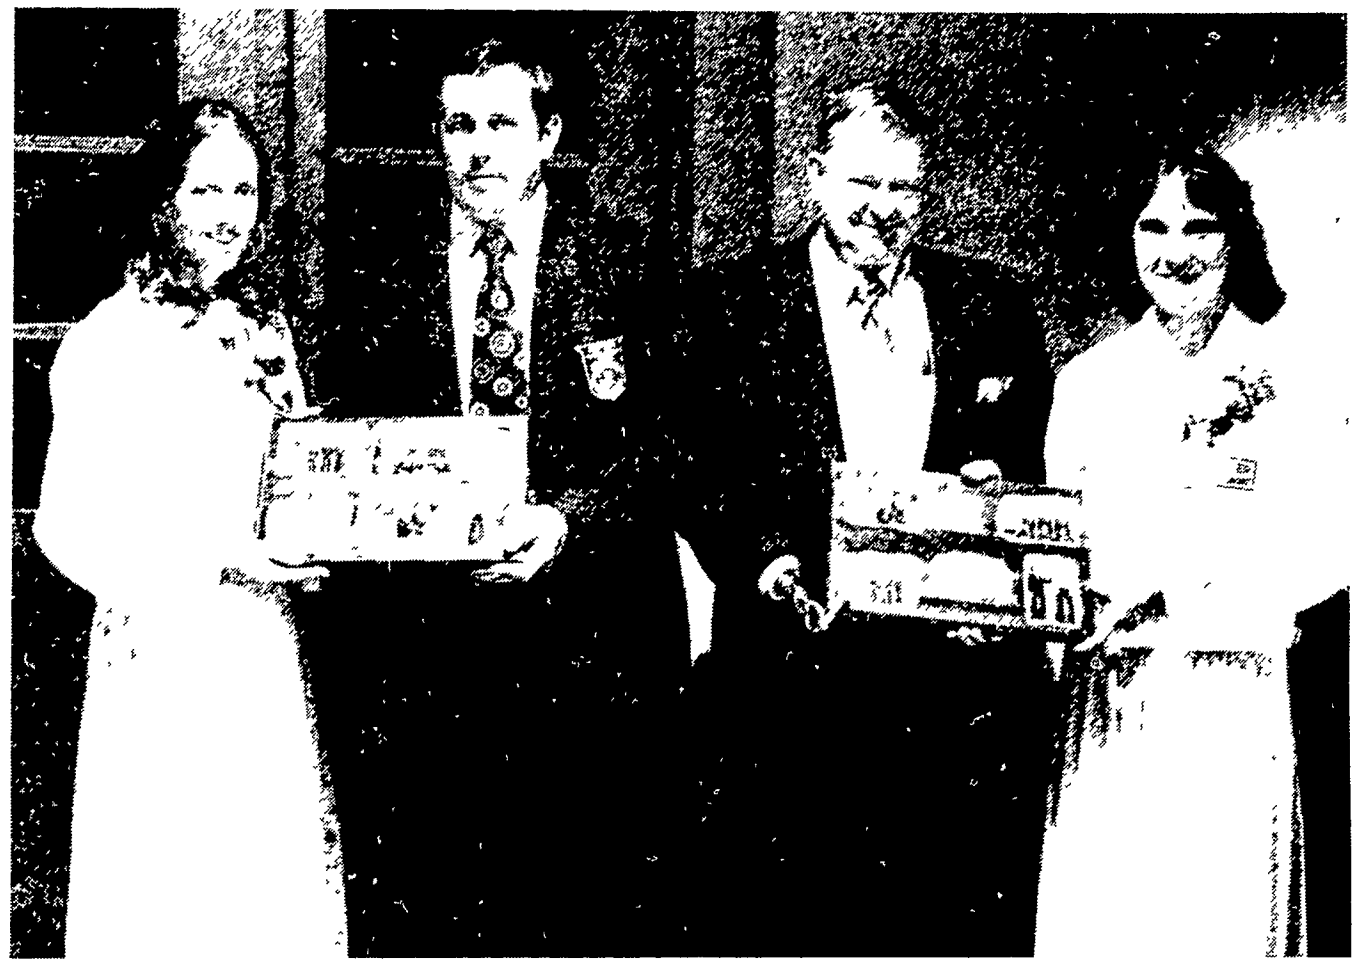
Dale Davis was cited for diversified livestock production along with Angela King. In horticulture, the winner was James Palmer. David Wylie, Kevin Jackson, and Sandy Peterson were recognized for outstanding work with beef cattle, swine, and horses, respectively.

Valerie Weaver, Daniel Miller, and Deanna Willis were recognized as the Star Greenhands, winning appropriate prizes and words of praise from their instructors.

In the work experience category for placement in agricultural production, Ferlin Roop, Allen Edwards, Randy Thomas, William Sumner, and Dale Davis received the honors.

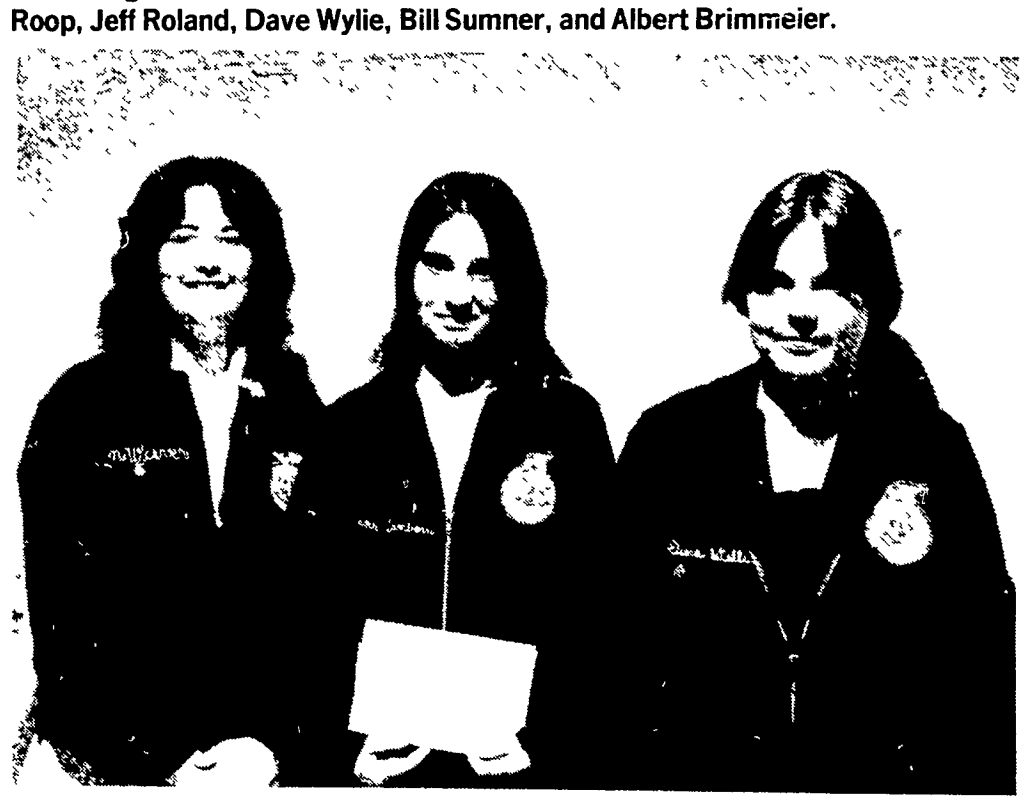
Ferlin Roop was the high man from Oxford in the State FFA Record Book Contest. He placed second

(Turn to Page 66)

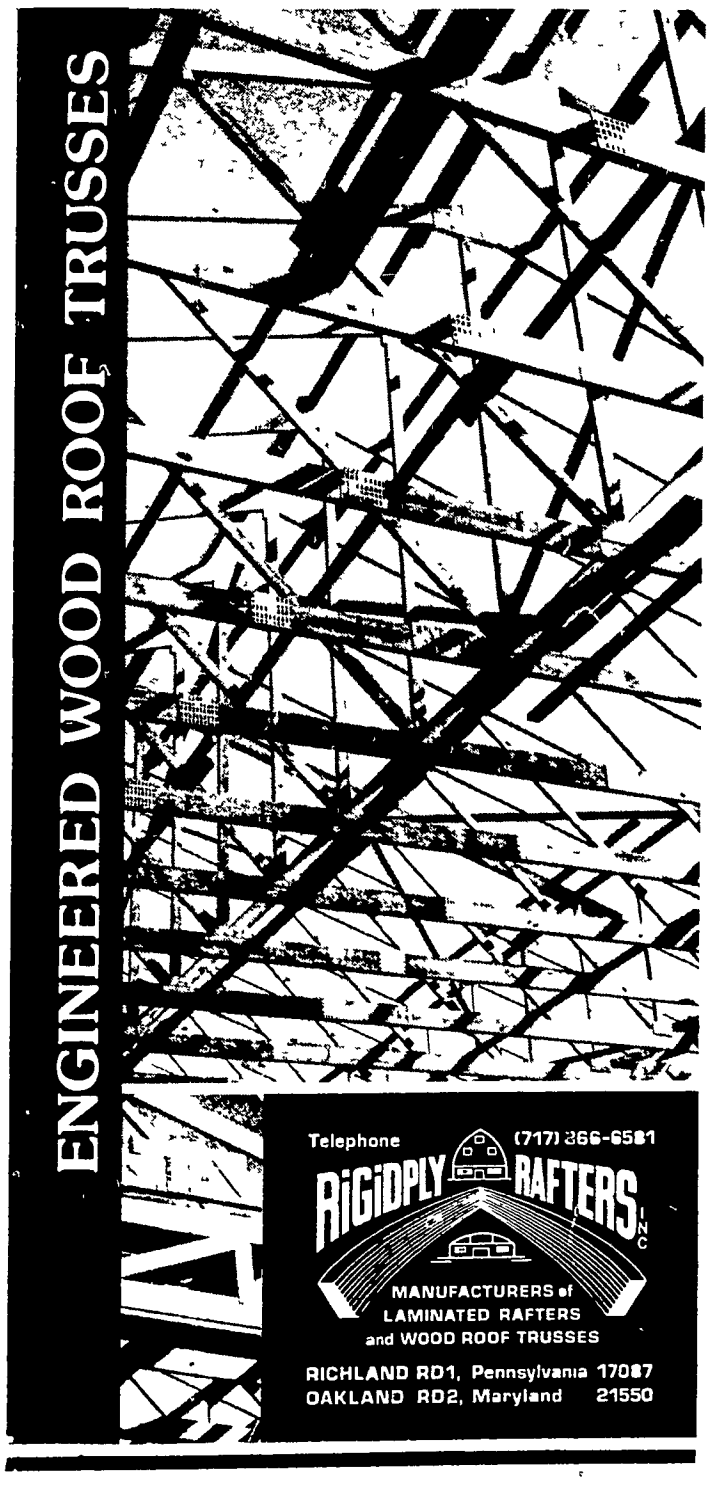


Oxford's vocational agriculture teachers Scott Gold and Kenneth Thompson share the opinion that their graduating class of vo-ag students is one of the best ever and one that will be hard to beat in years to come. The seniors have similar regards for their instructors. At a banquet last week, Oxford Chapter and Chester County FFA president Angela King, left, and Chapter reporter, Geraldine Miller, presented both teachers with specially-made plaques of decoupage. The works of art feature color photographs of the Chapter's activities and are gifts of the senior class.

Winning awards last week at the Oxford FFA dinner were, left to right: Ferlin Roop, Jeff Roland, Dave Wylie, Bill Sumner, and Albert Brimmeier.



Among Oxford's outstanding FFA'ers are, left to right, Valerie Weaver, Bonnie Lamborn and Deanna Willis.



Oxford has top dairy cattle judges

Charles Astle, David Ham, and Robert Kinney were given recognition last week for their achievements in the Oxford FFA Chapter.

The Oxford FFA Chapter's dairy cattle judging team captured first place last month during an invitational contest held at Penn State University. Members of the team, (left to right) Bernie Hostetter, Ed Breckbill, Barry Hostetter, and Alan Mason received their awards two weeks ago during a recognition dinner on the Penn State campus and were given further honors during their annual parent-member meeting last week at the Oxford Area High School. The team was first in the state in placings and oral reasons. High individual in the group was Ed Breckbill, the son of Mr. and Mrs. Richard Breckbill, Oxford. His third place among the 119 competitors was followed in order by Alan Mason (fifth), Barry Hostetter, (seventh) and Bernie Hostetter. The Hostetters are the sons of Mr. and Mrs. Wilmer Hostetter; Mason's parents are Mr. and Mrs. Robert Mason, Nottingham. Thirty teams competed for prizes at Penn State during this annual event. The team's coach is Kenneth Thompson.

Oxford

(Continued from Page 65)

out of 163 in state-wide competition. Others to win recognition in this category, and their respective placings were: 4. Danny Brooks, 8. Allen Edwards, 9. Ed Breckbill, 13. Darwin Vickers, 41. Barry Hostetter, and 45. Allen Lindsey.

Juniors who placed in the above contest in their own division included David Wylie, Bernie Hostetter, William Sumner, and Dale Davis.

Certificates of Appreciation were awarded to the following:

Angela King, Geroldine Miller, Renee McCardell, Barry Hostetter, and William Brantner, all students at the school.

Citizens in the community and members of the school staff who won acclaim from the Oxford FFA Chapter included Mr. and Mrs. Otis Astle, Mrs. Ann Hess, Richard Frampton, and Mrs. Lucille Herber. Dr. Patrick Chiesa, assistant principal at the school, was named honorary Chapter Farmer.

The program, which lasted nearly two hours, was presided over by several of the class officers. Angela King, Chapter and County FFA president, called guests to their tables and offered brief commentaries at various times during the meeting. The welcome address was delivered by Barry Hostetter and a toast to parents was proposed by Allen Lindsey. Hostetter holds the office of vice president for the Chapter and reporter for the Chester County FFA. Lindsey is one of three student advisors for the Oxford FFA Chapter, while holding down a similar position with the county group.

Chapter chaplain, Ed Breckbill, offered the invocation. Remaining portions of the program were conducted by the instructors, and Geroldine Miller, and Dan Brooks. Miss Miller is reporter for the Chapter and chaplain for the Chester County FFA. Brooks, in addition to being a student advisor, holds the position of Chester County FFA secretary.

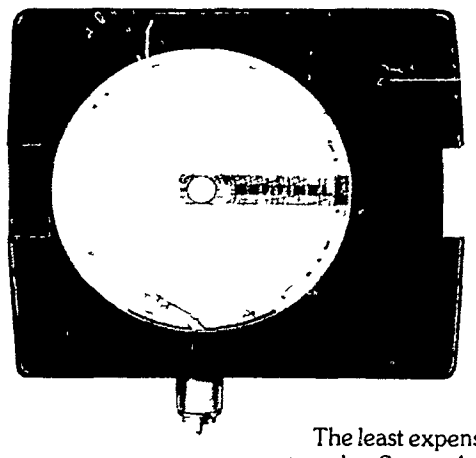
Others in the Oxford FFA Chapter who hold offices are: Renee McCardell, secretary; Gloria Williams, treasurer; Ferlin Roop, student advisor; Dave Wylie, sentinel; Jeff Roland, parliamentarian; Bernie Hostetter, assistant secretary; and Albert Brummeier, assistant treasurer.

Among the guests at the 2½ hour meeting was State FFA Chaplain Kirby Horst of Lebanon County, who gave an inspiring message on making goals out of dreams.

A summary of the highlights of the group's activities during the past year was also offered.

Special plaques of appreciation were presented by the senior class to vo-ag instructors Thompson and Gold.

WHO'S MINDING THE MILK?



If you depend upon your milk check for a living, who's minding your milk?

The least expensive, one-shot insurance you can get is the Sentinel — the 10-inch recorder which charts temperature of your milk-cooling or holding tank Here's what it provides

- Permanent proof that proper temperature was maintained
- Record of cooling equipment efficiency
- Cleaning temperature recording on the same chart.

The Sentinel is also available with provision for actuating an alarm or warning light if pre-set temperature is exceeded

Remember — if it prevents the loss of only one tank of product, the Sentinel has paid for itself It minds your milk

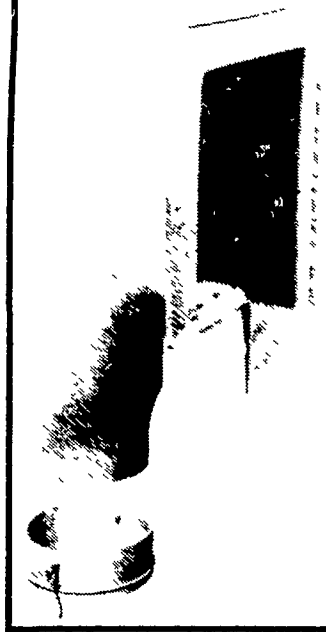
LANCASTER SILO CO., INC.

2008 Horseshoe Road - 2436 Creek Hill Road
LANCASTER, PA 17601

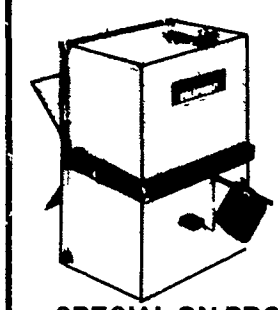
IMMEDIATE DELIVERY
PROMPT ERECTION

CORRUGATED 3" WET-CAST STAVES
HI-STRENGTH 9/16" DICHROMATE RODS
ALUMINIZED STEEL ROOF & DORMERS
STAVE OR ALUMINIZED STEEL CHUTE
SMOOTH, HEAVY COAT INTERIOR PLASTER



CLEAN-CHUTE SILAGE KIT:

Climbing the silo chutes is now an easier and safer chore. Silage is received by the durable molded hopper unit which can be trimmed to fit any conventional silo door opening. Silage flows down the 11" plastic tube - large enough to carry the output of heavy duty silo unloaders. The tube is cut to length at the lower end as the silo is unloaded. All the silage is confined to the silo flow. With silage no longer hanging up on chute and steps, corrosion inside the chute is sharply reduced.



PROTEIN OR GRAIN WEIGHER

Models to weigh protein, grain or other feedstuffs in continuous flow
No electricity required easy to move from one location to another
Also a full line of protein meters, bin flow switches and other automation accessories

SPECIAL ON PROTEIN & GRAIN WEIGHERS
20% DISCOUNT DURING MAY
MODEL F-3 $130.00
MODEL F-12 $220.00

DISTRIBUTOR OF CENTRAL TRACTOR PARTS CO.

The Tractor Specialist sells more "up-time"

case

When the land is ready a farmer s tractor had better be ready to go That s why a Case dealer franchise just makes good common sense

As a Case dealer you re a tractor specialist Everything you do — selling servicing parts — has one target the best in farm power You and your tractors are backed by an industry ' first a sound marketing program Assured Availability It tells your customers that if for any reason during warranty the tractor they bought from you isn't ready to go, they'll have a free replacement And Case backs you up!

Case backs you up with other strong marketing help including the Demo/Rental and Commitment to Quality programs

If the franchise is open in your territory you may also be eligible to sell and service light construction power For information on the full potential of a Case franchise in your area write or call

All 4WD tractors are not created equal

Steiger delivers more of the horsepower you pay for.

Fact is, one company's 4WD tractors consistently transfer more engine horsepower to the drawbar — where you need it — than the others. And they do it better and more efficiently.

Namely, Steiger

In recent independent tests, Steiger 4WD tractors delivered the highest percentage of engine horsepower to the drawbar pin. By comparing each model's advertised gross engine horsepower to the highest drawbar horsepower attained in the tests, Steiger tractors placed above all others Steigers delivered an average 84.08% of the engine's power to the drawbar pin. The competition averaged only 75 81%

So if you've been shopping for a four-wheel drive tractor, don't just shop for horsepower in the engine Check the power where it counts . at the drawbar See if you don't agree

Steigers work harder

STEIGER® Get more tractor!

9H134 JOB continues to be the most popular bull at Sire Power He is now +1250 PD milk, with a 3 8% test level, at 83% repeatability, and he is 100% A I. proven His pedigree includes breed greats "Ivanhoe" and "Standout" We believe in **JOB** and are using him as a mating sire for future sons at Sire Power

However, the big news is the way the **JOB** daughters are maturing and their latest, well deserved classification scores

We anxiously await his next type information this summer

Contact your NEBA-Sire Power Representative or phone: 717-836-3127 or 3168.

Dauphin County DHIA Monthly Report

APRIL 1978

"Etta", a 5-year old Holstein in the J. Melvin Brandt herd is the undisputed queen of Dauphin County cows on DHIA which finished their lactations last month. With 24,249 pounds of milk, and a 4.4 per cent test, and 1064 pounds of butterfat, she reigns in first place for both production categories.

The top herd average for the month belongs to John Hertzler, whose 63 Holsteins produced an average of 52 pounds of milk and 2.16 pounds of butterfat daily.

Lebanon County DHIA Monthly Report

APRIL 1978

Willow Maple Farm had the distinction last month of having the top cow in the Lebanon County DHIA program. For lactations completed in April, Willow Maple Farm's Annette captured first place for both milk and butterfat production. Her record is 25,405 pounds of milk, testing 3.9 per cent butterfat, for 1001 pounds of butterfat.

Fulton Grange support noted

QUARRYVILLE – Edward L. Zug, Master of Fulton Grange 66, presided at the meeting May 8 at Oakryn, when they went on record to ask their Congressmen not to discontinue Saturday mail deliveries and not to raise the parcel post rates.

They supported the following bills in the State Legislature: S.B. 1222, Printers No. 1639, which would require a referendum before establishing an energy park; H.B. 472, Printers No. 2858, which would amend the game law to prohibit flashing spotlights on any building and would increase the fine for violating game spotlighting between midnight and sunrise; H.B. 1192, Printers No. 1410, which would amend Act 71 of May 1976 to include certain cemeteries in exemption from paying assessment for sewer and water lines which are not used; H.B. 1487, Printers No. 1776, which would provide for termination on Nov. 30, 1978 or one calendar year from date of creation of units of State Government that have not been created by statues enacted by the General Assembly unless the Leadership Committee extends until appropriate committees review the work of the agency and offers its recommendation.

They also supported H.B. 654, Printers No. 722, which would increase from eight to fifteen cents an acre the tax paid to counties and school districts for land acquired for preserving forests and parks and would increase from four to twenty cents per acre the amount paid for the benefit of roads in townships where such lands are located; H.B. 2442, Printers No. 3140, which would amend the Tax Reform Code by excluding from tax the sale of a meal by a nonprofit corporation; S.B. 578, Printers No. 1782, which would amend the Act of 1970, for a member of the Legislature to automatically forfeit the right of any benefits except repayment of his contributions and interest thereon, upon initial conviction or entry of a plea of guilty or no defense of a felony relating to the duties or office of the member.

A report of Area E Pomona visitation meeting in Bucks Co. was given by Mrs. J. Stanley Stauffer Jr. and announcement of next year's meeting to be held May 5, 1979 in Chester Co. at which time Lancaster Co. Pomona Grange officers will fill officers' chairs. Mrs. Thomas Galbreath, chairman of the Women's Activities Committee, introduced Miss Nancy Henkel, IFYE representative from Lancaster Co., who gave an account of her four months stay on three farms in Belgium. Her talk was illustrated with colored slides which she took while there.

Mrs. William Rhoades, lecturer, announced that representatives from the Social Security office and from the Office of Aging will speak at the next meetng May 22.

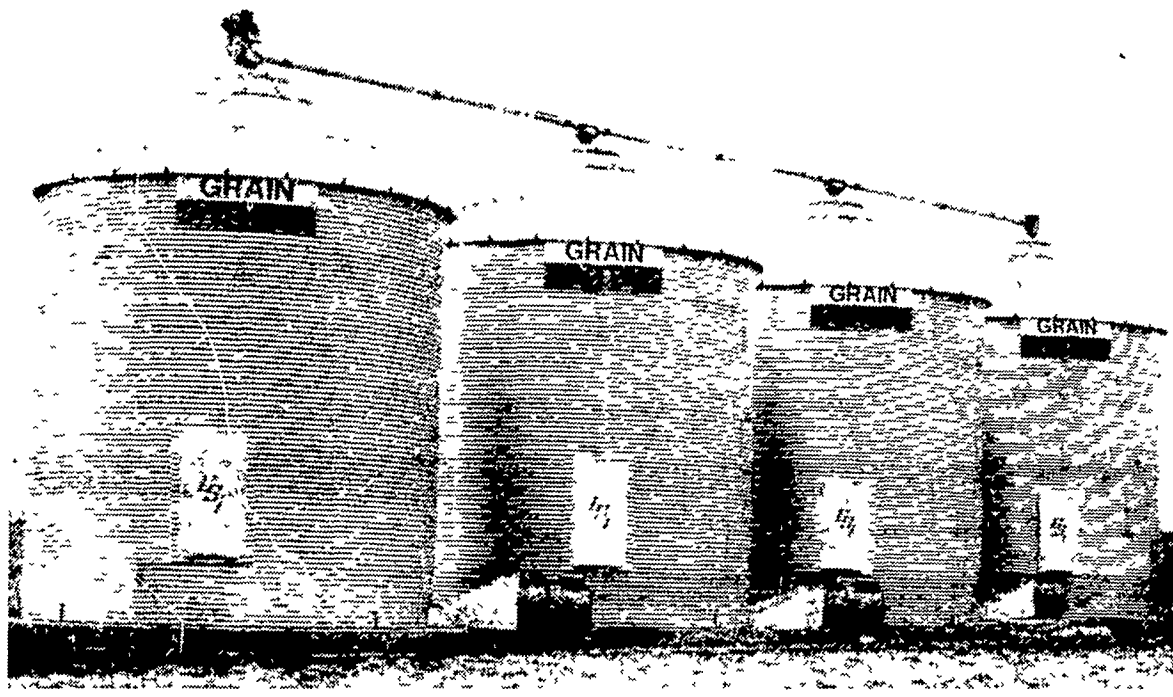
THE SYSTEM



A GSI ON-FARM STORAGE SYSTEM.

FEATURING:
- All galvanized steel with G-90 galvanized coating, including galvanized doors.
- Our steel is A446 Quality or a minimum yield of 40,000 pounds per square inch.
- Walk around steps on top of roof.
- Equipped with safety rings.
- No welding anywhere on roof, prevents rust.
- Slotted holes to raise & lower roof for air movement for drying.

GSI has the system to meet your demands. An on-farm storage system that lets you harvest when you're ready and sell when the price is right. From one bin to an entire system, GSI bins are priced right!

GSI manufactures farm bins up to 60 ft. diameters with capacities to 157,000 bushels. Sturdy construction for maximum grain protection, with important safety features. Easy field assembly.

To complete the system, GSI offers an entire drying package and a full line of grain handling equipment to match your needs. GSI on-farm storage systems . . the profitable solution.

Recipe Swap

It's the third weekend in May and time for our monthly recipe swap. This week many of our contributors answered two pleas – one from Mrs. Garloff, Millport, for opera fudge and potato candy, and one from Linda Siegrist for black walnut cake.

We still are looking for dried corn recipes, other than those for pudding. If you have one or two such recipes, send them to us as soon as possible.

And, Mrs. Norman Brown of Runnemede, N.J., would appreciate some help with a snapper soup recipe. She writes, "We've hunted through a number of cookbooks in stores, but we can't come up with the one we want. We have a recipe, but it's for a cream sauce. I would like one that's spicier, maybe with tomatoes. We'd appreciate it very much if someone could come up with the recipe for spicy snapper soup."

And, repeating a request, Mrs. Barbara Kinney is asking for a "recipe" or method for setting color in a piece of yard goods. She says she was given yellow material (100 per cent cotton), and unfortunately, it bleeds when washed.

If you think you can help these ladies, send your contributions to "Recipe Swap," **Lancaster Farming Newspaper**, Box 366, Lititz, Pa. 17543.

And, if you would like our contributors to help you out with a lost or new recipe, write us at the same address with your request.

MASHED POTATO CANDY

½ cup warm mashed potatoes
1 pound confectioner's sugar
½ cup peanut butter

Mix the warm potatoes with sifted sugar. Roll into an oblong shape. Spead with peanut butter. Roll like a jelly roll, then cut into slices.

Mrs. Fern Miller
Greencastle, Pa.

xxx

POTATO CANDY

¾ cup mashed potatoes
1½ cups sugar
1 teaspoon lemon extract
1 cup cornflakes
1 cup chopped peanuts
Dash salt

Gradually work sugar into potatoes, and add the remaining ingredients. Press into a greased pan. Let stand for 24 hours. Cut into squares.

xxx

POTATO CANDY

½ cup mashed potatoes
2 teaspoons butter
¼ pound coconut
1 teaspoon vanilla
Pinch salt
1 pound confectioner's sugar

Mash together the potatoes and butter. Allow to cool. Then, add coconut and vanilla. After this, stir in pinch of salt and confectioner's sugar. Beat until creamy. Press into a buttered tin. Candy should be ½ inch thick. Chill. When hard, spread with four squares of melted sweetened dark chocolate.

Mrs. Wayde Farnsworth
Muncy, Pa.

xxx

POTATO CANDY

1 small potato (boiled)
¾ box confectioner's sugar
1 teaspoon vanilla
1 cup peanut butter (chunky type may be used)

Mash boiled potato. Add confectioner's sugar gradually to form dough-like texture. More or less confectioner's sugar may be needed depending on the size of the potato used. Add vanilla and knead with hands. Dust board with confectioner's sugar and roll about ¼ inch thick. Spread with peanut butter. Roll and wrap in wax paper. Chill in refrigerator. When ready to use, slice and serve. Variations may be made by melting chocolate chips and spreading over peanut butter. Or, omit peanut butter and use one cup coconut and melted chocolate chips.

Esther Oberholtzer
Shiloh, Ohio

xxx

OPERA FUDGE CANDY

2 cups sugar
2 tablespoons light corn syrup
2 tablespoons butter
⅔ cup milk
¼ teaspoon salt
1 teaspoon vanilla

Combine sugar, milk, corn syrup and salt in a saucepan. Stir over medium heat until sugar dissolves. Cook to 234 degrees or soft ball stage. Remove from heat. Add butter and cook to lukewarm, without stirring. Add vanilla; beat until thick and no longer glossy. Pour into a buttered eight or 9-inch square pan. When set, cut into squares. Yields 36 pieces.

Mrs. James L. Coombs
Gardners, Pa.

xxx

OPERA FUDGE

½ pound cream cheese
½ pound butter
1 teaspoon vanilla
2 pounds confectioner's sugar

Mix all ingredients very well. Refrigerate until stiff. Shape and coat with chocolate. Then enjoy. Store in refrigerator because fudge gets very soft at room temperature.

Coating: ¼ block wax, five blocks chocolate melted in double boiler Add ¾ jar of large, smooth peanut butter for extra taste in opera fudge. Makes up to 125 pieces.

Marlene Bomgardner
Annville, Pa.

4-H club meets

KIMBERTON -- Jon Weinstock conducted the monthly meeting of the Tri-Community 4-H Club at the Kimberton Farms School.

At the meeting it was announced that there will be a family camping weekend on May 27 to 29 at French Creek State Park. Plans included games, chicken barbeque, and a square dance.

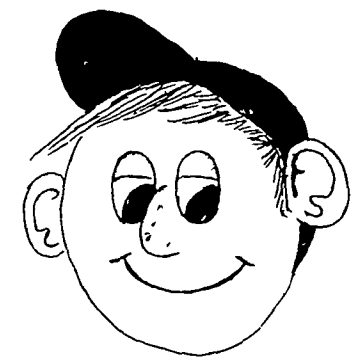
The group planned to enter a float in the Dogwood Parade in Phoenixville.

A film was shown concerning how a person could become a veterinarian. After the film Mrs. Lester High discussed the film and other aspects of being a veterinarian.

Nixnutz's Corral

By BARNEY NIXNUTZ

"All the news that's unimportant, but still interesting."



That's not heaven, no way!

Paul Dieter Krieg, the 5-year old son of the editor, loves animals including caterpillars. He's even concerned about the crawling little fellows getting to heaven properly.

Often unpredictable – as many children can be – Paul this week turned to his mother and announced in a concerned tone of a voice that she should not have placed his caterpillar in the trash.

The little fellow's statement took Mother Lisa by surprise. Paul had kept a pet caterpillar last Fall, and when he died he was thrown out. Paul hadn't forgotten.

Affectionately known in the family as "Tigger," the 5-year old boy said: "You shouldn't throw my caterpillar out."

"He was dead," his mother explained in a comforting voice.

"Tigger"

young Paul, who pleaded: "Well, you shouldn't put him in the trash. You should put him in heaven."

"Well, that's where he went – he went to heaven," his mother continued.

Paul was shocked and he rose to emphasize his point. "Not in the trash – that's not heaven – no way, no, no, and not in the garbage truck either!"

But that wasn't enough for

Mother Lisa countered the short outburst of protest in as comforting a way as she could. Loving the little fellow dearly, she told him that the caterpillar she threw out was just an outside body which the creature wouldn't need in heaven. "God will give him a new body in heaven," she explained.

Paul thought about that a while before making his final appeal:

"Next time you should build him a house with a roof on so the rain can't come in. Don't throw him in the trash."

With that Paul returned to his playing in the living room. But you can never tell what he'll come up with next and that's just one of countless reasons we love him so much.

Stormwater mismanagement a problem for farmers

By KENDACE BORRY

MOUNT JOY – Progress is supposed to mean steps forward and improvement in the way of life but this doesn't always seem to be the case. A good example is what happens to stormwater management as more and more of the countryside is covered with buildings and concrete.

According to Henry Hackman, consultant for the Lancaster County Conservation District, mismanagement of storm water can cause damage to fields, lawns, and homes. One example of such an action that he cited is the occurrence of run-off water causing streams to overflow and banks to erode. He noted that small streams and stormwater channels are now carved into gorges due to excessive waterflow through their channels.

At a recent conservation meeting, Hackman told his audience that he considers it injustice to tax-paying citizens that one person's building projects are the cause of water damage to another person. "There are no rules or standards for stormwater management," he stated.

"We never had erosion like this until the development came along", Hackman pointed out while showing a slide of one built-up area in Lancaster County that adjoins prime farmland. "This is why we need storm water management law and plain management law SB 743 and SB 744."

For a more complete story on this proposed legislation, see the article in this week's **Lancaster Farming.**

One example of such a problem is happening on the Glenn Snyder farm, near Mount Joy. What was once farmland adjoining his land has now been turned into the Rapho Industrial Park.

According to Snyder, his problems started about five years ago when the buildings started going up. The field he works which is next to the industrial center started giving him trouble.

"The water from rainfall gathers in a pool at a low spot in the land which borders my land", Snyder explained. "Then it comes over on my land, stays there, and makes the center of my 12 acre field too wet to work."

The result is manyfold. Snyder tell of trucks getting stuck in the field when trying to harvest, of not being able to get into the field to work his crop because of conditions being too wet, and of a hand-dug well nearby which becomes muddy, with the result that his cattle won't drink.

"I could put a grassland waterway through the center of the field, but then the water would just go into another field," Snyder added, In his words, that would just be moving the problem from one spot to another.

According to Henry Hackman, there is no law as of now to cover what is happening on the Snyder farm. "This is mismanaged water," he stated. "It's not covered under the Clean Stream Law. This is damage that occurs after the water leaves the property which is causing the problem."

Henry H. Hackman

Snyder, who said he is trying every angle to get the problem corrected, noted that he doesn't know what will happen next. "It seems to be a yearly problem," he admitted. "And every year it seems to be getting worse."

There are 45 acres of land involved in the industrial park. A spokesman for the managers of the park, Clabell Management Company, who state that they simply manage it for the owners, noted that they had been contacted about the problem.

"Henry Hackman has been to see us and we discussed the problem," Bill Horst, representing the company, related. "And we

(Continued from Page 40)

it? By the year, 2000 , how much land should remain in agriculture? What should be the population density? Where should the people be and where should the farms be? How much more industry should we have in the County by 2000?

"My own goal is that we should have enough additional industry to provide jobs for our young people. In all honesty, I don't think my primary goal is achieveable. Former Oregon Governor, Tom McCall, found out that it is difficult to keep people out of an area. Many of them want to see what is to special about an area from which an attempt is being made to exclude them.

"My secondary goal for Lancaster County is to guide growth away from our best farmland. I believe this goal is achievable if certain things happen. I hope we can accomplish this.

"I guess I feel so strongly about what happens to Lancaster County because our land and our farmers are so special. In Lancaster County, 76 per cent of the land we farm falls in Class I, II, III. The average for the State is 38 per cent. Nearly 50 per cent of the agricultural production in the County is produced on farms operated by Mennonites and Amish farmers.

"Where else in the United States do we find farmers outbidding developers for land to farm? And they are paying such amazing prices. Few of us can understand the economics involved, but it is happening.

Don't forget that we are talking about the leading agricultural county in the United States that does not depend on extensive irrigation for its production.

Past development patterns reveal that for each 100 increase in population, 75 acres were removed from agricultural production.

"During recent congressional hearings on the National Land Use Policy Act, a citizen of Monclova Township, Ohio near Toledo, read the following statement and I quote: 'Nowhere in the United States does a community tear down a thriving factory in order to put up developments or make room for more industry. Why then, because four brick walls do not enclose our farmlands, would any community, county, or state want to encorage destruction of the farm factory with its proven record of successful contribution to our society?'"

"To my knowledge, no one here today is guilty of encouraging the destruction of farmland. To the contrary, the actions of the State Legislature and the County Commissioners have been most helpful. At the State level, I would cite as examples, Act 515 and 319. The water and sewer hookup exemption for farmers and a number of other favorable actions have been taken by the

Legislature The Lancaster County Commission present and past, have kept assessments on farms at reasonable levels The light sign-up in Act 319 by our farmers is ample proof of that

"I suppose the greatest fault one could find with the State and local government is that there has been very little action taken to direct growth away from our best agricultural land

"John Ahlfeld and his staff have established some important goals for Lancaster County I am referring to those goals set forth in Directions, a comprehensive plan for the County adopted by the Planning Commission and the County Commissioners in 1975

"As most of you know, Directions has set as a goal the retention of 237,000 of our best farmland by the year 2000. This would allow more than 150,000 acres of land presently used for agricultural production to be used for other purposes. I trust this much will not be needed. In fact, if the recommended shift, as outlined in Directions, toward a higher concentration of residential land use rather than the current scattered development could be achieved the projected 200,000 population increase by the year 2000 plus all expected industrial could be housed on less than 50,000 acres. Past development patterns reveal that for each 100 increase in population, 75 acres were removed from agricultural production.

"All of us know, Directions is a comprehensive Plan. Very little that is desireable will happen if the plan is not implemented.

"Nowhere in the United States does a community tear down a thriving factory in order to put up developments or make room for more industry. Why then, because four brick walls do not enclose our farmlands, would any community, county, or state want to encourage destruction of the farm factory with its proven record of successful contribution to our society?"

"In Santa Clara County, California, Karl Belser, a director of their Planning Commission, had a plan for the development of their County. He reccommended residential development be guided to the foothills in the county and allow the rich valley to remain in agricultural production.

"Mr. Belser's plan was not followed. Instead 800,000 people moved into Santa Clara Valley in 20 years. Commercial agriculture in the county has been destroyed. What has been the economic impact on the county? The cost of services demanded by the new residents has far exceeded the tax revenue to support those services and as a result, Santa Clara County has the highest per capita debt load of any county in California.

"Is this our goal in Lancaster County? Sometimes I think this is the goal of some of the citizens of the county.

"Now there were several news articles appearing in our local papers that just about scared the devil out of me and I assure you it takes a lot of scaring to accomplish that.

"One headline said, Lancaster 2nd in industrial growth. Mention was made of 38 new industrial operations in 1977. I thought it was bad enough. I was advised that the Pennsylvania's Industrial Development Authority report stated that in the ten county Capitol area of the total 72 industrial sites projected to be located in the 10-county area, 50 were projected to be located in Lancaster County. Now we have 38 in one year.

"Then came the announcement that the Pennsylvania Dutch Tourist Bureau hired a young executive director named James Bartlett. I believe he was brought in from Philadelphia. I would have been more comfortable with an individual like Jim Cox. Mr. Bartlett's goal is to increase substantially their advertising budget and thus bring in many more tourists to further conjest our overcrowded highways. In addition, I am not sure just how much more harrassment our Amish farmers can take from these tourists.

"The total reported expenditure by tourists in 1975 was 108 million. This is a sizeable amount of moving. However, in 1974, according to the lastest census figures, farmers in the county spent 199 million dollars on farm production expenses, a sum of 54 per cent greater than the income from tourism. Farmers in this county also stimulate the economy.

"I believe we can live with reasonable growth in tourism and industrial development. However, let us not over do it.

"How can growth be guided in Lancaster County? There are a number of ways to do it. However, it is generally agreed by most people to whom I have spoken, that the only sure way to save farmland for use now and in the future, is the purchase of the development rights to land.

"You might say that there have been cheaper ways. There are cheaper ways, but they are not permanent.

"The Preferential Assessment Acts 319-555 are important tools but not long lasting. Agricultural Zoning is a solution much talked about these days. It is an approach that is better than preferential taxation, but still not very permanent. In Clay Township, for example, they have adopted a good agricultural zoning ordinance. However, a Clay Township Supervisor, a life-long resident of the Township told me last year, based on trends and pressures for development in his township, he can see no

AVCO NEW IDEA FARM EQUIPMENT

MODEL 769 UNI FLAIL-MATE

EXCLUSIVE NEW MACHINE

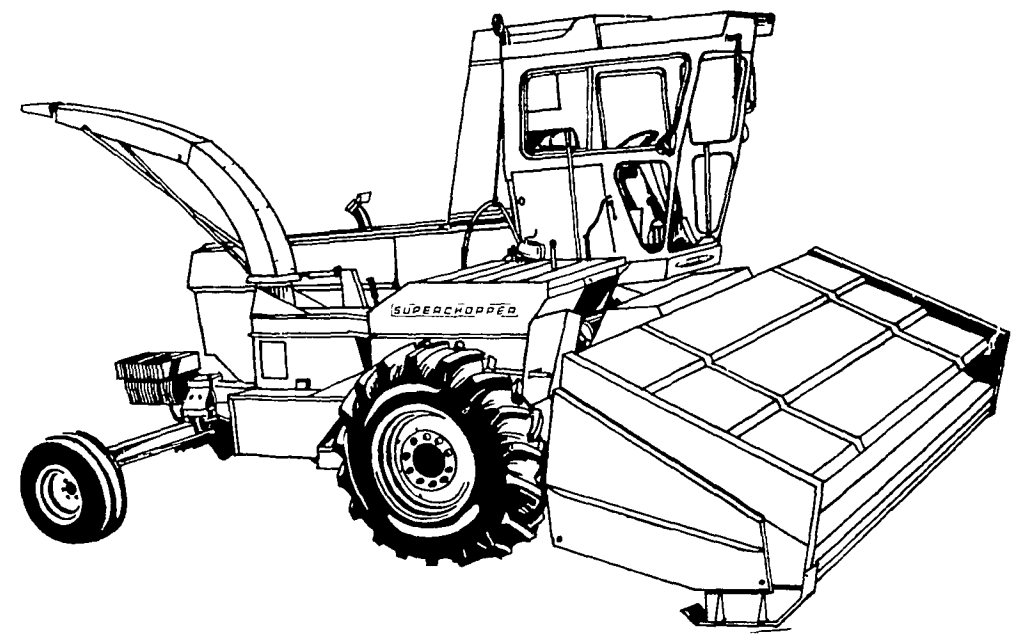
Expands your Uni-Forage Harvester versatility.

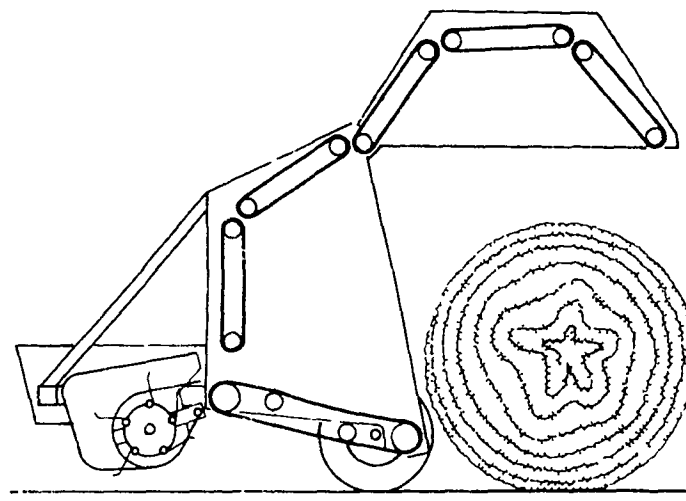
MULTI USE — MULTI CROP

It's a Cut/Ditioner, Windrow Pickup, Direct Cut Head.

The new Model 769 Uni Flail-Mate is the industry's first forage harvester attachment capable of performing as a Cut/Ditioner, windrow pickup and direct cut head with changeover in less than five minutes. It has a 12-foot cutting width for big capacity, reduced harvesting time of hay and crop residues and minimum soil compaction.

FLAIL-MATE . . . one more reason why Uni-System just plain makes more sense.





THE BALE KING

Look for the star. It's your way of knowing the bale hasn't been tightly wound, squeezed and compacted all the way from the center out. The Avco New Idea Bale King gives you the star in the center that tells you the hay is still soft. The bale is compacted from the outside inward to give a hard wrap for extra protection against the weather as well as shape retention in storage.

Look for positive, easy start. The open chamber design and positive-start pickup feeds hay, straw, or cornstalks right into the chamber. You can stay right in your tractor seat for easy, safe operation from start to finish.

(Continued from Page 102)

FANNIE FARMER BLACK WALNUT CAKE

½ cup butter
½ cup brown sugar
¾ cup white corn syrup
4 eggs
3 teaspoons baking powder
½ cup milk
2 teaspoons vanilla
2½ cups pastry or cake flour
For Top:
¼ cup chopped black walnuts
¼ cup brown sugar

Cream butter. Beat in sugar, corn syrup, and vanilla. Add whole eggs, one at a time, beating thoroughly.

Sift dry ingredients together and add alternately with milk. Spread in shallow pan 6 x 10 inches. Sprinkle with nuts and sugar. Bake about 20 minutes at 375 degrees F.

xxx

WALNUT CAKE

3 cups sifted cake flour
2 teaspoons baking powder
1¾ cup sugar
1½ teaspoon salt
1 cup soft shortening
4 eggs, unbeaten
¾ cup milk
2 teaspoons vanilla
1 cup very finely chopped walnuts, any kind

Heat oven to 365°F. Grease nine-inch tube pan, 3½ inches deep, then line bottom with wax paper. Have shortening, eggs, and milk at room temperature. Into large bowl sift flour, baking powder, sugar, and salt. Drop in shortening, two eggs; pour in milk, vanilla. At medium speed, beat two minutes, scraping bowl and beaters as needed. Add two eggs; repeat, beating as before. Fold in nuts. Turn batter into pan. Bake one hour or until cake tester, inserted in center, comes out clean. Cool 10 to 15 minutes. Then loosen cake with spatula, remove, and cool. Serve unfrosted; or boil two tablespoons white corn syrup with two tablespoons butter or margarine three minutes, no longer. Decorate cake with a few walnut halves and pieces of candied citron or pineapple, then drizzle with this glaze. You may substitute any kind of nuts, or one teaspoond almond extract and one teaspoon orange extract for vanilla. This cake freezes well.

Mrs. Fern Miller
Greencastle, Pa.

xxx

CARIOCA CAKE
(One bowl)

2 cups sifted all-purpose flour
1⅓ cup sugar
3½ teaspoons baking powder
½ teaspoon salt
½ cup shortening
1 cup milk
1 teaspoon vanilla
4 egg whites
1 cup finely chopped black walnuts

Heat oven to 350°F. Grease and flour two nine inch round layer cake pans. Sift flour, sugar, baking powder, and salt into mixing bowl. Add shortening, milk, and vanilla; beat two minutes at medium speed on electric mixer or 300 strokes by hand. Scrape bowl frequently. Add egg whites; beat one minute. Fold in nuts. Pour into prepared pans. Bake 25-30 minutes or until cake tests done. Fill and frost with Seafoam Frosting. Decorate with additional chopped nuts, if desired.

xxx

SEAFOAM FROSTING

¾ cup brown sugar, firmly packed
3 tablespoons water
⅓ cup dark corn syrup
3 egg whites
1 teaspoon vanilla

Combine brown sugar, water, and corn syrup in saucepan. Cook over medium heat until sugar is dissolved and mixture begins to boil. Boil, with stirring, until mixture reaches 242°F. on candy thermometer or until syrup spins six to eight inch long thread from tip of spoon. Just before syrup reaches temperature, beat egg whites until stiff, but not dry. Pour hot syrup slowly in thin, steady stream over beaten egg whites. Continue beating until frosting holds peaks. Fold in one teaspoon vanilla. Enough to fill and frost two eight or nine inch layer pans.

Twelve Lancaster Co. youths win scholarships

By KENDACE BORRY

LANCASTER – Twelve Lancaster County students have received scholarships from the Lancaster County Farm and Home Foundation for the 1978 year. The awards, which were announced this week, are for the amount of $500 each.

Eight of the scholarships, given to students which are in the field of agriculture and home economics, were provided by earnings from a trust established by the late Elmer L. Esbenshade, who was a founder of the organization. The money for the nursing scholarships comes from funds from the Foundation's treasury.

The money is to be used to help defray the cost of tuition, fee, or room and board as the youth pursue their educational goals. The selection of the winners was based on financial need, scholastic achievement, and leadership ability.

Agriculture and home economics scholarship winners were:

Sheryl Ann Bollinger, 18, Lititz R4, the daughter of Mr. and Mrs. Warren Bollinger, will go to Penn State to study agriculture. She has served as secretary and treasurer of the Ephrata Cloister FFA, a member of the Ephrata 4-H Club and the Lancaster County Holstein Club.

Martha R Gregory, 18, Lititz, will graduate shortly from Warwick High School. She plans to study food science in the college of agriculture at Penn State. A member of 4-H and FFA, she is the daughter of Mr. and Mrs. Robert Gregory.

June R. Grube, 18, Manheim R7, has belonged to 4-H clubs for ten years. A graduate of Hempfield High School, she is co-president of the Lancaster County 4-H Council. She plans to study home economics at the University of Delaware. She is the daughter of Mr. and Mrs. Weidler Grube.

Daniel P. Hershberger, 18, Quarryville R4, also plans to attend the University of Delaware, where he will major in dairy science. The FFA member is the son of Mr. and Mrs. Robert Hershberger.

Lester Hershey, 18, Kirkwood R1, hopes to study agriculture at the Hesston College, Kansas, or the Eastern Mennonite College, Harrisonburg, Va. The son of Mr. and Mrs. Floyd Hershey, he will graduate from Solanco High School shortly.

Phillip Risser, 17, Leola R1, is the son of Mr. and Mrs. Allen K. Risser. He plans to study agricultural engineering at Penn State. He has been involved in 4-H activities for nine years.

Barbara Trimmer, 18, Elizabethtown, plans to study nutrition at Penn State upon graduation from Elizabethtown Area High School. The daughter of Mrs. Shirley A. Trimmer, she is active in many school activities.

R. Lamar Witmer, 18, Mount Joy R3, plans to at-

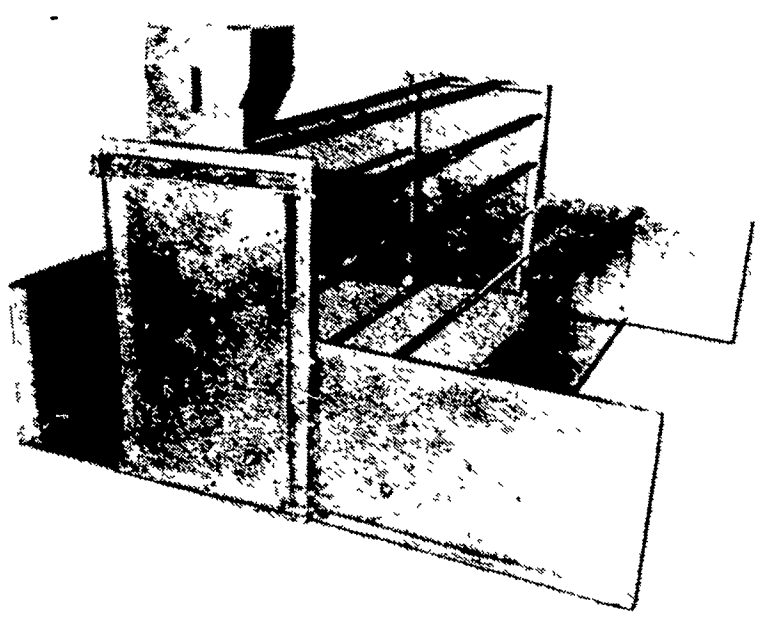
Northco Farrowing Crates....

THE TOUGH FARROWING CRATES



EASY TO CLEAN - There's a minimum of places for manure to hang-up and the round side-rails make clean-up easy. This means better sanitation and longer crate life. Northco Farrowing Crates in use since 1968 are still in good condition.

LABOR-SAVING - Northco Farrowing Crates can raise more pigs with less labor. Automatic feeding, watering and controlled manuring reduce the "busy" work of farrowing and increase the time available for management.

PIG-SAVING - Farrowing crates can help you wean an extra pig or more per litter according to customer experience and university research. Those extra pigs add up to extra profit for you.

Heavy-gauge, galvanized steel construction makes Northco Farrowing Crates tough . . . to stand up to hog-house abuse. But Northco Farrowing Crates are more than strong.

Optional manual metering hopper is available for use with an overhead fill system.

LMA denounces proposed rate rules

KANSAS CITY, MO. – A United States Department of Agriculture proposal to force all livestock marketing businesses to charge for their services on a per-head basis only, and subject the charges to arbitrary approval or disapproval, has been flatly rejected by the Livestock Marketing Association. A trade group spokesman denounced the proposal as "contradictory," and "deceptively the opposite" of the Department's claim that the step represents a move toward deregulation.

"Not only would the proposed regulation impose a costly and depressive burden on livestock marketing," said C.T. 'Tad' Sanders, general manager of the association, "but the announcement of it by the government as a step toward less regulation is an affront to the industry."

"In contrast to what the five regional publicity offices of USDA's Agricultural Marketing Service proclam as 'deregulation', the actual proposal is deceptively the opposite", he charged.

Acting at its quarterly meeting in Kansas City, April 19, LMA's 25-man board of directors strongly endorsed a resolution to "vigorously oppose" the recent rate proposal by the Packers & Stockyards - AMS, on the grounds that:

– it is contrary to the preponderance of views expressed at this Winter's seven-city hearings on P&S rate policies;

– it is misleading because litigation regarding two Circuit Courts' decisions relating to the rate matter is pending on Supreme Court petitions for review; and

– it tightens arbitrary regulation authority of the Department of Agricultural Marketing Service over all rates and charges for livestock marketing services.

The USDA published the rate proposal and policy statement on March 30, and has asked for written comments to be filed by May 30, 1978.

Sanders said that the leadership of the marketing sector could only view the P&S proposal as "arbitrary and contradictory".

"There is simply no way that a review of the testimony in the public hearings will support the position set forth in the proposal and policy statement. The overwhelming view expressed from city-to-city, when assessed with any degree of objectivity, called for a loosening of government regulation of rates, and in no way pointed to the establishment of a mandatory per-head rate basis, and arbitrary limitations on them," Sanders emphasized.

Sanders said that the Board's action included a reiteration of its on-going "Freedom in Livestock Marketing" campaign, which pursues deregulation through all available avenues.

"We will continue to work for deregulation through more enlightened administration of current laws. We will continue to work for deregulation through new legislation. And we will continue to work for deregulation by mobilizing the support of the entire marketing sector, and the attention and understanding of the entire livestock industry," Sanders said.

Ag secretary warns gardeners

HARRISBURG – "Every Spring, newspapers and magazines are filled with advertisements for nursery products ranging from grasses which 'never need watering' to trees which 'grow to maturity within a year,'" says Agriculture Secretary Kent Shelhamer. "Farmers and home gardneers who are in the market for nursery products should not be taken in by frivolous claims without first getting good solid advice from local dealers."

Shelhamer said that many of the ads are little more than half-truths, and noted that their effect is to "excite the reader, confuse the buyer and reap huge profits from the distributor." Many of these ads offer common plants for sale without giving the reader the true name of the material, he said.

"A home gardener or a farmer deserve top quality products when investing money into improving his land," the agriculture secretary said. "We have received numerous complaints in the quality of products offered for sale through advertisements in magazines and local newspapers."

Shelhamer said that before buying a product, the smart consumer should check with a local dealer to get a better idea of the quality of the product being offered. It is important to rely on a hometown dealer, according to Shelhamer. "When you buy at a local story or outlet, you know that you can trust the dealer."

Foreign ownership of U.S. farms 'overplayed'

CHICAGO, Ill. – Although there is growing apprehension among some U.S. farm groups and state legislatures that foreign investors are gobbling up prime farmland and driving up land prices, that fear apparently is unwarranted.

That was the consensus of a telephone survey conducted recently by the National Association of Realtors of foreign and domestic investment counselors.

The Missouri legislature, acting in response to pressure from farm groups, recently passed legislation designed to prohibit all further foreign investment in farmland to be used for agricultural purposes. However, the legislation – signed into law April 28 by Gov. Joseph Teasdale – will not prohibit purchases of farmland to be used for other purposes.

Across the border in Iowa, the state legislature is considering several amendments to the state's corporate farming law enacted three years ago and amended for the first time last year. As a result of the law, Iowa is the only state that requires foreign landholders to register by nationality. The 1977 amendment restricted holdings by foreign corporations to 640 acres.

Amendments under consideration now would prohibit all further foreign purchases of farmland in the state. In addition, it would limit leases of farmland to five years.

Illinois farmers also are worried. Representatives from various farm groups recently met in Springfield with state officials and authorities from the federal government's General Accounting Office (GAO) to discuss the situation. In addition, the Illinois House Agriculture Committee recently sent the full House a bill that would severely restrict foreign investment.

Concern is not restricted to these three states or the state level alone. In fact, the GAO currently is conducting a national investigation into the extent and location of foreign investments in agricultural land. In addition, an Agriculture Department study of the feasibility of monitoring all foreign investments in domestic farmland merely awaits funding.

Just how extensive are foreign investments in U.S. farmland? The answer is elusive.

According to Milton Berger, director of the Commerce Department's Office of Foreign Investment in the U.S., "we really don't know. What we are seeing may only be the tip of the iceberg. You can't hide the purchase of a factory, but little is known about sales of farmland."

He explained that the actual owners of property are often difficult to discern. With the exception of Iowa, he continued, state land recordation laws do not require foreign buyers to reveal their identities.

The most comprehensive data on foreign investments now is almost four years old. The Foreign Investment Study Act of 1974 required the Commerce and Treasury departments to donduct a thorough survey of foreign investments in the United States. The results were reported to Congress last Summer.

As of the end of 1974, according to the survey, foreign interests owned just over 1 million acres of agricultural land in the U.S. Berger explained that foreign holdings comprised only 0.1 per cent of the 1.1 billion acres utilized for agricultural purposes in the nation.

Are farmers' fears justified? Investment counselors in the field tend to feel the situation has been overplayed by the media.

M. Thomas Lardner, Chicago-based executive vice president and general manager of U.S. operations for Lehndorff Management, Hamburg, West Germany, agrees with them. Lehndorff generally is acknowledged to be the largest manager of European investment capital in North American properties.

Lardner pointed out that Lehndorff controls some 300 properties with an asset value of $1 billion in the U.S. and Canada. Less than 1 per cent of the asset value is in farmland, he said.

The firm manages only 16,000 acres in farmland, the bulk of which is located in the South. Northern farmland is considered overpriced, he explained.

Lardner anticipates no increase in foreign farmland investments in the foreseeable future because "no one is convinced they will make much profit."

"The biggest problem now," according to Ken Shulman, a Dallas Realtor, "is how do you sell something whose price currently has surpassed its economic value?"

Duane Sandage, an Ames, Iowa, realtor, explained that most foreign investors interested in farmland want an investment that will at least break even. Low commodity

4-H horse club meets

MANHEIM – The May meeting of the Boots and Saddles 4-H Horse and Pony Club was held on Friday, May 12 at the Farm and Home Center.

Reports were given on the club's Open Horse Show. The details of the club's exhibit for the 4-H Expo on May 31 to June 4 were also reported.

The May 6 gymghana that was postponed due to rain has been rescheduled for June 3 at Fellenbaum's. Another gymghana will be held on June 25 also at Fellenbaum's. Also discussed was the possibility of having a Fun Show, camp out, and trail ride on August 26 and 27.

Sharon Gernert presented a demonstration on qualities to look for in a western saddle. Helping with the presentation were Lisa Cope who pointed out the parts of a saddle, and Lashon Bussell who talked about a "balanced ride" saddle. A second demonstration was presented by Karen Eberle concerning twisted intestines and colic.

The next meeting will be held on June 9 at the home of Pam and Lori Sammons at 7 p.m.

Harvestore appoints new sales manager

ARLINGTON HEIGHTS, Ill. – Harold T. "Hal" Fahner has been promoted to eastern regional sales manager for A. O. Smith Harvestore Products, Inc., Harold Davis, director of marketing for the company announced here.

Fahner, formerly manager of the company's Wisconsin sales area will supervise sales and marketing activities in four company sales areas, including 14 midwestern and northeastern states and the Canadian province of Ontario.

Hal Fahner

N. Lebanon Young Farmers meet

LEBANON – The Northern Lebanon Young Farmers met recently in the Northern Lebanon vo-ag classrooms.

Thomas Bender, teacher and football trainer at the high school, presented a program of movies and demonstrations concerning first aid to the group. A letter from the Lebanon County Milk Promotion Committee was read. The group decided to support the dairy princess contest.

Refreshments were served after the meeting.

have a nice weekend...

Foreign ownership

(Continued from Page 111)

prices in recent months have had a depressing effect on yields.

Shulman is senior vice president of the Investment Marketing Division of the Henry S. Miller Co., Realtors. Sandage is principal in the firm Duane Sandage Real Estate and Farm Management.

Both agreed that – in their respective areas – both overall acreage and dollar value of agricultural land in foreign hands is low. Sandage estimated that less than 01. per cent of all farmland in Iowa is owned by foreign investors.

Do foreign investors drive up land prices?

George A. Simon, principal in George A. Simon, Realtors, Miami, put it this way: "A foreign investor is as shrewd as an American investor. In order to have money to invest here, he had to be smart enough to make it. Foreign investors don't pay any more. Why would they?"

Bake Young, principal in Bake Youn Realty, Nampa, Idaho, and 1978 president of the Farm and Land Institute, an affiliate of the National Association of Realtors, summed it up. "The same people who complain about outside buyers are the first to beat a path to your door when they want to sell their property. They think you can get top dollar for it."

Farm Women urged to become involved at rally

By SALLY BAIR
Staff Writer

HERSHEY -- Humor, inspiration, and some plain talking about the problems facing American agriculture brightened a rainy day for the 1300 Farm Women members from 18 counties who attended the Spring Rally held Wednesday at the Hershey Convention Center. Members of the Lebanon County Society of Farm Women were hostesses for the annual event.

Gail McPherson, Maple Lawn Farms, York County, called on the Farm Women to get involved in telling the story of agriculture to people who do not understand it. In an emotional appeal, Mrs. McPherson painted a gloomy picture of the future of agriculture because of what she termed a "cloud of regulations over agriculture."

Mrs. McPherson said that a farmer "is really not his own person," because of the myriad of regulations by the Occupational Safety and Health Act, the Environmental Protection Agency, the Department of Environmental Resources and other regulatory agencies.

A farmer couldn't operate if he had to adhere to all the safety standards of OSHA or if they were all strictly enforced, she said. The requirements change rapidly, and no one can afford to keep up with the changes.

Calling the regulations a "near nightmare" for those called to the land, Mrs. McPherson said that young people choosing to enter agriculture today "are facing problems you never dreamed of."

In her job as an active partner in the Maple Lawn orchard operations, she has had her share of interaction with regulatory agencies. She recalls the OSHA inspector who walked directly into the path of a forklift which was backing up, and the DER inspector who called to see what regulations he was to be inspecting for. There was also a fruit inspector who

Gail McPherson

didn't know the difference between a bruise and rot.

One of the problems with the abundance of governmental regulations, McPherson said, is, "There are so few people left with a close association with the soil. The people who have all the votes know the least about agriculture; they take everything they hear at face value and don't get the facts." She said that the survival of agriculture as we know it and as we need it is often in the hands of these powerful, but misinformed people.

As an example of misguided concern, she noted the nitrates in such things as bacon and bologna which Assistant Secretary of Agriculture Carol Tucker Foreman would like to have eliminated. "Without nitrates," Mrs. McPherson said, "we would die of botulism." To cover that eventuality, Mrs. Foreman proposed to use a lable warning that such foods must be kept refrigerated at 40 dgrees Fahrenheit at all times. Mrs. McPherson pointed out that for nitrates and nitrites to hurt people they would have to consume 15,000 pounds of the product a day - quite a lot of bacon! She said that taking one aspirin or drinking two cups of coffee is more harmful than all of the so-called harmful residues in agricultural products consumed in one year.

Mrs. McPherson said that what is needed is an agricultural public relations program with people taching people what food is all about. She said, "There is no hope of sunshine until the non-farm segment of the population realizes that food is important." Those who believe in farming as a way of life and those who feel the family farm concept is important must work together to preserve agriculture."

She called the organization of women's agricultural groups around the country "the rumbling of a great earthquake." In Pennsylvania we are organized not because there is a crisis, but because we don't want a crisis." Mrs. McPherson urged all farmers and those interested in agriculture to concentrate on the goals they share. "We can do it together."

She believes it is vital to educate urban consumers who are moving to the fringes of farms about the "whys" of farming' why it is necessary to spread manure and lime; why spraying must be done for insects and disease; why animals sometimes get out of their fences. These "whys" must be explained before those urbanites get angry and want to have ordinances banning these vital farming activities.

Mrs. McPherson noted that agriculture is central to the entire economy - it provides one-sixth of the gross national product, one-fifth of the total labor, and one-quarter of the total export earnings. "We pay a lot of bills," she said in an understatement.

While emphasizing that farmers must be protected from unnecessary laws, she said farmers want to be allowed to produce food freely. Farmers feel that the risk of operating under an open market is less than the political risk they may face.

Mrs. McPherson noted the work of Penns Agri Women and American Agriwomen in speaking up for agriculture. She is a charter member of both organizations. She cited the Agriculture Council of America as providing "a medium for the message of the farmer."

The Reverend Elmer Horst, pastor, Fishburn United Methodist Church, Hershey, provided the inspiration for the meeting by telling what he called a "corny" story.

Citing parables as a story-telling method, he discussed the things which can be done with corn - it can be thrown away, stored, eaten or planted.

To throw away corn seems criminal, Horst said. However he noted that in the harvest, some corn does not reach the wagon or truck and is lost. In the same way, "many a life has never been fully harvested. Think how much time you waste in 24 hours. Sometimes we just coast along."

Corn can also be stored, and Horst noted that when he lived on the farm, a full corn crib gave him a sense of security. "But all that corn is no good in a bin. Anything not used is useless." He explained that stored talents will die; muscles which are not exercised will become

Report tells of Md. ag research

COLLEGE PARK, Md. — "Agricultural Research: An Investment in Maryland's Future" is the title of the latest annual report from the Maryland Agricultural Experiment Station, headquartered at the University of Maryland in College Park. The report describes the work of the station in areas of environmental quality, pest management, new crop development, animal nutrition, and poultry and egg production.

Scientists at the station are attacking problems facing agriculture in the future in a number of ways, according to the 1977 annual report.

As part of protecting and improving water quality, scientists are identifying and assessing problems caused by specific categories of pollutants. The researchers are looking at several agricultural practices to see what effects they have on sediment, soil nutrients and pesticide problems under differing soil and water conditions. Further data from the experiments will be used to evaluate the effects of management practices on reduction of pollutants.

Another environmental study under way is establishing guidelines for the safe use of sewage sludge on agricultural lands. Methods have been developed to monitor heavy metals in sewage sludges, soils, and plants. This enables researchers to determine the influence that soil properties and temperature have on the availability of heavy metals to plants. Once safe guidelines for sewage sludge use are developed, a big part of the problem of disposing of municipal wastes will be resolved.

Pest management is another new approach to an environmental and economic problem facing farmers and other members of the agricultural community. It allows farmers to increase the available food supply in a more efficient and economical way. The Maryland Agricultural Experiment Station conducts a multi-pronged research effort in this area, involving plant breeding, and use of safe chemical and biological controls along with the study of ecological and cultural practices in reducing pest numbers.

An example of new crop development involves research on strawberries. Two new Maryland varieties have been released since 1974, and scientists continue work to improve and breed new strains that will be resistant to diseases and insects.

The station also has research programs with field crops, vegetables, fruit, urban horticultural products, flowers and new cash crops suited to Maryland's soil and climatic conditions.

In livestock research, the experiment station is placing increased emphasis on animal nutrition and the nutritive value of animal food products.

Maximum use of grain by-products, forages, high-fiber by-products and nonprotein nitrogen sources by dairy and beef cattle and sheep are important goals of the experimental work.

The experiment station also provides a research foundation for maintaining and expanding the poultry and egg industry in the state. This research – both basic and applied – is divided into several areas, including diseases, management, pollution, physiology, nutrition and product technology.

Nitrogen on no-till corn causes problem

UNIVERSITY PARK – Farmers planting no-tillage corn should be aware of potential problems in using nitrogen fertilizer, a research agronomist at Penn State declared recently.

"No-tillage corn fields given high rates of ammonium sulfate or ammonium phosphate will most likely need to be limed or plowed every other year to avoid soil surfaces so acid that herbicides won't work," stated Dr. Richard H. Fox, crop scientist dealing with soil fertility. "The fact is," he affirmed, "weeds must be controlled chemically in no-till corn fields."

And he pointed out that significant amounts of nitrogen can be lost as a gas when urea-containing fertilizers are used. That's because the fertilizer is not incorporated into the soil in no-till corn management, he said.

In addition, Dr. Fox recommended that ammonium-containing or ammonium-yielding fertilizers should not be spread on fields where lime has not been worked into the soil. He explained that lime may cause a large fraction of the nitrogen to be lost as ammonia gas.

"Under the above circumstances, the best nitrogen fertilization for no-tillage corn is to use ammonium nitrate and plow in lime when necessary, or to 'knife-in' anhydrous ammonia," he stated.

In three years of no-till experiments at Penn State, Dr. Fox and associates found that 180 pounds of nitrogen per year as ammonium sulfate reduced the average pH of the surface inch of soil to 5.1, almost two pH units below the soil which received no nitrogen.

At this low pH, herbicides such as atrazine and simazine are ineffective and aluminum and managnese may approach toxic levels. Such toxicity can reduce stands and yields. The pH of the surface inch in some plots treated with the high rate of ammonium sulfate was 4.8. Taking a normal sample to a depth of six inches may miss the problems of soil surface acidity, he cautioned.

Opportunities available in vo ag ed

By JOANNE SPAHR

Editor's Note: The following is the second in a two-part series, begun last week, describing job prospects in the area of agriculture education. At a time when the popularity of vocational agriculture is growing by leaps and bounds (1000 students per year in Pennsylvania, alone) there is, amazingly, a shortage of teachers in this field. For the agriculturally minded student who is unable to go into farming, this avenue might be an area of pursuit in the future.

The following article is comprised of interviews with individuals who chose this route.

LANCASTER – "Teaching agriculture gives you a wide variety of things to do," states Lewis Ayers, vocational agriculture department head at Ephrata Area High School. "With the field trips, supervised farming programs, animals, and shows, it's almost like being a farmer," he continues.

Ayers would know. He was raised on a dairy farm in Huntingdon County before heading to Penn State for a degree in agriculture education.

After he became involved with teaching vo ag, he never left the profession, and has, in fact, been instructing at the same school for 17 years.

"I like working with youngsters – you have to like kids to be a teacher," he says He also admits that he probably likes the livestock shows equally as well as the students.

"But, being an ag teacher is not like being a traditional teacher," he warns. He says that an individual entering the field should consider that the job requires a lot of time after school and nights away from home because of project visits, home visitations, and other activities that keep the teacher and students busy.

"These aren't disadvantages," he is quick to point out, "They are just some things an individual should weigh."

At the same time, Ayers also points out that the parents of his students are, on the whole, genuinely interested in their children, which helps to create a good program.

"It really makes a world of difference," he says.

But, even if a person taking ag education at college should decide not to go into teaching, Ayers points out that there are "a multitude of other jobs" available to that student.

"Feed and chemical companies, breed associations, and organizations like the ASCS are always looking for people," the department head says.

"There are a lot of openings in both education and business," he continues. "Ag education is a good, general, all around education. I think it's a good curriculum."

According to Dr. James Mortensen, assistant professor of ag education at Penn State University, and James Fink, state vocational supervisor and senior program specialist, the field is open to both men and women.

Lew Ayers and two students work on a tractor in shop class.

"We are getting increased enrollments of females," stated Mortensen. "We are graduating and certifying females for horticulture, floriculture, and production agriculture. There has been a dramatic change in this direction, and it will continue."

Sonia Shaner, elementary agriculture teacher for Eastern Lancaster County School District, is an example of a woman in agriculture education.

Miss Shaner is a graduate of Delaware Valley College in Doylestown with a Bachelor of Science degree in animal husbandry. Although she does not have a degree in ag education, she is involved in s special cooperative arrangement between Delaware Valley and Penn State University which allows her to teach while getting credits for her certification in education. Technically, she is termed an intern teacher, and she has hopes of completing her required courses by the Spring of 1979 at which time she will receive her certification.

While she is presently

Speakers highlight Spring Homemakers Day

By LAUREL SCHAEFFER
Staff Correspondent

LEESPORT – "There is no excuse for any woman over the age of 35 not to have an annual mammogram," stated Dr. James J. Diamond, surgeon affiliated with the St. Joseph Hospital, Reading. Diamond also urged the women present at the Berks County Agricultural Center on May 11 for the Spring Homemakers Day to have a breast check-up every six months.

Stressing the importance of the annual mommagrams, the Reading physician warned his audience that 14 of the approximately 200 women present will get cancer of the breast and of those, 12 would probably die from the disease.

Even though the mammogram is only 85 per cent accurate, it can detect cancer before it is large enough to be felt. If it can be felt it is probably too late to save the breast, he continued.

Looking towards the future, Diamond noted that the costs of treating breast cancer will continue to rise. "This is the changing age in breast cancer surgery," the speaker continued, "but some women will still require radical mastectomies in the future."

The speaker also told the women that annual pap smears were unnecessary. "It takes more than three years to develop a positive reading after having a negative test," he explained.

Another speaker addressing the audience during the day long program was

Dr. James J. Diamond

Donald Bagenstose, chairman, Berks County Commissioners. Discussing how women can change and influence government, Bagenstose advised, "Select a political party and get involved at the precinct level."

"People are just not getting involved," he continued. "Vote for the candidate that you feel is honest, to restore faith in government."

"It's frightening," the commissioner stated, noting the widespread apathy among voters of today. Over the past ten years too many small groups have influenced government towards costly programs people don't really need, he explained.

"Inflation is the biggest enemy we have in politics, it's hurting the young and the retired," Bagenstose continued. We have to change laws and reduce pensions to stop the inflation, but we must also ask who made the pensions possible?"

The commissioner told his audience that everything done in government costs money, but duplication and fragmentation of the dollar has to be eliminated. A person must understand government and what it is doing, he added.

After the Spring Homemakers Day luncheon, Wendy Sensenbach, a junior attending Albright College, Reading, who is studying home economics education, was presented with the Lydia Tarrant Extension Homemakers Scholarship. The award is given for outstanding achievements in the field of home economics.

Other programs presented during the day included "Someone Who Cares" by Fay Strickler, Extension home economist and Extension nutrition aides; Nancy Flickinger conducted "Shaping Up for Summer" and Mrs. Betty McLean presented "The Hat Lady."

Mommy Makes Me

"Do you really like reciting when friends of your parents come over to visit, young lady?" "Oh, no, I really hate it. But Mommy makes me do it when she wants people to start leaving."

New automatic take-off milking that's simple and inexpensive.

It's the New Surge V S O (vacuum shut-off) system And it delivers performance formerly reserved for systems costing five times as much A single operator can effectively manage up to 10 milking units, doing an even better job of milking, with far less effort

Simply pull up the V S O control knob and attach the milking unit Once milk starts to flow, push the control down, to the automatic position When milk flow drops below 6/10ths of a pound per minute, the milking vacuum is shut off Within seconds the cylinder pulls the cord taut, smoothly removing the milker and returning it to the hanging position

Team up the new V S O with a high capacity Surge milking unit and you've got an efficient automatic take-off system at a price that's right

We can make your cows worth more.

Food lab offers new experiences to media reps

STATE COLLEGE – Remember the television commercial with the tuna who had good taste but didn't taste good?

He'd never have made it past the taste test panel at the Penn State food science laboratory.

Research on food quality, texture, and taste acceptance is carried on constantly in the Borland Lab kitchens at the University's College of Agriculture. Dr. Joseph H. MacNeil is administrator of the 26-member food sensory evaluations panel. Under his direction, media representatives taking part in a recent News Day

Mary Keith, right, master's degree candidate in home canning, enlists the help of media representatives in a canning-jar-lid tightening experiment.

became temporary taste testers.

Assistants offer each taster comparative samples of food to be evaluated. Panelists are simply asked to taste the sample and mark a questionnaire sheet. It's not as easy as it sounds.

Each taster is seated in a separate cubicle and may not discuss nor compare opinions with other panelists. Samples come in identical small containers, with no identification other than a number or letter.

A variety of colored lights are wired into the cubicles, and can be controlled by a main switch operated by the testing supervisor. Bathing a brown food in red light gives it a rather alien appearance. A white food under a blue light becomes less than taste-tempting. Subjected to foods of strange colors and eerie appearances, the novice tester realizes how important eye appeal and attractive food color are to eating satisfaction.

One test commonly given to new food science students consists of three samples of popular brands of cola drinks. Two of the samples are from one brand and the third is from a popular competitor.

Another test given the media guests involved four different colored gelatin samples. The gelatin flavors, however, did not correspond with the colors. It's hard to detect orange flavor in a red gelatin mix. And strawberry flavoring that comes masked in a lovely shade of purple becomes a real challenge.

The taste test panel serves a variety of purposes. University researchers can utilize it in determining acceptance of college-researched products and, for a fee, commercial companies in the food industry can gather information for new food introductions.

Recent experiments conducted with the expert tasters include the comparison of kosher to regular food processing, deterioration of milk, meat taste from various combinations of beef crossbreeding, mushroom processing, ice cream formulations, and the comparison of potato varieties.

State Grange royalty selected

Royalty selected for the Maryland State Grange included, left to right, Jimmy Roderick, from the Glade Valley Grange, Frederick Co.; Cheryl Lynn Myers, Thurmont Grange, Frederick Co.; named state prince and princess; and Mr. and Mrs. Gene Mills, Carroll Manor Grange, Frederick Co.; chosen as the state young couple.

NEW MARKET, Md. – The Maryland State Grange princess, prince, and young couple were recently chosen. Winners included Cheryl Lynn Myers, Thurmont, state princess; Jimmy Roderuck, Walkersville, state prince; and Mr. and Mrs. Eugene Mills, Jr., Adamstown, state young couple.

Cheryl Lynn Myers, 18, is the daughter of Mr. and Mrs. C. Rodman Myers, Thurmont.

Jimmy Roderuck, 22, the son of Mr. and Mrs. Harold E. Roderuck of Walkersville, has been a member of Glade Valley Grange for eight years.

Mr. and Mrs. Eugene E. Mills, Jr., Adamstown; are the 1978 Maryland State Grange Young Couple. They were selected as members of the Grange Royalty at State Youth Night at New Market Grange Hall.

Gene and Donna are active members of Carroll Manor Grange in Adamstown.

York Co. 4-H Council holds meeting

EAST BERLIN – At a recent meeting of the York County 4-H Council, Joey Welsh, exhibit committee chairman, announced that the club will have a fire safety exhibit at the Penn National State Fair on May 26 to June 4.

Beth Hershey from the Extension Office announced that the 4-H chicken barbeque will be held on June 17 from 4 to 8 p.m. at the 4-H Center. Interested persons should contact the 4-H Office at 717-848-2101 for ticket information. The 4-H Exchange Club will be conducting a bake sale at the barbeque.

Bonnie Wire and Joey Welsh presented a slide presentation, "4-H'ers in Action" featuring York County 4-H members.

Tough machinery for today's stepped up demands

Two rugged machines—a Model 21 forage box with steel sides/endgate, and a Model 270 manure spreader for wide, uniform distribution of manure—join the Kasten line

New Model 21...

a beefed-up box to haul beefed-up silage loads

A bigger and stronger forage box with steel siding and steel endgate Built for today's stepped up tempo in forage handling (bigger, heavier loads hauled faster) Either 18 or 15 ft floor length, the Model 21 is rated 8-ton instead of 6 New blade-type beaters tear loose stringy material for free-flowing forage Full 16-inch auger discharge that users report works best

New Model 270 manure spreader for uniform, wide distribution

Blade-type beaters tear into manure for consistent shredding, uniform spreading Cor-ten steel sides resist erosion better than carbon steel, one seam down the middle of floor instead of usual one on each side makes leak proof corners Low profile allows maneuverability under barn cleaner or manure bucket Heavy T-bar chain for greater tensile strength

Super 121 Forage Blower for tall silos and medium size tractors

Blows up to 2 tons of haylage a minute to 80 feet high or more then shoots material 10 feet across to silo center Shoulder-level U-shaped bar for easy start of vee-belt drive Push to start Pull to stop Curved paddle increases lift power, avoids wedging

Running gear with muscle enough for heavier loads

New 10-ton tandem puts six wheels on the ground Rear tandem provides 5-inch vertical movement up or down Even weight distribution permits 20,000 lb loads with increased resistance to twist and stress Available in 6-ton, 8-ton and 10-ton 4-wheel models

Mounted harrows allow planting after one pass through the field

Extra-long, chisel-pointed spike teeth penetrate deep without clod dodging to break crust work out air pockets Pivoted clevis mount with chain pull to center eliminates side draft Fits most mono-frame plows with standard brackets

USDA functions in jeopardy, Talmadge warns

WASHINGTON , D.C. – U.S. Senator Herman E. Talmadge charged last week that government reorganizers are bent on "raiding" vital functions of the Department of Agriculture and would make USDA "Incapable of serving as a viable noice for rural America."

The Chairman of the Senate Committee on Agriculture, Nutrition, and Forestry told a rally of more than 1000 rural electric leaders from across the nation that "if the reorganizers have their way, the Department of Agriculture would become little more than an empty shells."

Talmadge urged the REA leaders to join him and members of his Committee in forging a united front of opposition to a Carter Administration proposal to shift the child nutrition programs - including chool lunch - from USDA to a new Department of Education.

"The fight to break up USDA is now joined on the school lunch issue," Talmadge said. "I urge you to make it your fight now, today."

"If the current attempt to strip away the school lunch program from USDA succeeds, it will greatly intensify the threat of a similar fate befalling REA somewhere down the road," Talmadge declared.

"The same message applies to the Forest Service, to Soil Conservation, and to the other pieces of USDA that are coveted by others within the Federal establishment," the Georgia Senator said.

Talmadge said that food, nutrition and agriculture have become "irrevocably linked" in national policy considerations. He noted that the farm bill passed by Congress last year was titled: "The Food and Agriculture Act of 1977."

"The school lunch and other child nutrition programs were developed and have grown to maturity within the U.S. Department of Agriculture," he said. "To place these program in the untried and untested hands of a new Department of Education would be bad for the programs, bad for agriculture and bad for the children of America."

"Under the Department of Education, nutrition will be viewed solely as an educational support function, and not as part of a national food and nutrition policy. The Department of Education would become a single purpose agency. Those functions that are not administered by the education establishment would never feel at home in that agency and their funds will always be in jeopardy."

"The nutrition programs, and the child nutrition programs in particular, should serve as the backbone of our emerging food, nutrition, and agriculture policy. They should not be severed from the Department of Agriculture at the very time that people are beginning to recognize their interrelationship."

Talmadge said the removal of the interrelated functions from USDA would further weaken the "limited leverage" that farm state senators and congressmen now have to write effective farm legislation. He noted the recent announcement that the nation's farm population has now dropped to 3.6 percent of the U.S. total.

In urging the rural electric officials to fight the school lunch transfer proposal, Talmadge said:

"I am certain that I do not have to remind you that just as the bell tolls now for child nutrition it also tolls for REA. If any segment of the Department is diminished, you are diminished also."

Talmadge said the effort to maintain the Department intact would be fought in "a series of battles. All of those battles must be won - or we stand to lose the war."

Visitation nite held

YORK – York-Adams Pomona Visitation Nite was held on April 25 with Washington Grange as Host and Biglerville Grange presenting the program. Wanda Gallimore, Biglerville grange lecturer, chose as her topic, "The Plus Qualities of Penna.," taken from the Pennsylvania State Grange Theme, "Penna. - Quality Plus."

Fifty-one members attended the meeting from the Eureka, Washington, Biglerville, Red Lion, and Gideon Granges. Two guests from Johnstown also attended.

The April Region G Youth Visitation Nite was held April 28 at Walker Grange Hall, Mexico, Juniata County, with 66 Grangers in attendance from Lower Northumberland-Snyder, York-Adams and Juniata-Mifflin-Franklin Pomonas. Those individuals from York-Adams were Gladys Sheffer, Region G Lecturer Committee member, J. Frank Sheffer, Daniel Glessner, and Richard Riley.

Juniata-Miflin-Franklin youth were guests while Lower Northumberland-Snyder Pomona presented the program. Next youth visitation will be May 13, at Valley Grange, with Perry Pomona Youth program.

A pre-Pomona and membership planning meeting was held at Valley Grange hall, Lewisbury, on April 30.

Red Lion Grange holds meeting

DILLSBURG – Red Lion Grange No. 1781 presented the Visitation Nite program on May 2 at Eureka Grange hall, Dillsburg. Megan Shaub, a York County 4-H member, and owner of the "Farmer's Daughter" roadside stand at Shrewsbury, showed slides and discussed how to raise good farm produce.

The next Visitation Nite program will be held June 9 at Gideon Grange Hall, Hanover, with Fawn Grove presenting the program.

Red Lion Grange met at their regular meeting on May 6 at 8 p.m. with Lee Burns, master in charge. A special meeting will be held at the Grange Hall on May 23 to finalize plans for the Annual Bar-B-Que to be held at the Grange Hall on June 24.

A. Carville Foster. Pennsylvania state representative, was guest speaker for the evening, and spoke on the problems in the government.

Next regular meeting of the Grange will be an open meeting, when memorial services will be held.

WHY

UNIPEL® 21-7-14 is an ideal fertilizer for silage-corn fields:

Whole-plant corn silage for beef or dairy cattle removes two to three times as much Potash as Phosphate from the soil, and a lot of Nitrogen Compensating for that removal can be the crux of your fertility program for fields that were or will be in silage corn

A UNIPEL Single Application of UNIPEL 21-7-14 is well-suited for such fields can provide N, P and K in a ratio to help restore a good fertility balance for continued top crop production

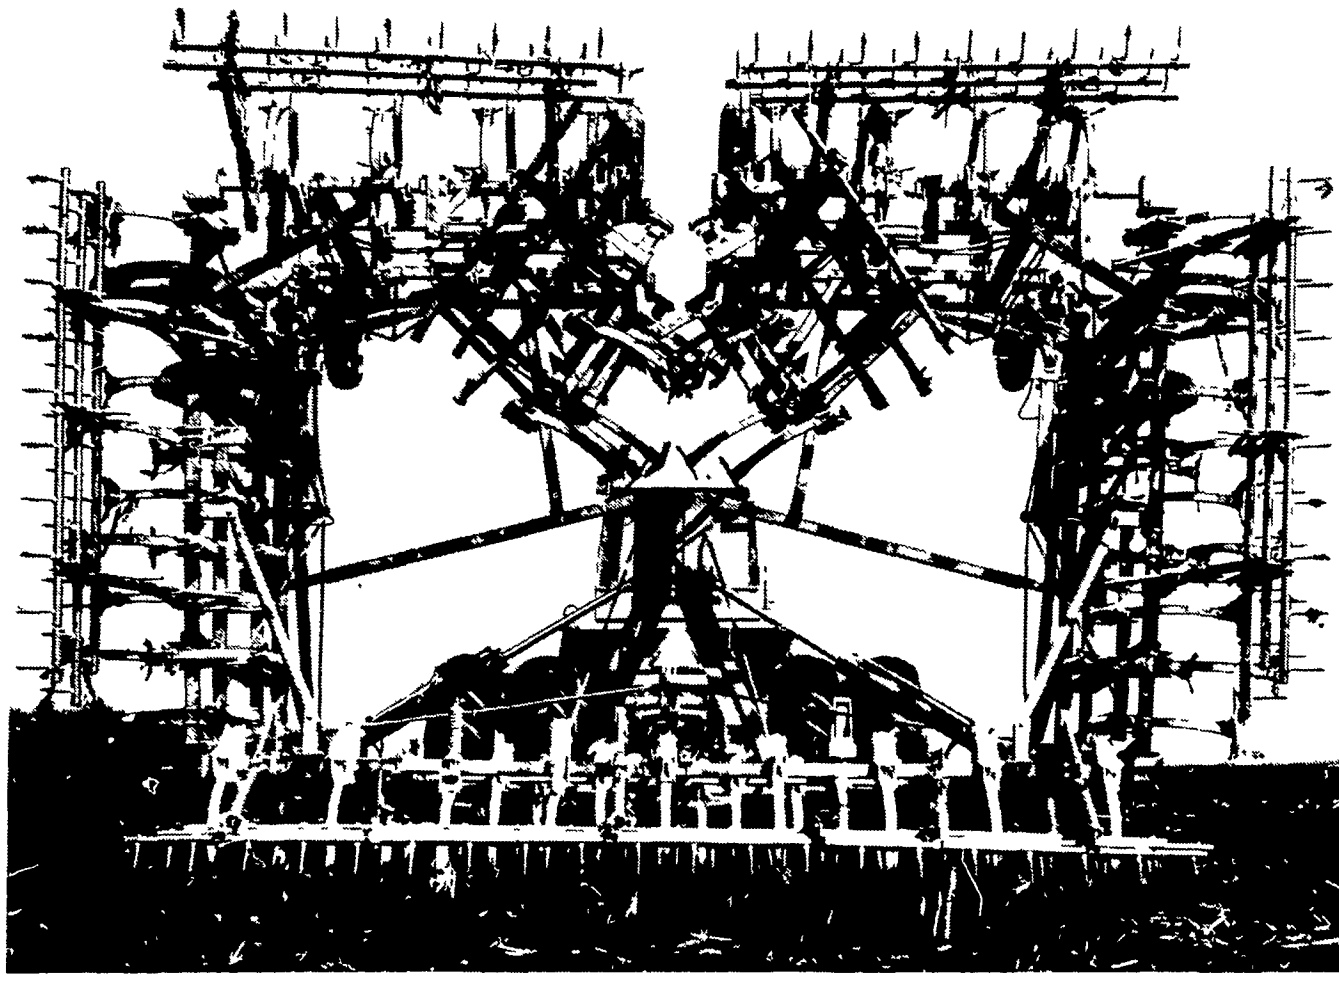
Corn growers using more conservation practices



Bigger tools for minimum tillage are one example of how farmers are turning to energy-conserving methods of farming. This photo, supplied by the Case Farm Equipment Corporation, depicts a scene in the Midwest.

BLOOMINGTON, Ill. – Corn growers are becoming more conservation-minded and are using conservation practices in their corn management programs to help save soil, water and energy.

An eighty-year study of more than 35,000 high-yield corn growers reveals a continuing trend towards reduced tillage operations, earlier planting and harvesting, and harvesting at lower moisture contents.

Earlier harvesting of lower moisture corn suggests farmers are taking a serious look at earlier-maturing, faster drying hybrids in an effort to reduce crop drying demands in the fall.

This information, released recently by The Producers of Funk's G-Hybrids, was derived from data compiled in Project:200, Funk's nationwide corn growing program.

Since the program's inception, increasing numbers of farmers have been leaving the plow and turning to alternative methods of preparing the seedbed.

In 1970, 21 per cent of the farmers participating in the program prepared their seedbeds through methods other than plowing. In 1977, 39 per cent of the farmers did not plow, representing an increase of 85 per cent in the number of farmers who have turned to minimum tillage practices.

Chisel plowing has rapidly increased in popularity over the same period. In 1970, only seven per cent of the farmers chisel-plowed. But by 1974, that figure had jumped to 15 per cent. Last year, 29 per cent of the Project:200 entrants were chisel plowing.

Dr. Bill Craig, manager of technical services for Funk, says that increasing production costs were largely responsible for the move to minimum tillage practices in the late sixties and early seventies.

"However, conservation is becoming a bigger factor," Dr. Craig says, adding, "There is good data

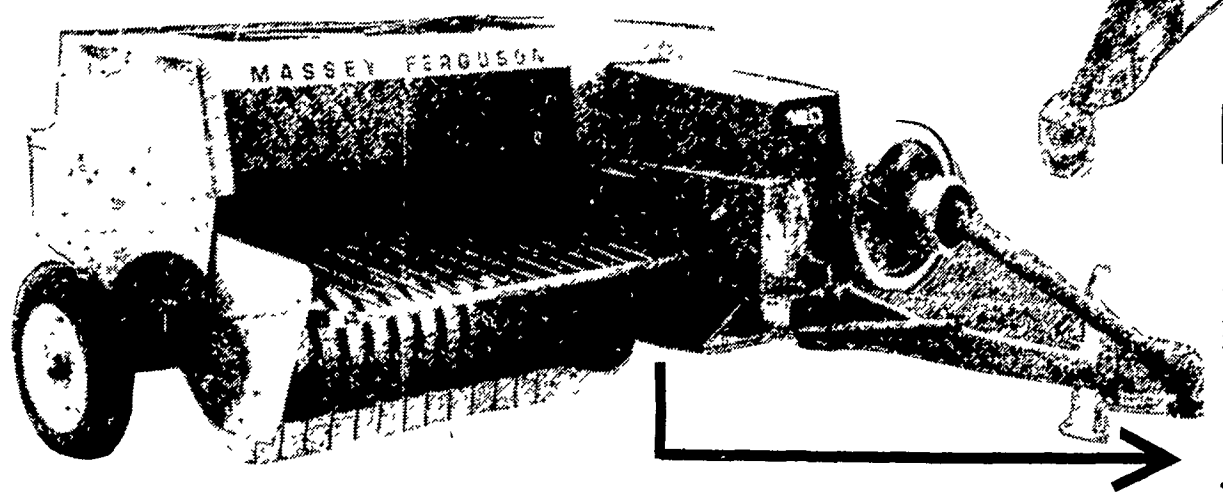
CHOOSE MASSEY-FERGUSON FOR THE BEST IN BALER FEATURES

NEW! MF 128 Wide Pickup Deluxe Baler

If you're looking for a rectangular baler that gives you all the features you can ask for, here it is — the new MF 128 It's designed to gobble up wide windrows in a hurry — the perfect unit for big operations or custom baling where you make thousands of bales every season. Just check out the reliable Massey-Ferguson baler features built in throughout this big, rugged unit

- Extra-wide 68-inch pickup gives you 12 inches more width than most models
- 6-bar pickup, with narrow "Maxpac" tooth spacing for improved leaf retention
- Unrestricted pickup and crossfeed visibility from the tractor seat — gives you added productive efficiency
- High strength, circumferentially reinforced bale chamber
- MF's famous "Suretie" knotter — accepts plastic or sisal twine without adjustment
- Improved design of bottom and top groovers gives fast, efficient bale formation



NEW! MF 120, High Performance at an Economical Price

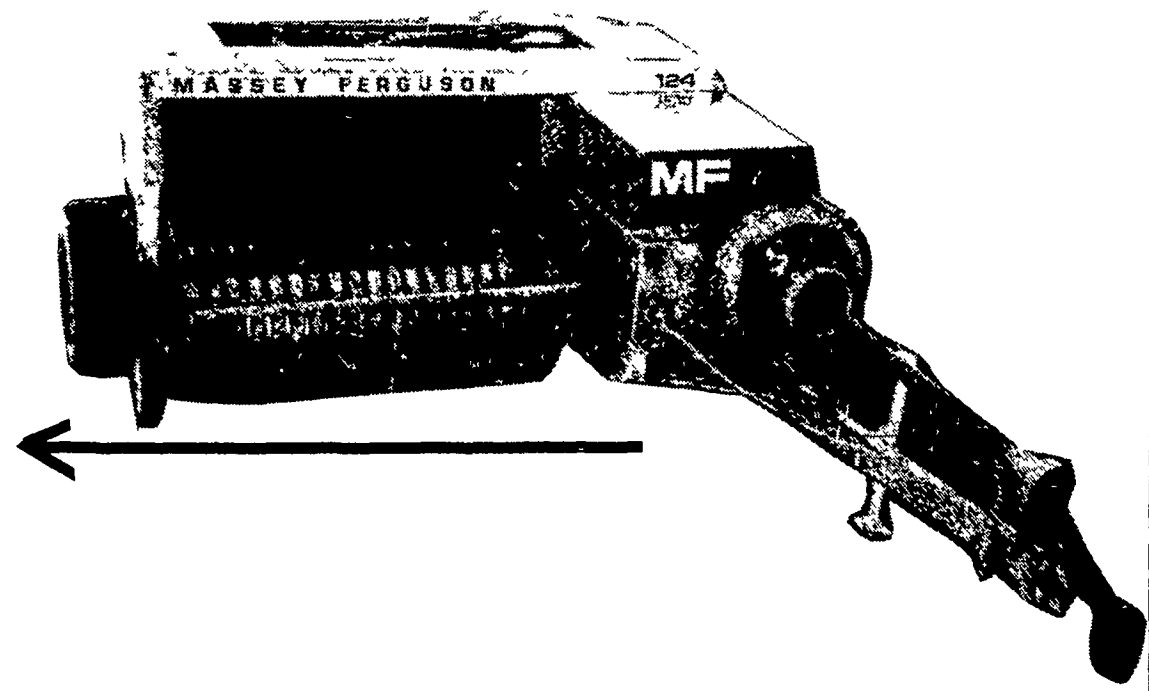
If you're looking for rugged Massey-Ferguson baler quality at a price that can't be beat — check the features you get with the new MF 120 Start with a price that's the lowest in the industry. Then add the full range of standard extra-value MF features that make this baler the perfect choice for medium sized operations Of course, it's built with MF quality throughout, to give years of "eager eater" baling reliability Just check these features. All are standard on the MF 120:

- 56-inch pickup
- Exclusive MF "Suretie" knotter
- Exclusive ball-bearing plunger mounting with 3-point all-direction control and large "V" rollers

MF 124/126, High Capacity, Deluxe Twine and Wire Balers

If you're looking for the kind of baler that has set new performance standards, you'll find just what you want in either the MF 124 (twine) or the MF 126 (wire) balers. 80-stroke per minute feeding and wide throat openings make these rugged balers real gluttons when it comes to picking up windrows even under the toughest field conditions. Just check out the features you get with the MF 124/126. They add up to extra baling efficiency for your operation.

- Exclusive MF "Suretie" knotter for tighter knots and denser bales with either sisal or plastic twine
- Narrow tooth space "Maxpac" 5-bar pickup for maximum leaf saving
- 284 sq. in. throat opening
- Reinforced bale chamber
- Exclusive 3-point roller plunger support for precise knife alignment
- Top and bottom twine groovers for better twine/wire stabilization, reduced twine abrasion
- Optional tractor seat density control



Personalized MF financing, parts and service available.

Pre-emergence tank-mix controls grassy and broadleaf weeds without carryover

Banvel®+Lasso®*

a giant first step toward total weed control in field corn

Successful on millions of acres where corn is the major crop, the Banvel + Lasso herbicide combination can give you "near perfect" control of a wide spectrum of grassy and broadleaf weeds, when used according to label directions.

Banvel + Lasso herbicide is compatible with most fluid fertilizers. It needs no incorporation. There is no carryover.

Take a giant step toward total weed control. Call about the Banvel + Lasso combination. Remember, the "near perfect" herbicide is the one you build...starting with Banvel herbicide...from Velsicol.

*The combination is effective on all major soil types, except light sandy soils. Lasso is a registered trademark of Monsanto Company.

To achieve best results, be sure to read, understand and follow the label.

Corn post-emergence

When it's down to:

Which are you using?

For post-emergence weed control in corn . . . what if 2,4-D doesn't work? Like on smartweed.

Banvel herbicide, used alone or tank-mixed with 2,4-D, controls more broadleaf weeds than 2,4-D used alone.

So think Banvel:

. . . When you first see smartweed, velvetleaf, ragweed, cocklebur, pigweed, sunflower, morningglory, lambsquarters, Canada thistle seedlings.

. . . When you're planning to rotate to wheat or oats in the fall or soybeans next spring . . . because BANVEL DOES NOT CARRY OVER.

Your ag chemicals dealer has your supply. Any questions? Call free of charge on the Velsicol Herbicide Hot Line: 800-621-4129 (Illinois callers: 800-972-8381).

Before using any pesticide, read the label.

VELSICOL

Corn growers

(Continued from Page 120)

available to indicate that farmers are doing a good job of conserving the soil."

The survey results also show that fewer farmers are cultivating and rotary hoeing their corn crops. In 1971, 78 per cent said they cultivated at least once, while only 65 per cent said they cultivated at least once in 1977.

Those farmers who said they rotary-hoed their crops in 1971 totaled 36 per cent of the project entrants. In 1977, only half as many farmers, 18 per cent, rotary-hoed.

"The energy crisis a few years back forced many farmers to look for ways, such as minimum tillage, to cut their production costs. But since that time, most of those cost savings have been offset by increased usage of herbicides and insecticides," the Funk agronomist says.

"By switching to minimum tillage, a better environment was created for insects and disease organisms. But we have learned to compensate for these problems through better usage of herbicides and insecticides. And we are also seeing better usage of herbicide combinations," Dr. Craig explains.

He adds that if ideal field conditions can be achieved through these alternative practices, then there is no real need to cultivate. "Cultivation is another trip across the field that can add to operating costs and soil compaction."

The Project:200 study indicates that farmers are carrying their conservation practices all the way through the growing season. The current trend is to harvest early and at lower moisture contents.

In 1971, only one percent of the farmers were harvesting in August. Last year that figure was up to 10 per cent. The percentage of farmers who said they harvested in September totaled seven per cent in 1971, compared to 16 per cent in 1977.

Fifty-four per cent of the farmers said they harvested in October last year, up nine per cent from 1971. Fifty-three per cent fewer farmers harvested their corn in November last year than did in 1971.

The study also shows a significant increase in the number of farmers harvesting their corn as No. 2 corn (15.5 per cent moisture). Last year 10 per cent harvested the crop as No. 2 corn, opposed to just four per cent in 1971. Most of the farmers are now harvesting at moisture contents of 20 per cent or less.

"Again, this shows a significant move toward energy conservation. The current trend is to plant earlier-maturing, faster drying hybrids earlier in the Spring, allowing earlier harvest of drier corn in the Fall," Dr. Craig says, adding that Funk research has put a great deal of effort into the development of fast dry down hybrids.

"Ninety-five to 96 per cent of the crop is now planted in April and May," he says, adding that harvesting early and at lower moisture contents reduced drying fuel needs and helps prevent bottlenecks in grain handling systems.

Dr. Craig says that yield reductions which may have been expected when farmers began switching to minimum tillage problems and shorter-season hybrids have not been expected.

"In many instances, we have seen yield increases," he says. He attributes this to better water holding capacities of minimum-tilled soils, better herbicide and insecticide usage, well-balanced fertility programs and hybrid research.

"There is no doubt that corn breeders are doing a better job of breeding high-yield characteristics into hybrids. Farmers can now plant earlier-maturing hybrids."

Dr. Craig says that in good crop management programs, farmers may get yields from the earlier-maturing hybrids comparable to those from full-season hybrids.

Sewing winners to be named

HARRISBURG – Winners in the Pennsylvania State Grange's annual sewing contest will be selected May 23, when final judging is held at the Grange headquarters, 1604 N. Second St., Harrisburg.

An estimated 2,000 entries were judged earlier this month at the local, or Subordinate Grange level, according to Mrs. Leroy Hoover, of Roaring Spring, state director of women's activities for the Grange. Local winners were judged in county, or Pomona Grange competition with those winners then advancing to the state finals.

State winners in each of five categories will be sent to New York for judging in the National Grange competition.

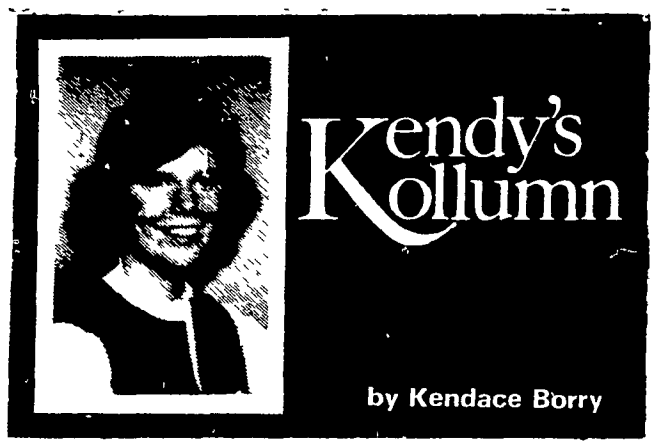
HYDRAULIC AERIAL EQUIPMENT



In nature, there are certain undeniable laws which are never broken. You can count on them as fact wherever you go, whatever you do

On the farm, this is true also. While not always pleasant, I have learned that Mother Nature never relaxes her rules, and whenever I tangle with her, the outcome will be the same. Unfortunately for me, she wins, and I lose.

Here are some of the rules I've learned over the years. Maybe they will help you in your farm life dealings.

1. If you ever wear good shoes to the barn, you are bound to walk in something that you shouldn't.

2. Snakes and other varmints are always found where they're least expected.

3 If you leave the livestock in on a cloudy day, because rain is expected, and go to town for the day, the sun will shine brightly.

4. On the other hand, if you leave the livestock out on a cloudy morning, and depart from the place, there will be hurricane weather with snow, hail, and sleet all day

5. You can never crawl through a barbed wire fence without leaving a "hunk" of your garments behind

6 If you try to take a shortcut through the fields and quickly run through a stretch of deep mud, otherwise known as a bottomless bog, you will always come out minus one shoe. Mud holes love to eat shoes.

7. You will never split your jeans when working alone, it will always occur when there is a crowd around to hear that sickening ripping noise.

8. All farm animals are born with a sixth sense ability to find any weak spots in a fenceline. Some of the more advanced creatures have the talent to invent a weak spot if none exist.

9. When driving a motored vehicle, such as a tractor or truck, anytime you forget to check the gas tank, you will run out of gasoline in some long-lost, forgotten-by civilization spot

10 Directions to anything are too confusing to understand This includes the written variety to equipment, or the oral variety of how to get somewhere

11 No animal in the United States understands English when you yell at them. They will simply get a dumb "suffering" look on their faces and ignore you.

12. Finally, whenever you think that life has taught you everything, brace yourself for a surprise. A new shock is bound to be around the corner

Plant Lovers Corner

UNIVERSITY PARK – What do you plan to do with your woodlot? Improve it? Enlarge it? Build a hunting lodge? Plant Christmas trees? Sell logs or lumber?

E P. Farrand, associate professor of forestry Extension at Penn State University, says you may own woodland and idle farm land for profit or recreation but management of the area is needed for proper resource development. To help owners manage woodlands, Farrand has written a correspondence course on small woodland forestry. Lessons give directions on how to control tree species by planting seedlings, encourage growth of tall straight trunks by proper spacing and removal of wood trees. Wildlife can also be protected by growing food and cover plants.

To enroll in the course, write Forestry, Box 5000, University Park, Pa. 16802. Make check for $4.50 payable to Penn State. The correspondence course program offers the option of returning question papers to Penn State for correction and credit toward a certificate of accomplishment or using the course as a valuable reference.

This Mower Is In Your '78 Budget

Independent dual lever directional control of drive wheels instantly positions the fully visible mower deck exactly where you want it

You want hydrostatic maneuverability and you intend to have it in '79 or '80 . . . right?
We think you can afford this mower in '78.

- Mower deck is shaft driven to assure consistent blade-speed throughout any cutting assignment
- Drive shaft plus two pin attachment affords quick, easy deck removal
- 12 or 16 H P Kohler engine creates outstanding power-to cutting width ration for maintaining blade speed dependability
- Direct power imput to hydrostatic units eliminates cumbersome belt drives and leaky hydraulic lines
- Rugged, compact design with low center of gravity, places operator directly above wheels for stability and traction on slopes
- Rigid lateral bracing prevents abrupt downward scalping action when single wheel passes over low spot
- Cutting width 44" 52" and 61"

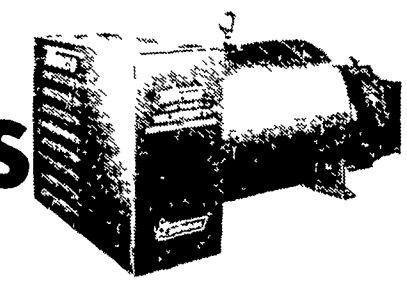
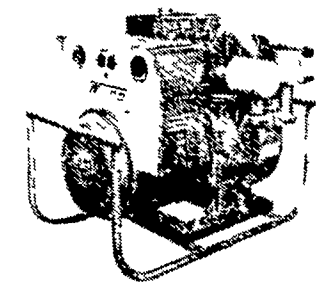
PTO GENERATORS
15-65 KW



High Performance Power

New Stock

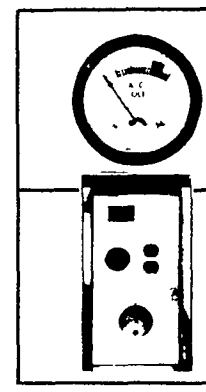
- Over 100 PTO Units In Stock
- Over 200 Portable Engine Units



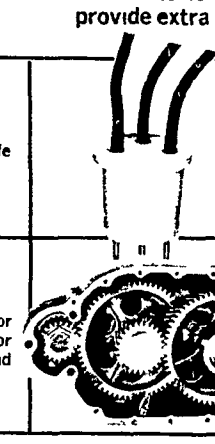
WINCO FEATURES

ELECTRONIC EXCITATION
With Winco ELECTRONIC EXCITATION there is no commutator or DC brushes — no moving parts. This increases reliability and reduces maintenance, with the advantage of ready service accessibility.

MAXI-WATT
It takes more KW power to start a motor than to keep it running. WINCO PTO power plants with the maxi-watt winding deliver superior motor starting ability. Maxi-watt is an extra winding in the fields that provide extra power for heavier motor starting loads.

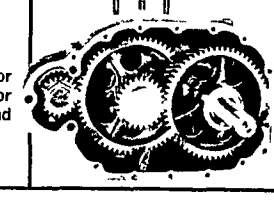


SAFETY COLOR-CODED VOLTMETER
Quickly tells operator when voltage is safe — warns against low or high voltage



THE OCTOPUS
WINCO s exclusive new power plug-connect or disconnect the standby load with one convenient plug This plug saves on installation costs It is rugged and heavy duty for years of long service and is the ultimate in convenience

HANDY RECEPTACLES
115/230 Volt for welders heavy motor loads and standby connections 115 Volt for convenient plug in of electric tools and lights



PTO GEAR DRIVE MECHANISM
Precision ground helical gears eliminate potential service problems of shorter lived chain link drive

Nitrogen a bargain for corn growers

NEWARK, Del. – In relation to the costs of other inputs for corn production, nitrogen is currently an outstanding bargain, says experts. Prices have increased since 1972, but not nearly as much as real estate, wages, and machinery.

The hold-down on nitrogen prices is not consistent with the large amount of energy required for its production. Large amounts of natural gas are used in the manufacturing process, and for this reason alone it seems unlikely that the favoarble price picture being enjoyed by farmers will last for long.

Over 30 per cent of the energy required for producing corn is associated with nitrogen fertilizer. It ranks higher on the energy list than all other production items including fuel and machinery. However, it is a key element in crop production and it should be the concern of everyone that farmers have an adequate supply for the growing of food and fiber.

Nitrogen is the least plentiful major plant nutrient, and the one most likely to limit corn yeilds in Delaware. Corn growers are urged to use nitrogen at a rate consistent with yield goals. About 1.1 pounds of nitrogen will be needed for each bushel of expected yield. Application rates will range from 75 pounds per acre on droughty soil having a yield of 65 to 70 bushels per acre, to 130 pounds per acre where the yield potential is 120 bushels per acre. Growers using irrigation and anticipating 200 or more bushels should apply 225 to 250 pounds of nitrogen.

Non-pressure nitrogen solution is very popular. It is an excellent source of nitrogen and can also substitute for water as a carrier of herbicides. If additional nitrogen is needed, farmers shouldn't overlook sidedress applications. These should be made early in the growing season since most of the nitrogen is absorbed by corn before the tassels appear. This method of application will help to avoid leaching losses which frequently occur when large amounts of nitrogen are plowed down prior to corn planting. Those who plan to irrigate corn - and the number is growing rapidly - should consider a nitrogen injection pump, which will make it possible to "spoon-feed" the nitrogen through the irrigation system. This will lead to maximum nitrogen recovery by the corn, which in turn will mean higher yields and a more profitable operation.

PAW to exhibit at state fair

MANCHESTER – Penn's Agri-Women will sponsor a "Barnyard" during the Penn National State Fair at Grantville, scheduled to run May 26 through June 4.

The tent display will feature a variety of farm and barnyard animals, as well as educational agriculture displays. Also available at the Barnyard tent will be a decorative and colorful collection of barnyard animal cookie cutters and "Cream of the Crop", the American Agri-Women cookbook featuring prized recipes from farm families across the nation.

A blue-grass musical group is scheduled to be on hand to entertain fair visitors in the area of the Barnyard exhibit.

Volunteers are needed to man the tent and to visit with and promote agriculture to the fairgoers visiting the display.

Ethel Gross, state coordinator of PAW, has announced a listing of the volunteers who will be in charge of the tent daily. Anyone interested in spending a few hours helping to promote agriculture at the Barnyard are urged to immediately contact Mrs. Gross at Manchester R2, or a daily volunteer chairman from their area.

Barnyard chairmen are: May 26, Ethel Gross and Gail McPherson, New Park R1; May 27, Ethel Gross; May 28, Phyllis Gross, Manchester R2 and Helen Musser, Manchester R2; May 29, Margaret Shaub, 350 W. Railroad St., Shrewsbury; May 30, Mary Jo Dries, Paxinos R1; May 31, Naomi Spahr, Lititz R6; June 1, Beth Cooper, Lenhartsville R1; June 2, vacant, volunteer needed; June 3, Renee McQuaide, College Park Apts., Camp Hill, and Nora Krall, Annville R1; June 4, Nora Krall and Edith Lehman.

The Barnyard will be open from 3 to 10 p.m. on weekdays and from 10 a.m. through 10 p.m. on weekends. Penn National Fairgrounds is located at the Grantville Exit 28 of Interstate-81.

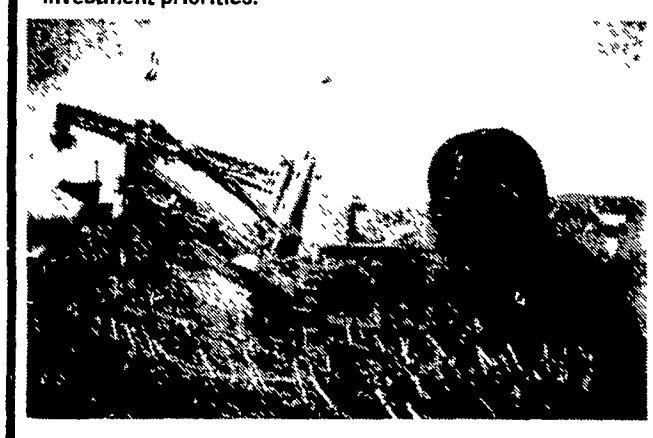
Farm Drainage Pays High Returns

Investment	Typical Annual Return
Land Drainage	21-46%
Farm Buildings	3-23%
Farm Land	11%
Stocks	7.4%
Bonds	6.1%

Even with the conservative figures shown above, it's obvious that land drainage should top farmer's lists of investment priorities.



✓-CHECK THESE BENEFITS ...

- Better soil aeration
- Better soil moisture conditions.
- Longer growing seasons.
- An increased supply of nitrogen to the plant
- Soils warm up more quickly
- Certain toxic substances and disease organisms are removed
- Soil erosion can be reduced
- Deeper root development enables plants to better withstand summer droughts.
- Valuable livestock water supplies are obtained
- Increased crop yields and improved crop quality

Farm Women

(Continued from Page 113)

weak and flabby; minds which are not used will die; and souls need to be stretched or they become listless and evil. "Life," he said, "is a terrible thing to waste."

The third thing which can be done to corn is to eat it. In this sense, he said eating corn was the philosophy of eat, drink and be merry, and added that material things should never have the supreme place in life.

Corn, of course, can be planted. This, Horst said, is the purpose of life - to invest it and to plant it. He concluded that happiness is not throwing away life, or keeping it to oneselves or searching for pleasure, but giving oneself to Jesus.

Lebanon County Agriculture Extension Director Alletta Schadler welcomed the group to the area, and special music was provided by Dawn and Randall Marks. Humor was provided in generous doses by Mrs. Chester Stroh, South Annville, who recalled the "good old days" in monologue.

Farm Women's Calendar

4-H group holds meeting

VIRGINVILLE – The Virginville Dairy and Swine 4-H Club held its monthly meeting on May 8, at the home of Ronald Kieffer. President Scott Miller chaired the meeting.

The results of the Hoard's Dairyman cow judging contest were given. The two top juniors were Ginger Dietrich and Charles Siedel. The two top seniors were Scott Miller and Cheryl Adam. Prizes were awarded to the top winners.

The group decided to go miniature golfing on June 9. The next meeting will be June 12, at 8 p.m. at the home of Cheryl and Jan Adam.

Manure management systems to be toured in Lebanon County

LEBANON -- Gerald Bodman, Penn State Extension Agricultural Engineer, who has helped many Pennsylvania farmers to plan dairy barns, ventilation systems and manure handling systems, will be the principle speaker during a tour of several farms in Lebanon County on Wednesday, May 24th.

All of the farms to be visited are within a two mile readius of the Route 322 and Route 934 intersection in southern Lebanon County.

Farmers interested in viewing some practical ideas in manure storage and handling should meet at the farm of Mark Copenhaver, Lebanon R4. The Copenhaver farm lies to the west of Route 934 about two miles north of the intersection with Route 322. A farm sign marks the entrance to the lane. A new, slatted dam, earth bank storage system is in operation at this farm.

Other farms which have slightly different types of storage are included on the tour. Abram and Dale Hoover, Lebanon R4, have a covered storage area for free stalls and milking parlor. Dol-Mar Dairy, along Route 322 at Campbelltown, has an open liquid storage.

After a brief period for lunch, the group is invited to visit the farm of Clarence and Kenneth Mase, also along Route 322, where a new manure handling system will be planned for free stalls and a conventional stall barn.

The tour of manure handling systems is planned by the Lebanon County Agricultural Extension Service and will be conducted by Newton Bair, Agricultural County Agent.

Meeting held

READING – On May 4, the Western Mont-Berks 4-H Dairy club met at the home of Jack Seasholtz. There 17 members present.

A demonstration was given on the proper method of grooming dairy cattle

The group decided to take a trip to an animal hospital in Reading sometime in the future.

A softball game will be played with the Keystone club on June 4 at Green Lane Park.

Opportunities

(Continued from Page 115)

teaching elementary agriculture, she originally started out as a production ag teacher at Shippensburg High School. There, she filled in for six months as a long-time substitute for a teacher on sabbatical leave.

It is her opinion that teaching production agriculture is not for every woman.

"If a girl is determined to teach production ag, then there is a good chance she'll get it. But, production ag is not a field for a girl unless she has been brought up around machinery. It really is important to know about small engines," Miss Shaner points out, stating that it takes years of experience to teach the shop end of production agriculture.

"For example, I could drive equipment, but when I had to teach the students about the parts, I couldn't do it as thoroughly as I would have liked," she readily admits.

"And," she continues, "that upsets me, because there are contests at Penn State and they really needed to know that."

According to Miss Shaner, if a young lady knows her way around engines and machinery, there are a lot of schools willing to give a girl a chance teaching production agriculture.

"The classroom part of production ag is very beneficial for the girl who took animal husbandry, dairy husbandry, or agronomy," she says.

Her present job is definitely more suited to her liking and her abilities.

As the elementary agriculture teacher in the Eastern Lancaster County School District, Miss Shaner is one of only a handful of such teachers in the state.

She travels to and from 11 sixth grade classes in the school district teaching them about agriculture.

"They have agriculture classes like they have art or music," she states.

In these classes, she mostly stresses safety in all aspects of agriculture.

Seventh graders are also part of her class load. The students in this age group are able to sign up for Junior Agriculture Club during their free periods in school at which time Miss Shaner meets with them and gives them an introduction to FFA as well as classes on safety. She has four such junior ag clubs.

But, even though her job is rewarding and interesting, Miss Shaner misses one aspect of production ag – the FFA.

"FFA is very rewarding. It's exciting to watch your students advance from school contest to county level and onto districts," she says. "The teacher can also have a close relationship with students because he or she goes to the farms and works with them on their projects.

In essence, Miss Shaner says a production agriculture teacher can "see the student growing in agriculture".

(Turn to Page 130)

Sonia Shaner, elementary agriculture teacher with the Eastern Lancaster County School District, helps a student with her agriculture homework.

Opportunities

(Continued from Page 129)

"After I gain a little more experience in teaching and take a few more courses in shop, I might go back to teaching production ag," she states.

On the whole, she would advise anyone interested in teaching agriculture to try it.

"The field is open," she says. "And I think anyone who wants to can do it." And, she especially urges qualified women to try out the profession.

"I think more girls want to be and should be involved in agriculture. With females teaching in any area of agriculture, it will encourage more girls to go into it," she states.

Vo Tech Teaching

Jennifer Brown is another female involved in teaching agriculture. She is different from Miss Shaner, however, because she teachs a specialized area -- floriculture.

She and her teaching partner, Charles Patterson, run the ornamental horticulture shop at Brownstown Vo-Tech School in Lancaster County.

Both she and Patterson agree that the jobs in their specialized fields of ag education are not as plentiful as those in production agriculture.

"Every month I get a list of vacancies, and there are many, many more in production agriculture than in horticulture," Patterson notes.

Mrs. Brown believes this situation has to do with the specialization.

"People in floriculture and horticulture just don't change as quickly," she believes.

However, the two teachers both say that the jobs are available for interested individuals.

"I was confident that I could find a job in ag ed with a degree in horticulture when I graduated," says Patterson.

There is one basic difference between specialized ag and production ag. Because of its specialization, teaching agriculture in Vo Tech School is not quite as strenuous as production ag in the high schools.

"Here, we're one of several teachers," explained Patterson, "But, a production ag teacher has to know how to do everything."

He and Mrs. Brown point out, however, that a vocational agriculture teacher nearly always has an extra workload because of the nature of the type of teaching.

They would encourage students to pursue a career in this area of endeavor.

CEM outbreak under control

KENNETT SQUARE – The outbreak of Contagious Equine Meritus which was reported in Kentucky during March has apparently been contained, according to the Pa. Horse Breeders Association. No new cases have been reported since breeding operations were resumed following a two week moratorium imposed by the Kentucky Department of Agriculture.

During that time, several suspect stallions and mares were identified, isolated, and tested, and a general code of practice was adopted by the breeders there.

Also, a blood test was developed to identify CEM and proved to be more effective than the previously used procedure.

Before, cultures had been taken and then shipped to testing laboratories where they could be analyzed. Several officials believed that the cultures, if not analyzed within two hours of when they were taken, were not active enough to show the presence of CEM. Because of this, certain horses carrying CEM were allowed into the U.S. from Europe undetected.

The breeding season in Kentucky has now returned to normal but the USDA officials have imposed a quarantine on all breeding stock now in Kentucky. No broodmares are allowed to leave the state, and there is no indication of when the quarrantine will be lifted. However, breeding stock is being allowed to enter the state.

My Thoughts ...

And welcome to them

By JOANNE SPAHR
Assistant Editor

All my life I prided myself on not being prejudiced. As far as I was concerned, black was beautiful, white was beautiful, and so was red, green, and purple, for that matter.

But, just recently, I found I have a flaw in my moral character -- I don't like a certain combination of black and white.

The incident in which I found this out went something like this:

"Scuse me, sir. Does my car smell funny?" I rasped, hanging my head out of the car window and gasping for breath.

Through the tears streaming out of my eyes, I gazed at the green uniformed gas station attendant whose dull-eyed, droopy face slowly screwed up into a giant wrinkled nose.

"Well, Ma'am," he drawled through his toothless grin "You either got sprayed by a skunk or you **are** one!" (I'd heard nicer remarks from people trying to insult me)

Darn, I thought This is the thanks I get for going all the way to Maryland for a story. There I was, two hours away from home, alone in a strange state. with nobody to keep my mind off the smell, and already at the brink of choking from the noxious odor.

"Do you know of a way I could get rid of this smell?" I pleaded, eyes begging for an answer.

"Well, my Daddy used to catch skunks," the attendant said "Let me think, here, a minute what he used to do." As he thought, he backed further and further away from the car.

While he was pondering (and backing up) I recalled that a friend once told me only tomato juice could take away the smell. But, seeing that it was after midnight and sensing that I would have to buy a whole cannery of juice to remedy my situation, I decided to press the attendant once again.

"Have you thought of a way to get rid of the smell?" I shouted at the station, into which the little fellow in green had finally retreated to get away from the stench.

This time he didn't need to ponder.

"Lady," he hollered. "If I was you, I'd dig a hole and just plain bury that car."

'Till I got home that evening, I wished I had taken his advice. And, if I could have found that skunk, he'd have gone with the car.

Serviceman honored by Stevens Feed Mill

BIRD-IN-HAND — A Lancaster County man with more than 25 years of experience in working with poultry flocks was honored here this week by his employer, Earl Martin, of Stevens Feed Mill, Stevens. Fellow employees joined the recognition dinner, held here at the Bird-in-Hand Restaurant on Tuesday evening.

Elmer Glick, who grew up on a dairy farm near Smoketown, was the "Man of the Hour" for the Stevens Feed Mill people. Employed by the Stevens Mill since May 1, 1968, Glick is credited for having built up the firm's poultry tonnage from ground zero to 1200 tons per month. The management and staff at the Stevens Mill wanted to acknowledge that contribution by way of the dinner and a handsome award.

According to Martin, manager of the Stevens Mill, Glick has been a dedicated and very knowledgeable employee. As territory

Elmer Glick

service manager for poultry in Lancaster and Lebanon Counties, Martin serves between 35 and 40 farms in the area. His main responsibilities are to keep track of flock performance and health, including decisions on feeding and medicinal management.

Glick began working with poultry 26 years ago when he took a position with the H.M. Stauffer feed firm at Witmer. That job was followed by a 5-year career with the York branch of the DeKalb Agricultural Association. Glick sold and serviced starter pullets. When DeKalb wanted Glick to transfer out of the area, Glick respectfully declined the offer and consequently took his present postion with Stevens Feed Mill. "I went to work for them because they were a small company just starting in business and I thought I could contribute to their success," Glick explains.

The veteran poultry serviceman sees the area's poultry industry as showing continued promise and growth.

Bird walk planned today

HOLTWOOD – The Spring warbler migration will highlight a bird walk to be held today (May 20) at Pennsylvania Power & Light Co.'s Lake Aldred recreation area.

Woodpeckers, sparrows, hawks and Eastern bluebirds are among the variety of birds to be seen, according to Ben Moyer, seasonal naturalist at Lake Aldred.

The walk will begin at 8 a.m. at the Holtwood baseball diamond off River Road, which is located off Route 372.

Participants in the bird walk, which will be held rain or shine, are asked to wear outdoor-type clothing and hiking shoes, Moyer said.

Lake Aldred recreation area is operated by PP&L in conjunction with its Holtwood power plant.

Playing, Paying

After a few past due payments passed the credit collector came to see Al about the piano "Well," Al explained, "they said I could 'pay as I play' and I've been playing very poorly."

Tract No. 2 - Old stone farm house, in 3 acres, 4 fire places, completely remodeled, also with stream, $79,900.00. Phone 533-7915.

Food basket costs up

HARRISBURG – Pennsylvania's average retail food basket cost the consumer 22 cents more in April than in March, according to the monthly food basket survey report released today by Agriculture Secretary Kent Shelhamer.

Shelhamer said that the statewide average of 14 food products sampled in rural and urban stores in April was $11.11, a new record high, compared to $10.89 in March.

"This figure shows a third consecutive month of food price increases," Shelhamer said. "It is beginning to look like farm prices have finally bottomed out, but even with these moderate increases, farmers are still losing money to inflation and the marketing spread."

Food basket costs had risen eight cents in March after a 32 cent rise in February. The food basket had cost $10.96 last July, the previous high figure.

The monthly survey, conducted by the Agriculture Department's Bureau of Rural Affairs, compares the prices of 14 sample "food basket" items in rural and urban stores and is aimed at providing consumers with retail food price trend information.

The difference in the cost of the food basket purchased in urban and rural stores stood at 1.63 per cent in April. The food basket cost an average of $11.05 in urban supermarkets compared to $11.23 in rural stores.

The spread between namebrand and storebrand items decreased from 10 to 9.5 per cent in April. A comparison of eight of the 14 food basket items showed the average price of namebrand items to be $7.90 while the same storebrand items cost only $7.15. March figures had shown a 10 per cent difference between storebrand and namebrand items.

Coffee prices dropped from $3.37 to $3.28 a pound and eggs declined from 81 to 80 cents a dozen large eggs. Canned corn and bread remained about the same in price.

COMPLETE DISPERSAL

Somerset Co. chooses new dairy princess

SOMERSET – Lynn Ann Taylor, daughter of Mr. and Mrs. Robert Taylor of Friedens R1, was selected as the 1978 Somerset County dairy princess, succeeding Deann Hillegass of Berlin. Miss Taylor, 16, is a junior at North Star High School.

Seven girls competed for the title in an event held at the Ramada Inn and was attended by 275 people. Georgia Sechler, daughter of Mr. and Mrs. Guy Sechler of Somerset R1, was first runner-up and Annette Hillegass, daughter of Mr. and Mrs. Robert Hillegass of Friedens was second runner-up.

The contestants met with a panel of judges prior to a buffet dinner that was served to those attending the contest. The girls then appeared on stage with presentations promoting dairy products. They were interviewed by Harold Showman of Radio Station WVSC, Somerset, master of ceremonies. Prior to the crowning of the new dairy princess, past dairy princesses were introduced by Barbara Berkley, chairman of the Somerset County Dairy Promotion Committee.

Bazaar set for May 27 and 28

SAFE HARBOR -- Members and friends of The Lancaster Forest Fire Crew are preparing for their annual Spring Bazaar to be held on May 27 & 28. The crew is seeking additional stand holders and concessions in an effort to make this year's event the largest they held to date.

Organizations and individuals are welcome to call the Forest Fire Crew at 717-872-7298 to inquire about space for flea market stands, concessions, exhibits, antiques, yard sales, or whatever. While the event is open to all types of displays and games, etc., there is particular interest in signing up stands for home-crafted items and hobbyists.

Several special events are being scheduled for the bazaar this year, which the crew is calling a community fair and bazaar. This year there will be fire company competitions each afternoon, a chicken bar b que at four p.m. each day, and on Saturday evening, a Gospel Concert at 7 p.m.

The event will be held at the fire station now being developed in Manor Township, Lancaster County, known as The Fort Holbrook Fire Base, located on Oak Road, off River Road, between the villages of Highville and Safe Harbor.

Hours are 10 a.m. until 10 p.m. on May 27, and from 1 p.m. until dusk, on May 28 Raindate for either of the two days of the event is Monday, May 29.

Correction

Dr. Richard Saacke

In the May 13 issue of **Lancaster Farming** in incorrect photo was published with the story, "Man figures high in dairy reproductive problems. Identified as Dr. Richard Saacke was Robert Eberhart, department of veterinary science, Penn State University. Pictured above is Dr. Saacke, professor of dairy physiology at Virginia Polytechnic Institute and State University.

Amos Funk

(Continued from Page 106)

way to prevent the development of much of the township in future years; not in his lifetime perhaps, but he sees it coming.

"Agricultural Districts have worked well in New York anc California. However, there is nothing except a tax penalty to prevent a farmer from selling to a developer in 8-10 years. If too many farmers in an Agricultural District sell their farms, the District is dissolved and we are back where we started.

"At the present time, legislation is being drafted in OSPD to permit the formation of Agricultural Districts with the promise by the State to buy the development rights of those farmers in the District who wish to sell.

"Our Pennsylvania Association of Conservation Districts adopted a Land Use Policy after two years of hard work. We have some outstanding individuals on the Land Use Committee, Dick Kirk, SCS, Dr. Tom King, Director of Extension, Neal Buss, Deputy Secretary of Agriculture, and Chuck Slaton, OSPD.

"I understand the legislation being drafted contains many of the proposals contained in the Conservation District's Land Use Policy. There is a concerted effort being made to get broad based supports for this legislation...The FFA, Grange, League of Women Voters at the State and local levels. I sent a copy of our proposal to Phyllis Whitesell of the local league.

"Our proposal designates ½ per cent of the Real Estate transfer tax, 15 million on be used to buy the development rights in Pennsylvania.

"To those who say this 15 million dollars would not go far, I would say 15 million is three times as much as New Jersey started with. Maryland plans to start with 4-4½ million and Massachusetts will start with a 5 million dollar pilot effort.

"While I am sure it will cost the residents of our county and our state tax dollars to set up a sound plan to permanently keep our best agricultural land in agriculture, I believe the long-range costs will be greater to do nothing or adopt ineffective short-term measures that are cheaper, but not as good.

"At the most recent PEG (Pennsylvania for Effective Government) meeting in Hershey, Paul Wass, House Member from Indiana County, told me about a bill he introduced to help Christmas tree growers in his county. The Christmas Tree industry is an important one in Indiana County.

"Since Lancaster County is such an important agricultural county, I think it would be most helpful and it would be very fitting if, after adequate review and appropriate changes in the Bill, all members in the House representing all or part of Lancaster County become sponsors of the upcoming Bill on Farmland Preservation. After all, the National Land Use Policy Act had 52 sponsors. I understand an attempt will be made to incorporate some of the provisions of Sam Morris's Bill on the creation of Agricultural Districts in the new Bill.

"Congressman, Bob Walker called me to inform me that he is interested in the purchase of development-right concepts. He is considering a federal bill that would reward an individual with income or other tax credits if a gift of the development rights is made to the county.

It would seem to me that if we get started at the State level with some later help at the federal level, we may finally be able to lock in some of our best agricultural land to agricultural production and still retain it in private ownership and on the local tax rolls.

COME TO THE
CROOKER NIGHT

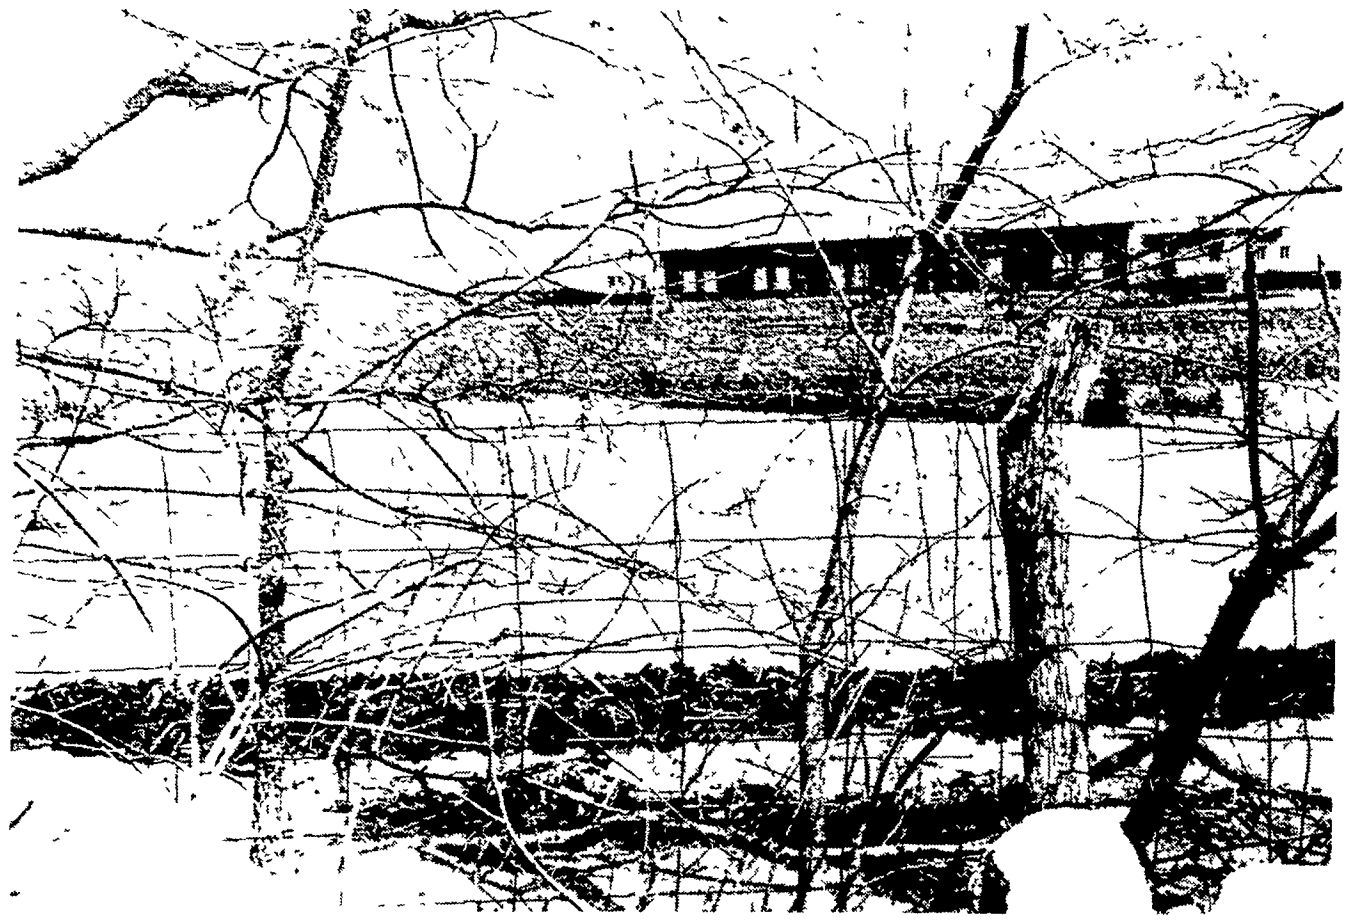
Clay C. Hess 489-7127
Richard J. Moyer 948-8050



The pool of water gathers on the land adjacent to Glenn Snyder's field and then crosses over into his field, making his land difficult to work and hard to harvest.

Stormwater mismanagement

(Continued from Page 105)

have been to the area to check out the problem. We will be taking steps to correct the problem in the near future, but exactly what steps will be taken I don't know yet."

What Snyder would like to see done is for the industrial park to build a holding basin, resembling a pond, in the area causing a problem. While he admits that the business would possibly lose an area which might be used for a parking lot, he still thinks that would be the solution to follow.

Horst, who said that he recognized the problem at the Rapho Industrial Park, also stated that since the park has been built, Snyder's land has also increased in value because of the business's existence But again he stressed that the problem has been intensified by the development and that something will be done to solve the problem.

Hackman, who hopes for laws which will bring the problem into focus and fix responsibilities for solving such problems such as this one, stated that this example is just one of a long list. He told of streams he used to be able to step across that now can't be walked due to the massive erosion. He also spoke of the damage to scenery of the land in general.

"A lot of innocent people are suffering because right now there are no controls," he stated.

PUBLIC SALE

33 ACRE COUNTRY ESTATE

SATURDAY, JUNE 3

1:00 P.M.

Located on the premises at Route 1, Grantville, East Hanover Township, Lebanon County appx. 1 mile east of Penn National Racetrack. 4-H'ers learn leadership skills

LANCASTER – Freshly elected officers and new leaders of 4-H gathered at the Farm and Home Center, Lancaster, on May 16, to better learn how to handle their positions and responsibilities. The Lancaster County group met to split into different workshops as each person concentrated on his or her role in the 4-H program.

Each division of the workshops was led by someone involved in the 4-H program who explained to the new officers exactly how to run an efficient club. Leaders and the workshops they covered included: Kerry Boyd, presidents and vice presidents; June Grube, secretaries; Linda Franz, treasurers, Sarah Brubaker, and Jim Stauffer, game and song leaders, and news reporters, Kendy Borry. New leaders were instructed by Aggie Arnold-Norman and Nancy Henkel.

The evening was begun with a slide series, "4-H Something to Sing About". After the workshops, the group of approximately 50 4-H'ers returned to watch the Ephrata Cloister FFA Parliamentary Procedure Team demonstrate their skills which won them top honors in the recent Lancaster County contest.

A follow-up session will be held on May 23 for leaders. A variety of workshops will be offered which will explore the responsibilities of a leader's role in 4-H.

Horse show set

HELLAM – The Our Gang Riding Club, Inc., Hellam, will hold an open Children's Horse Show to be held at the club grounds, on May 21, beginning at 9 a.m., rain or shine. The club is open to youth 18 years and younger.

Directions to the club grounds are: From Rt. I-83 at Exit 7, go east on Rt. 124, approximately five miles to Barcroft Road. Then turn right, then proceed one mile and turn left on Gun Club Road.
